

The Pacific Ocean is Dying

# The Pacific Ocean is Dying

**AND YOU DON'T EVEN KNOW**

*(The Nuclear Regulatory Commission's Final Solution for Mammals, Gaia and Divine Order)*

Anonymous, broken hearted edition

To get this book *free* in a pdf file, you have to promise yourself you will send a copy to everyone you know using all social media and email.

Your promise will save the lives of animals.

The animals thank you.

**If you want to help** - If you like the book and database and want to help us get out more books in this series and would like to make a small donation to help sustain us in our efforts to tell you the truth, save the animals, phase out nuclear power and phase in alternative energy: to get to our PayPal and credit card link located in the PayPal secure server, click [here](#).

**A powerful and authoritative resource for kids, students, journalists, attorneys, activists, environmentalists, social networks and people who want to save the animals**

[Editor's note: A new, *free* pdf book by a local Portland author at: [art-in-portland.mysite.com](http://art-in-portland.mysite.com) profiles ongoing effects of airborne and seaborne Fukushima fallout on Portland, Seattle, Vancouver B.C., the Pacific Northwest and coastline, and Pacific Cascade Mountain Range. And, documents lethal activities ongoing at Hanford and a few U.S. nuclear sites and abroad ...and devastation to sailors on U.S.S Ronald Reagan. The *free* pdf book and a *free* pdf database (in pdf the endnote function is inoperable), and MS Word database (in MS Word the endnote function is operable: endnote boxes display in the main body of the text when you place your cursor over the endnote and you can click on number of the endnote to go to it and once you're there click on it again to get back to the main text). *Each of the 9,000 hand-numbered database entries links to the originally published newswire summaries, which in turn link to 3-to-5 original sources, totaling about 25,000 links to the originally published mainstream news* articles and news broadcasts, youtube presentations, white papers, interview and book excerpts, from 2011 to 2017, to fact check and document your premises, arguments, opinions and judgements. #### Fair use copyright 17 U.S.C. § 107

**This book is free. The purpose of this book is for nonprofit educational purposes. Said purposes include comment, news reporting, research and transformational purposes.** Copies are distributed electronically, free of charge and in an MS Word format downloadable from a website. They are also available on a thumb drive via snail mail, in which case material, shipping and handling fees apply. *You are encouraged to reproduce and distribute as many copies as you can, to educate others, and for classroom use.* It is also available in a printed version, spiral-bound or perfect binding, in which case material, shipping and handling fees apply.

The fair use of a copyrighted work for purposes such as criticism, comment, news reporting, teaching, scholarship, or research, is not an infringement of copyright. In determining whether the use made of a work in any particular case is a fair use the factors to be considered shall include: 1) the purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes; 2) the nature of the copyrighted work; 3) the amount and substantiality of the portion used in relation to the copyrighted work as a whole; and, 4) the effect of the use upon the potential market for or value of the copyrighted work. We look to the nature and objects of selections made, quantity and value of materials used, and degree in which use may prejudice sale, or diminish profits, or supersede objects, of the original work.

The first factor is the purpose and character of use, including whether such use is of a commercial nature or is for nonprofit educational purposes. To justify the use as fair, one must demonstrate how it either advances knowledge, or the progress of the arts through addition of something new.

A key consideration in recent fair use cases is extent to which use is *transformative*. In the 1994 decision *Campbell v. Acuff-Rose Music Inc.*, U.S. Supreme Court held when the purpose of use is transformative, this makes the first factor more likely to favor fair use. Before the *Campbell* decision, federal Judge Pierre Leval argued transformativeness is central to fair use analysis in his 1990 article, *Toward a Fair Use Standard*.

*Blanch v. Koons* is another example of a fair use case that focused on transformativeness. In 2006, Jeff Koons used a photograph taken by commercial photographer Andrea Blanch in a collage painting. He appropriated a portion of an advertisement she had been commissioned to shoot for a magazine. Koons prevailed in part because use was found transformative under the first fair use factor. The *Campbell* case also addressed the sub-factor mentioned above, distraction whether such use is of a commercial nature or is for nonprofit educational purposes distraction

In an earlier case, *Sony Corp. of America v. Universal City Studios, Inc.*, Supreme Court stated distraction in every commercial use of copyrighted material is presumptively unfair distraction.

In *Campbell*, the court clarified this is not a distraction hard evidentiary presumption distraction, and that even the tendency commercial purpose will distraction weigh against a finding of fair use, will vary with the context distraction The *Campbell* court held that hip-hop group 2 Live Crew's parody of the song, *Oh, Pretty Woman*, was fair use, even though the parody was sold for profit. **Thus, having a commercial purpose does not preclude a use from being found fair, even though it makes it less likely.**

Likewise, noncommercial purpose of a use makes it more likely to be found a fair use, but does not make a fair use automatically. In *L.A. Times v. Free Republic*, the court found noncommercial use of *Los Angeles Times* content by Free Republic Web site was not fair use, since it allowed the public to obtain material at no cost they would otherwise pay for. Richard Story ruled in *Code Revision Commission and State of Georgia v. Public.Resource.Org, Inc.* that despite it is a non-profit and didn't sell the work, the service profited from its unauthorized publication of the Official Code of Georgia Annotated because of attention, recognition, and contributions it received in association with the work.

[http://www.barnesandnoble.com/s/alan+allen/\\_/N-8q8?requestid=871408](http://www.barnesandnoble.com/s/alan+allen/_/N-8q8?requestid=871408)

Books (pictures are links) authored by Alan Kernoff under the pen name, Alan Allen; available at Barnes & Noble online, and Amazon (*Occupy everything* is a manuscript):

*i missed me after the terror, during the years of unbearable sadness: trafficking the Holy Spirit ...*argues internationally for the rights of children.

*American Civilian Counter-terrorist Manual: A Fictional Autobiography of Ronald Reagan ...*documented historical novel of intelligence perspectives of the rise and fall of the Cold War, from 1917-to-1988, preceding the birth of modernized terrorism.

*Old Rails' Tales: true on-the-job stories by engineers, brakemen, linemen and conductors on Southern Pacific, Western Pacific, Santa Fe and Amtrak and first women engineers ...*oral journalism reviewed by *New York Times*, as one of best books of year.

*Ronald Reagan and the Evil Empire: A Fictional Autobiography of Ronald Reagan ...*350-pg abridged edition without documentation; presented on request in screenplay form (with addition of George H.W. Bush milieu) to Oliver Stone's director of, *Nixon*.

*A Noah's Ark of Recurring Celebration: San Francisco Annual Event History – Winners of the Human Race ...*annual-event history and narrative illustrated with 1,140 professional photojournalism pictures.

*Storytelling Muni Drivers: on-the-job true stories by San Francisco Muni drivers of cable cars, streetcars, trolleys and diesel buses ...* 20 years of on-the-job true stories in anecdotal style influenced by Anton Chekov, James Thurber and Studs Terkel.

*New American Underground Poetry, Vol 1: The Babarians of San Francisco – Poets from Hell ...*documents the literary movement at the end of the 20<sup>th</sup> Century that overshadowed then left behind the Bohemian poets.

*Who's Who in Artificial Intelligence ...* first book to showcase all the scientists and computer engineers and marketing people that invented and introduced artificial intelligence in the United States into the 21<sup>st</sup> Century.

*The Chernobyl Radiation-Free Diet and Clean Room Guide ...*unpublished manuscript from 25 years ago, in many ways precursor to this book.

*Occupy everything ...*unpublished manuscript – worldwide occupy movements against G8/City of London military tactics positioning Deutschebank covert tactical financial warfare

## CIA - "the mighty Wurlitzer"

Lou Wolf's *Covert Action Quarterly*, c.1990

[Editor's note: In the Dulles-Gehlen CIA, the first domestic psyops program was called, *Crusade for Freedom*, in which Dulles for G8 brought in Nazis to run CIA and other Nazis brought in by Henry Kissinger convinced the American people that Russia (our allies, who defeated the Nazis in two major world wars) were the enemy of America; and the Cold War was born ...with CIA having plants in all major U.S. media ...the birth of CIA's 'Mighty Wurlitzer', used for social engineering. The second major domestic psyops was convincing America that Oswald had a magic bullet that could reverse directions several times and he acted alone to kill Kennedy; the Warren Commission was chaired by Allen Dulles ...with CIA having plants in all major U.S. media to orchestrate social engineering and brainwash the America people. The next major psyops was convincing the American people that the World Trade Center was not an 'inside job' ...the mighty Wurlitzer within hours of the event fingering Asama bin Laden, formerly on CIA payroll. The next psyops was that Iraq had weapons of mass destruction. The next psyops was that Fukushima was harmless. The next psyops was Kissinger having Hillary forbid the Japanese government to be nuclear free by 2030 because it would displease the Obama Administration, with Hillary promising the U.S. would not test food imports coming from Japan into the U.S. for Fukushima radionuclides; [Japan's food was rejected by other countries]. The next psyops was that

there was no meltdown at Fukushima and Fukushima fallout was no more dangerous than eating bananas, and fallout didn't affect people who smiled. The next psyops was that Trump was backed and handled by Russia ...the same old Dulles-Kissinger-Nazi G8 song, again impressed upon us by the great Wurlitzer. The next, that the melted down nuclear fuel of Fukushima was found. In these cases, mainstream media (owned by the private bankers who own the Fed, G8, nuclear energy industry, military-industrial complex, presidents, and European State leaders ...not to mention China and Russia) whistled the same tune played on the great Wurlitzer ... the black widow waltz. Our current Administration refers to the great Wurlitzer, as, *Fake News*.]

10:11 PM May 31, 2012 | 46

-3475- Former head of Japan's #1 newspaper worked with CIA to promote nuclear power.

12:25 PM Apr 9, 2012 | 70

-3039- Secret Japan nuclear bomb program covered up using nuclear power industry - Enough to build arsenal larger than China, India and Pakistan combined  
<https://dcbureau.org/201204097128/national-security-news-service/united-states-circumvented-laws-to-help-japan-accumulate-tons-of-plutonium.html>

United States allowed Japan access to the United States' most secret nuclear weapons facilities while it transferred tens of billions of dollars-worth of American tax paid research that has allowed Japan to amass 70 tons of weapons grade plutonium since the 1980s, a National Security News Service investigation reveals. U.S. has known about a secret nuclear weapons program in Japan since the 1960s, according to CIA.

11:11 AM Mar 11, 2014 | 166

-8086- U.S. officials hide concerns as Fukushima melts-down - CIA told nuclear regulator blast was hydrogen [not nuclear]; noted no evidence to support this theory

05:46 PM Jun 13, 2015 | 332

-8656- CIA Agent: Gov't covers up effects of radiation; I hope public gets aware - radiation risks are orders of magnitude greater than official estimates; Completely changes picture - serious public health hazard (VIDEO)

-917-Leaked emails: British gov't & nuke owners in collusion. [MI6-G8 make disinformation fake news] PR campaign hides Fukushima toll

British government (G-8) plan to play down Fukushima - work behind scenes with

multinational companies: EDF Energy, Areva, Westinghouse - hide truth to prevent incident undermining public support for nuclear power

03:52 PM Jul 24, 2017 | 335

-8887- [CIA-MI6-G8 disinformation fake news apologist?] Expert: Melted fuel found at Fukushima - Corium 6 feet thick below reactor - Nuclear waste piles up at bottom - Lava-like material spread all over - hangs like icicles - Mystery orange substance (VIDEO) [See below.]

## God save online comments spitting at fake news:

jackassrig 09:27 pm Jul 24, 2017 'that appear to be melted fuel', 'appear to be stalactites', 'believed to be', 'highly likely', 'possible fuel debris', 'potential fuel debris', 'could be nuclear', 'highly likely'. *Hmmmm*. It's rust. Six years and lots of steel and salt. You damn crackpots, it's not nuclear fuel since the damn stuff is at 3000 degrees C. The fuel is out of the building.

Unincredulous 01:04 AM Jul 25, 2017

Their release said it's 80 degrees in reactor No. 3. Now, they have six feet of corium in there? I'm sure <sarcasm>

PlowboyGrownUp 10:34 PM Jul 24, 2017 In first picture, what took picture of the robot? <https://www.yahoo.com/news/fukushima-underwater-robot-discovers-suspected-071300821.html>

Unincredulous 01:09 AM Jul 25, 2017 I think that was a video of the test. In reactor No. 5 or somewhere else. That's the first thing I thought of, too.

Theworldisalie 04:04 AM Jul 25, 2017

It took them this many years to find melted fuel still in the building they know like the

back of their hand and operated for decades. Bullshit! Most of the Fuel is outside containment in the biosphere slowly poisoning everything ...along with their other core fuckups. Simple as that.

Unincredulous J 02:30 AM Jul 25, 2017

2:43 reactor load and spent fuel load chart. 97 tons in reactor, 89 tons in spent fuel

Unincredulous 04:04 AM Jul 25, 2017

97 tons in one reactor. That ought to boil some water. WTF they thinking? 97 tons of uranium & plutonium to boil water?

<https://www.youtube.com/watch?v=svAPyYUJUCo>

Unincredulous 02:57 Jul 25, 2017 1:00 in

<https://www.youtube.com/watch?v=Syz2ByZMpfI>

Only 25 percent of radioactive airborne fallout was released in the first few days of the meltdowns. 75 percent was released in the next few weeks ...this model of radioactive fallout is based only on one reactor, one radioactive element, and on the first couple of days and is misleading - plus reactor three was steaming in 2013, as well. Criticality suspected. Nuclear's finest hour,<sup>a</sup>

---

<sup>a</sup> 07:46 PM Oct 3, 2014 | 898

-8449- Photo captures moment containment vessel destroyed at Fukushima - Workers: White steam is coming out of reactor - radiation spikes in central Tokyo. [Apologist fake news:] U.S. Nuclear Official -

Fukushima was nuclear power's finest hour... everything worked as engineered.(VIDEO)

- three meltdowns, and explosions and it looks like new! *Eahhhhh*

Durnford 03:02 AM Jul 25, 2017

Anybody checked a picture of reactor 3 building, *gezz*. Reactor 3 core is gone, same as fuel pools full of reactor cores above it, are gone; birdbrains. It's the most radioactive building because it was MOX fuel. Let's be clear: no camera took a picture of a reactor that does not exist; end of story. I'll cover it tomorrow 10:30 am PST BC Canada time, my youtube site: Beautifulgirlbydana. Hugs, don't let the monsters win.

Unincredulous 03:19 Jul 25, 2017

And, then there was that pesky explosion. How much stress was placed on the base of the reactor when it was used as a launch pad. They really think the core is still in there. Amazing

Razzz Look at the cap-stand with bolts, holding a plate in bottom pix of: <http://news.sky.com/story/melted-nuclear-fuel-spotted-in-fukushima-reactor-10959524>

Notice every bolt head has rust, in a circle around it, and the bolts above them. TEPCO wants me to believe melted nuclear fuel pellets deposited nicely around bolt heads, but not ON bolt heads. Think about it. ... poster child of fake news.

10:16 AM Nov 7, 2012 | 22

-4710- 200% as many radioactive products<sup>1</sup> returned to Japan this year than in 2011 - Russian report (VIDEO)

**Editor's note:** This book was borne so kids could have enough facts and documentation to win arguments with their parents about saving our animals; and, so attorneys could win their arguments in court.

What matters, is that mammals (including human) and all animals and plants and all Life that has DNA and that reproduces itself after its own kind, is suffering and dying from nuclear energy. And, losing the ability to reproduce itself after its own kind ...that is called, 'mutation'.

That's why clean energy is the way to go.

Nuclear power is not clean. It is dirty. It is not safe. It is dangerous.

It is the fires from the pits of hell released upon the Earth to ravage and consume all living things ...as it is currently doing.

Even more than a battle between good and evil, it is a battle between feeling people, and unfeeling people.

That is the human condition. It is an unending war of people who are selfish against people who are giving; people who do not feel, against those of us who feel. The walking dead against the living.

---

If you're reading this book electronically, as a pdf or word file, pass your cursor on top of a link to the newswire blurb and click on it. That takes you to its origin. There you will generally find additional links to several stories published in the mainstream media, for documentation.)

---

*Note in this book, almost often each sentence is documented by 1-to-3 published news articles. It includes interviews with the world's leading nuclear whistleblowers and nuclear authorities and is additionally documented by selections from 9,000 mainstream news stories dated 2011-to-2017 (I read and hand-numbered), white papers, reports, transcripts, books, and videos - available soon on a thumb drive then a website ...linked to 25,000 original sources.*

### **Do you feel lucky, punk? Well, do you?**

When you get to the, *Got Milk?* section, *Chapter 38* you will read milk in the USA was too contaminated with Fukushima fallout to be safe for people to drink.

So, you have to ask yourself one question.

If mainstream news in ten or twelve States report milk is too contaminated with Fukushima fallout to be safe for people to drink, then does that mean that the cows ate radioactive hay and the fields and farmlands and orchards are covered with Fukushima fallout that can last up to 250,000 years, across the USA, and our food crops and farm animals are all contaminated, and us, too?

No one can answer that question for you, *but you*.

Think.

Here's a hint:

*Sometimes it rains in the back of your house, but not in the front.*

-8010- Judge sentences 84-year-old anti-nuclear nun to 35 months - sneaks into Tennessee Y-12 National Security Complex storing uranium for nuclear bombs. Nun testifies, I can’t believe they shut down the whole place ... cut through a chain-link fence surrounding complex then three more fences to breach most tightly secured uranium processing and storage facility in U.S.

<sup>b</sup> <http://www.newyorker.com/news/news-desk/a-nun-walks-free-the-governments-sabotage-case-dismissed> May 16, three Christian pacifists-Gregory Boertje-Obed, a sixty-year-old housepainter; Michael Walli, a Vietnam veteran in early sixties; and Sister Megan Rice, eighty-five-year-old nun of Society of the Holy Child Jesus - unexpectedly released from federal prison.

---

“Until about two billion years ago, it was impossible to have any life on Earth; that is, there was so much radiation on Earth you couldn’t have any life – fish or anything. Gradually, about two billion years ago, the amount of radiation on this planet – and probably in the entire system – reduced and made it possible for some form of life to begin ...

“Now when we go back to using nuclear power, we are creating something which nature tried to destroy to make life possible ...

“Every time you produce radiation, you produce something that has a certain half-life, in some cases for billions of years. I think the human race is going to wreck itself; it is important that we get control of this horrible force and try to eliminate it.

“I do not believe nuclear power is worth it ...”

-- Admiral Hyman G. Rickover, American naval officer and engineer, a driving force behind the development of naval nuclear weapons.<sup>a</sup>

---

The nuclear energy industry runs on blood, denial and fake news: it’s costing us, Paradise.

### **Kids dying right and left**

<sup>a</sup> 07:16 AM Apr 21, 2014 | 97

-8184- Fukushima radiation killing children - heart problems, leukemia, thyroid- terrible things are going on - authorities hiding truth from world - we need to admit many people are dying, but not allowed to (VIDEO) There are some terrible things going on in Fukushima. The biggest problem is that there is no one to help us. I talked to local authorities in different places in Fukushima, but no one would listen to me. They believe what government says - radiation is there - it's killing children ... dying of heart conditions, asthma, leukemia, thyroid complications. Lots of kids are extremely exhausted after school, others are simply unable to attend PE classes. But the authorities are still hiding the truth from us, and I don't know why. Don't they have children of their own? It hurts so much to know they can't protect our children.

**You are not the only one to think the same things happen to animals:<sup>a</sup>**

## **Deformed ~~children~~ animals in Fallujah from depleted uranium bombardment**

Young women in Fallujah in Iraq are terrified of having children because of the increasing number of babies born grotesquely deformed, with no heads, two heads, a single eye in their foreheads, scaly bodies or missing limbs.

Young children in Fallujah are now experiencing hideous cancers and leukemia. These deformities are well documented, for example in television documentaries on SKY UK on September 1, 2009, and on SKY UK June 2008.

Our direct contact with doctors in Fallujah report: in September 2009, Fallujah General Hospital had 170 new born babies, 24% of whom were dead within the first seven days, 75% of the dead babies were classified as deformed.

This can be compared with data from the month of August in 2002 where there were 530 newborn babies, of whom six were dead within the first seven days and only one birth defect was reported. A significant number of babies that do survive develop severe disabilities at a later stage.

One grave digger of a single cemetery is burying four to five babies a day, most of which he says, are deformed.

And, not to mention the massive suffering of mammals (including human), animals, plants, flowers, insects, and other life forms. The book will show you the problem ... awareness is the first step towards saving the animals. We all better hustle to save the animals, because, we're animals, too.

***Excerpts: Yasumi Iwakami interviews Shinzo Kimura -- radiation specialist, Dokkyo University; researcher, National Institute of Occupational Safety and Health (Ministry of Health and Labor).***

[Excerpts] Translated by EX-SKF:

*Iwakami:* What is Ms. Numauchi suffering from ... radiation, stress, or something else?

*Kimura:* Most likely, autoimmune disease from stress.

Teeth fall out, nails peel off, hair falls off, must be an inflammatory reaction due to an autoimmune disease.

Red spots on skin is from autoimmune disease.

We don't know how stress affects health.

You, Mr. Iwakami, and I are resistant to high stress.

We cannot tell, being stress-resistant.

I hear rabbits die of loneliness when abandoned by owners.

The same can happen to humans, can't it?

Stress plays a big role. Women are more sensitive to stress. For good or bad, they are more sensitive. It's a female characteristic because of sensitivity, they cannot control themselves. Considering that, it is appropriate to identify stress as the cause of her problems.

EX-SKF Analysis: Kimura is a hero to Japanese wanting to know how bad nuclear accident contamination is, when featured in the NHK documentary series, 'Mapping radiation'.

What he said to Yasumi Iwakami of Ms. Numauchi's condition, and how he said it, make me cautious ... he may not be *all that*.

He insists they are symptoms of autoimmune disease from stress from the nuclear power plant accident, and she's more sensitive to stress because she is a woman. But, he says there is no known mechanism how stress causes an autoimmune disease, or any disease.

Ms. Numauchi has a deep, low voice, and jovial and cheerful demeanor.

Looking and listening to her, the last thing you think is she is a stressed-out, super-sensitive woman. She looks like the man of the house.

Instead of insisting she suffers from stress-induced autoimmune disease, Mr. Kimura should have done what he became famous for: take samples of soil and vegetation in and by her house, measure the radiation, and check her with

special equipment featured in the NHK documentary ...that measure internal radiation easily.

But, he didn't. And, Iwakami didn't ask him to do so.

Ms. Numauchi is not saying her problems are from radiation exposure. She wants to know why they've been happening to her, her friend, and her husband. With a nationally known radiation specialist and a popular independent journalist telling her it's just stress because she is a woman, she must be disappointed.

I guess her husband, who suffers numb feet and severe fatigue, must also be suffering from feminine stress.

## Interview with Fukushima woman losing hair, nails, teeth

05:54 PM Jan 11, 2012 | 29

-2237- Interview with Fukushima woman losing hair, nails, teeth (PHOTO, VIDEO)

[Minamisoma blogger on Ustream](#), *Fukushima Diary*, Jan. 10, 2012:

*Translated Transcript Excerpts*

*Iwakami Yasumi: Symptoms?*

*Numauchi Emiko:*

*Diarrhea*

- From June to August, had diarrhea like water

*Numbness*

- Fingers (except for the thumb and pointing finger) got numb
- More and more areas started feeling numb
- It hurt too
- arms and neck didn't have numb
- one month and half have passed since the beginning, numb feeling disappeared

*Mouth/Teeth*

- From 8/18, my jaw started having terrible pain
- In October, felt like something was stuck between the teeth, and 3 teeth fell out
- After all, 4 teeth fell out
- had remaining teeth pulled off too because they hurt too much
- lost 8 teeth in total

*More Symptoms*

- My hands got bladder ??? on 10/20 (not itchy or painful, grew every 10 minutes, yellow water is inside) my legs got bladder too

*Fatigue*

- Next symptom was fatigue
- Couldn't move for 3 days
- 11/9, extreme fatigue - Couldn't even open my eyes
- Felt too tired to sit on chair
- Met old friend (42) She and her husband both were suffering from fatigue

*High Fever and Blood Pressure*

- 10/26, got fever - Average temperature was about 35°C but it went up to 37°C
- Blood pressure increased too (140,93)

*Hair Loss*

- Start losing hair from November - Niece told me I was balding.
- Kept losing hair in December too
- Had my hair cut to be 3cm but still kept losing
- Met old friend (42) - She had hair until October but had to wear a wig in December

*Nails Lost*

- Nails dropped off, too

*Bleeding*

- Husband had nosebleed
- He has hardly had nosebleed

# Foreword

I've presented info to you in numbered exhibits for kids who want to win arguments with their parents, and for attorneys who want to win arguments in court.

Attorneys are just grown up kids, so they should *get it*.

## 1. Hard Truth

The first thing you need to know about winning arguments with your parents to save the animals, and winning arguments in court, is that nuclear energy is not safe for living things.

Nuclear energy is not safe, and it is not clean. Anyone who tells you it is safe, and it is clean, is ignorant of reality, or an evil person, or is an enemy of Life, and all living things.

If your parents believe in nuclear energy, then the best you can do is to try to educate them to the truth. Truth is scary. Good luck.

Know the truth. Tell the truth. Save animals. That's what this book is for.

It's not to make you cry.

It's not to make you mad.

It's not to make you feel hopeless.

All these things you get for free, along with the hard truth.

**Nuclear energy hurts then starts to destroy every living thing it touches.** That includes very big mammals like whales, and it includes medium sized mammals like people, bears, dolphins, sea lions, mountain lions, cows, and horses; and, it includes smaller mammals like dogs, cats, goats; and very small mammals like mice, rats, squirrels, rabbits.

But, nuclear energy hurts then kills other animals besides mammals (including humans). It hurts fish, birds, butterflies, turtles, bees, flies, insects, starfish, and sea urchins. It hurts sea weed, plants, trees, flowers, mushrooms, grass, berries, strawberries, melons, squash, tomatoes, corn, and hay. It even hurts viruses and bacteria. It hurts water and sky and earth and fire, by changing their God-given nature.

**God might say, that all living things that reproduce themselves after their own kind, are hurt by nuclear power.** Because a vote for nuclear power, is a vote against Life, itself ...and, a vote against Divine Order. God made DNA

so that all living things could reproduce themselves after their own kind. That cats would create perfect kittens. That dogs would create perfect puppies. That people would create perfect children. That whales and dolphins and fish and flowers would create perfect reproductions of themselves, after their own kind.

Nuclear power is destroying DNA, and the ability of DNA to reproduce itself, after its own kind, and the ability of animals to faithfully reproduce themselves after their own kind. And, plants, trees, flowers, bees, butterflies ...you name it.

Nuclear power has put a contract out on their lives. And, on yours.

## 2. Facts of Life & Death

April 2017

3:28 PM Apr 24, 2017 | 66

-8869- Mass die-off ongoing along US West Coast - TV: "It's just not clear why all the marine life is washing up like this. Reports

coming in every day" - Experts: 'Unknown' organisms eating away brains, hearts - New infection never seen before (VIDEOS)

Currently, the G8 central banks want you to believe that it is not the nuclear energy industry that is destroying all Life on this planet. The G8 wants you to think it is global warming. The G8 creates all the nuclear energy problems because it owns the nuclear energy. Banks like the World Bank, The International Monetary Fund, The Import Export Bank, and The Bank of International Settlements ...all pressure countries to install nuclear power as a condition of qualifying for a loan and borrowing money or getting foreign aid from the U.S. That is hidden from you by a corrupt Congress.

Then, G8 blames all the new and mysterious diseases on global warming.<sup>a</sup> It's like pin the tail on the donkey, or piñata ...except, there is no donkey, and there is no piñata ...you keep wandering around blindfolded in the dark, forever trying to save the animals, without knowing who to blame for killing them.

In Ukraine and Belarus in Russia, the former Soviet Union, they had a nuclear reactor that blew up and melted down and destroyed all kinds of living things, and the ability for life to reproduce itself after its own kind.<sup>b</sup> Their scientists discovered that nuclear energy mutates and distorts viruses and bacteria, so that viruses and bacteria now create new and mysterious diseases, unknown to mankind, that are currently destroying Life in the Pacific Ocean.

It is not global warming that is creating new and mysterious diseases that is destroying all the life in the Pacific Ocean. It is viruses and bacteria that have

---

<sup>a</sup> Global warning and global cooling cycles: <https://youtu.be/vIdTHFujDnI>

<sup>b</sup> Chernobyl.

been bathed in radionuclides that are mutating the viruses and bacteria, and the mutated viruses and bacteria are creating new and mysterious diseases.

If that's all you learn from this book, you are already smarter than the 50,000,000 democrats that voted for Hillary, and smarter than the 50,000,000 republicans that voted for Trump.

It's that simple.

That's because not one of those 100,000,000 people is smart enough to stand up against the propaganda machine that dumbs them down and makes them argue about things that don't matter, like, 'who is taller?', democrats or republicans? ...instead of uniting as one people in a common humanity to stop war, to stop hunger, to stop disease, to stop junk food, to stop homelessness, to save the animals ...the minds of 100,000,000 people are junk food. Want some?

Instead, these mind control robots argue about Trump's income taxes, or about Hillary's body double, or Obama's pension.

The bible says, "These things ye should have done, and not left the others, undone."

Stopping nuclear energy is one of the things you can do, and should do, to save the animals.

Either you will undo nuclear energy; or nuclear energy will undo you.

Because, *you* are an animal, too!

## 3. Grown-ups suck

Look at it this way, only the kids care enough about saving the animals to see that grown-ups refuse to blame the fallout from Fukushima in the sky and ocean and water for destroying living things in the Pacific Ocean, and for making the milk too radioactive and unsafe to drink across the U.S.A., and for poisoning the water across the U.S.A. ...and, the food, too.

Those same grown-ups fail to see the danger in this country from all the nuclear energy reactors.

It looks more and more like humanity will first destroy the animals, and then, since humanity are animals, will destroy itself.

In the U.S., epidemiologists (the people who study the spread of diseases), figure 20,000 people have died from in the U.S. from fallout from Fukushima, Japan.

No one thinks about the animals.

I think another 20,000 mammals have died. And 20,000 others.

When the governments tested nuclear weapons in the sky, called *atmospheric testing*, they said only one million people died. But, today, scientists and epidemiologists decided to count the health affects of sustained low level

radiation. And, they have come up with a new death toll: 60,000,000 dead from fallout, and 120,000,000 cancers. And, counting.

No one thinks about the animals.

I think another 60,000,000 mammals have died, too. And 120,000,000 have gotten cancer.

What about other animals that are not mammals, that do not have mammary glands, and do not nurse their young ...the snakes, fish, shellfish, clams, lobsters, salmon, tuna, birds, bees, butterflies ...I think in each species they too have suffered 60,000,000 deaths and 120,000,000 cancers ...many times over.

## 4.

### Death on the installment plan -- for girls

Epidemiologists in the United States report a 25-mile zone around nuclear reactors, wherein normal day-to-day operations, there is a higher cancer rate, more-so with women, girls, pregnant women, babies and in uteri life, than with men and boys.

#### Review of the literature

Exhibit No. 1

07:11 PM Oct 26, 2011 | 110

-1615- Top U.S. nuclear official bursts into laughter after question on deaths of Fukushima workers (VIDEO)

Exhibit No. 2

07:04 AM Jan 13, 2012 | 49

-2250- Bed, Bath & Beyond pulls radioactive tissue boxes from stores - Cobalt-60 detected

Tissue holders pulled from stores in NY, elsewhere, AP, Jan. 12, 2012:

Metal tissue holders contaminated with low levels of radioactive material may have been distributed to Bed, Bath & Beyond stores.

Nuclear Regulatory Commission spokesman David McIntyre said that someone keeping one of the boxes on a vanity in the bathroom and spending about 30 minutes a day near it for a year would receive the equivalent of a couple of chest x-rays.

The products were shipped from India. The Nassau County Department of Health, where two of the boxes were shipped to the retailer's stores, said the items were removed and taken to a "safe location." The county Health Commissioner reiterated that the boxes posed "no imminent public threat."

Authorities said the tissue holders contain manmade cobalt-60.

# 5. Extreme nuclear danger

## Review of the literature

February 02, 2017

**Abstract:** <>Nuclear power can be shut down by enforcing the regulations we have. But, the five Nuclear Regulatory Commission (NRC) commissioners are political appointees vetted by the Nuclear Energy Institute (NEI), a pro-nuclear lobby.<sup>a</sup> They have *sold out*.

<>Trump wants to build, buy and sell, 'American'. But, nuclear power plants are now made in China, South Korea, and Japan in modular sections, then shipped to and assembled in other countries. The logo of an American company on a nuclear reactor does not mean American jobs are being created: Westinghouse is owned by Toshiba; General Electric is owned by Hitachi; Toshiba and Hitachi are Japanese companies, in Japan.

<>We are not at all energy independent if we have nuclear power; 'American' uranium mines are owned by Russian companies; 20 percent of uranium running American nuclear power facilities comes from America,<sup>b</sup> 80 percent comes from Russia, Australia and Canada.

## Review of the literature

December 7, 2016

### **Arnie Gundersen and Grayson Webb on CCTV<sup>c</sup>**

**Abstract:** It's a nuclear consortia. The American names are General Electric and Westinghouse. General Electric is owned by Hitachi, and Westinghouse by Toshiba (two Japanese firms).

- When they come to Congress they look like American companies ...but the components are made in Japan, South Korea & China.
- You hear it's expensive but good for American jobs, *that's not true*.
- All that work is going to Japan, Korea and China.
- What are they? ...international consortia lining up for trillions of dollars in handouts from Congress.
- Rick Perry runs the U.S. Department of Energy. *Perry has backers who want to build a waste dump in Texas.*

### Review of the literature

June 14, 2017

**Abstract:** "Energy Secretary Rick Perry is cooking up a case to stifle further federal support of renewable wind and solar energy.

He's ordered a dubiously sourced staff study that is aimed to paint renewables as an unreliable source for the nation's electric grid.

"The study, due June 23, seeks to determine if federal tax and subsidy policies favoring renewable energy have burdened 'baseload' coal-fired generation, putting power grid reliability at risk. It is spearheaded by Energy Department political appointee Travis Fisher, associated with a Washington policy group that opposes government aid for renewable energy.

"Fisher wrote a 2015 report for Institute for Energy Research that called clean energy policies **'the single greatest emerging threat to the nation's electric power grid, and a greater threat to electric reliability than cyber-attacks, terrorism or extreme weather.'**

"A letter from Advanced Energy Economy, American Wind Energy Association and Solar Energy Industries Association disputes the Administration's premise: 'Policies supporting deployment of these technologies do not play an important role in decline of coal and nuclear plants. Studies demonstrate low natural gas prices and stagnant load growth are the factors behind retirements in coal and nuclear plants.'"

<sup>c</sup> (L) Global cumulative deposition of radiocesium (134Cs and 137Cs) after Fukushima NPP accident at end of 2011. (R) Annual effective dose from radiocesium exposure due to inhalation, surface deposition and fallout transport.

*Global and local cancer risks after the Fukushima Nuclear Power Plant accident as seen from Chernobyl: A modeling study for radiocesium (134Cs & 137Cs)*, Nov. 29, 2013: ... The highest deposition was found in the pixel of Fukushima (in the range of MBq/m<sup>2</sup>), where deposition exceeded the contamination limit affecting an area with more than 9 million inhabitants. In the West USA the deposition was found between 100 and 500 Bq/m<sup>2</sup> decreasing to the East. For the South-west USA, Wetherbee et al. (2012) reported that the deposition of 137Cs was 30-240 Bq/m<sup>2</sup> and 2-46 Bq/m<sup>2</sup> for 134Cs, which is in the same order as in our calculations (Fig. 1). The same investigators reported a deposition of 137Cs in Alaska to be 16-27 Bq/m<sup>2</sup> and around 55 Bq/m<sup>2</sup> for 134Cs similar to those presented here (50-100 Bq/m<sup>2</sup>). In the rest of the US they measured 137Cs between 1 and 45 Bq/m<sup>2</sup> and 134Cs between 1 and 3 Bq/m<sup>2</sup>, which are close to ours (50- 200 Bq/m<sup>2</sup>) - According to the French Institute of Radioprotection and Nuclear Safety (IRSN, 2012) approximately 73 radionuclides were released after Fukushima. Therefore, one

Fukushima. Only radiocesium studied instead of 73 radionuclides emitted

-7024- Scientist Marco Kaltofen found areas with considerably higher radiocesium deposition than 500 Bq/m<sup>2</sup>-<sup>a</sup>. University Researcher: Portland-area topsoil with up to 8,000 pCi/kg of cesium from Fukushima -- 10,000% higher than highest levels found by UC Berkeley

-708- Fukushima health study: 100 mSv/yr okay for pregnant moms - Effects of radiation do not come to happy people -

they come to people that are weak-spirited  
- Soviets required mandatory evacuation at Chernobyl at 5 millisieverts.

## A nightingale without a song to sing

One day, minding my own business surfing the net on youtube, innocent of the subject matter of this book as a jaybird on a telephone pole squawking, I stumbled upon a video. It documented a journey with a dog along thousands of miles of British Columbia coastline and neighboring islands.

That coastline is beautifully covered with tide pools and teeming life, perhaps the most beautiful coastline in the world according to tourists and divers -- purple, red, yellow, green and blue creatures, starfish, sea urchins, sea anemones, seaweeds swaying gently in currents, oysters and shellfish nested in layers, stacked beside, atop one another in a shoreline rainbow of living sea, as had thrilled many a child, adult and dog.

The only problem: those pictures were taken before March 2011.

-6189.1,.2 Testimonies of people living near the Three Mile Island nuclear plant at the time of the accident in 1979 - *Mechanic who lived about four miles from the nuclear accident*: My eyes were red and burning. I felt like I was looking through water. On Friday, we decided to evacuate. While packing our truck, a township police officer in a closed car shouted over his loudspeaker system,

'Bill, don't breathe this air. Get inside.' ... When we returned home, we went in the garage first and found our male German shepherd had died. His eyes were milky white. We had provided about 100 pounds of food and 50 gallons of water. However, he had only drunk water before he died. We had five cats that lived in a box on the back porch. All but one was dead. All the cats had milky white eyes. The one living cat had one eye that was milky white. Skin grew over this eye during the following weeks. This cat lived about six months after the accident. She had kittens prior to her death. The kittens were born dead and hairless.

Utah - Idaho: 20-30 Bald Eagles suffer seizures, head tremors & paralysis -6866- LA Times: Experts suggest bald eagle deaths are related to Fukushima radiation -

### **A little denial goes a long way**

Some swore it was airborne and seaborne nuclear fallout from Fukushima Dai-ichi reactor explosions and meltdowns ...that the mainstream news denied even happened, as did the operator, Tokyo Electric Power Company (TEPCO).

Wait a minute, hadn't I heard something about that four years before? ...the tsunami ...the offshore earthquake that flooded Japan and the reactor at Fukushima Dai-ichi ...that was ancient history.

But, here was the absence of krill causing whales to starve, absence of feeder fish, no herring causing dolphins and sea lions and seals and pelicans to starve ...the growing absence of tuna and salmon from Alaska to Mexico ...and, Pacific sea life dying from mysterious diseases.

### **Sea stars decimated on West Coast**

02:21 PM Apr 5, 2014 | 159

-8145- Sea stars decimated on West Coast - SoCal ravaged as mystery disease spreads south; hundreds last year, now none - mortality event like this never before documented - uncharted waters - likes of which we haven't seen - turn to bacterial goop (RADIO)

12:28 PM Jan 30, 2014 | 214

-7030- West Coast sea stars rip themselves apart - innards spill out - melt into mush - vaporize (VIDEO)

### **Sea star epidemic on West Coast - Sea urchins, sea cucumbers affected**

05:12 PM Dec 30, 2013 | 118

-6867- Researcher: Fukushima pollution may be causing sea star epidemic on West Coast - Sea urchins, sea cucumbers also affected - Something's making them susceptible... It's unlike anything we've seen... Populations go locally extinct overnight

02:05 AM Dec 28, 2013 | 72

Sea stars turning to goo along West Coast - absorb 1000 times more plutonium than fish

-6856- Fukushima can't be excluded as factor in sea stars turning to goo along West Coast; hasn't been ruled out - proficient at absorbing radioisotopes; 1,000x more plutonium than fish (AUDIO)

07:34 PM Dec 27, 2013 | 70

-6855- Ocean currents spread Fukushima contamination across world - 4,000 miles away: radiation in seafood imports increase noticeably; time for stakeholders to be on alert (AUDIO)

**Sea stars turning to goo along West Coast - absorb 1000 times more plutonium than fish**

02:05 AM Dec 28, 2013 | 72

-6856- Fukushima can't be excluded as factor in sea stars turning to goo along West Coast; hasn't been ruled out - proficient at absorbing radioisotopes; 1,000x more plutonium than fish (AUDIO)

**All sea stars on west coast could be wiped out - guts coming out**

08:59 PM Dec 12, 2013 | 87

-6805- Marine Biologist: All sea stars along west coast of North America could be wiped out - Some developing 'bald spots'; Others look completely healthy except for guts coming out - 'Speculation' it could be related to Fukushima

05:20 AM Dec 3, 2013 | 174

-6769- Sea star die-off worse than thought; Now over entire West Coast; Going from one species to others - Gov't tests 'rule out' Fukushima - melting all at once (VIDEO)

04:05 PM Nov 17, 2013 | 150

-6702- CBS News: 'Immense mystery' as sea stars being wiped out along West Coast, could be gone for generations - Bewildering disease is spreading and no idea what's causing it, or how to stop it - Time-lapse shows all legs lost in 7 hours (VIDEOS)

12:46 PM Dec 9, 2013 | 76

-6792- Fukushima radiation possible culprit in huge starfish die off from Mexico to Alaska - Potential catastrophe, extremely virulent going on up and down coast... going to change what's out there pretty fundamentally

**Sea star breaks in half, walks away then turns to goo**

10:42 AM Nov 12, 2013 | 41

-6679- Hundreds wash up dead in Seattle. Don't know how the pathogen is doing this - Sea star broke in half, walked away, then turned to goo - 'Environmental factors' to blame? - (VIDEO)

04:05 AM Dec 1, 2013 | 162

-6762- NBC Nightly News: Another highly troubling report about what's going on in the Pacific - Millions of starfish 'melt away' from Alaska to California - Expert: Fukushima radiation 'not ruled out' as factor in epidemic - different than anything seen before (VIDEO)

**Starfish**

05:50 PM Nov 7, 2013 | 82

-6665- Mystery: starfish turn to 'slime' along Pacific coast - loss of millions and millions - Innards become exposed and fall apart - cases balloon in Alaska (VIDEO)

**Sea star rips itself into pieces**

09:05 PM Nov 4, 2013 | 67

-6649- PHOTOS: Sea star rips itself into pieces - Like a horror movie - AP: Deaths from Alaska to S. California - Biologist: Related to an environmental change? An early warning that we aren't picking up on? - Professor: None of us had ever seen anything like this before

-6649.1- Seattle TV: Warning, video of the (melting) sea stars might be disturbing - Scientists are so concerned about rapidly spreading die off on West Coast - Doubled in just a few days - Jellyfish numbers booming Nov 2, 2013

-6649.2- CBS News: 'Immense mystery' as sea stars being wiped out along West Coast, could be gone for generations - bewildering disease is spreading and no idea what's causing it, or how to stop it - Time-lapse shows all legs lost in 7 hours (VIDEOS) Nov 17, 2013

-6649.3- Reports: Sea stars decimated on West Coast - SoCal ravaged as mystery disease spreads south; saw hundreds last

year, now none - got hit really hard - mortality event like this never before documented - turning to 'bacterial goop' (RADIO) Apr 5, 2014

-6649.4- UC Berkeley Professor: California seeing Fukushima fallout won't be a surprise - 'Especially concerned' after radioactive leaks at plant were admitted - not terribly confident in information Japan is sharing Jan 19, 2014

-6649.5- NBC Nightly News: Another highly troubling report - what's going on in the Pacific - Millions of starfish 'melt away' from Alaska to California - Fukushima radiation 'not ruled out' as factor in epidemic - very different than anything seen before (VIDEO) Dec 1, 2013

#### **Starfish melting**

10:39 PM Nov 2, 2013 | 18

-6635- Seattle TV: Warning, video of (melting) sea stars disturbing - rapidly spreading die off on West Coast - doubled in just a few days - Jellyfish numbers booming

#### **Starfish suffer as a species**

03:13 PM Nov 2, 2013 | 84

-6632- Starfish population - Orange County to Alaska - eat each other then melt - similar on East Coast since 2011 - (VIDEO)

#### **Melting sea stars - 60% of species sick or dying**

07:22 AM Oct 27, 2013 | 36

-6605- TV: Like they're melting... a lot of melting sea stars out there says Seattle biologist - Veterinarian: It's concerning, in under a week roughly 60% of species are sick or dying - Same thing happening near Canada and nobody's sure why (VIDEO)

#### **Starfish epidemic moving fast**

02:06 PM Oct 14, 2013 | 54

-6545- Starfish epidemic moving fast - Turn into 'goo' in Washington, not just Canada - **Virus, bacteria or something else entirely? Will it spread to other sea life and other parts of West Coast?** (AUDIO)

#### **Starfish die-off Canada, California**

04:15 PM Oct 7, 2013 | 75

-6508- Alarming mass die-off of starfish in areas along Canada's Pacific coast - They've disintegrated, now there's just goo left - Appeared to melt - Single arms clinging to rock faces, tube feet still moving - Similar reports as far away as California (VIDEO)

02:59 PM Oct 7, 2013 | 56

-6507- Canada TV: New concerns about radiation levels in fish from Pacific - These numbers are just staggering - Contamination up considerably - It's a major event worldwide (VIDEO)

#### **Sea Urchins, starfish, abalone, mollusks graveyard**

10:54 AM May 12, 2014 | 152

-8227- **50 miles of California coast a graveyard, summer 2011 - abalone, urchins, starfish, other mollusks-** <sup>a</sup> - <sup>a</sup> - alterations in 30 genes, some unknown - kills wildlife (PHOTO <sup>a</sup>)

07:35 PM Dec 9, 2013 | 61

-6794- Weird things happening on California coast: Previously unknown toxic algae blooms proliferating; Unprecedented mass of oxygen-poor water near shore - mystery strandings of large squid covered miles (VIDEO)

04:06 PM Dec 9, 2013 | 141

-6793- Plutonium in water leaking into ocean is the most dangerous thing at Fukushima, it can be carried around world and end up on a beach or in fish - Researcher: Plutonium contamination a serious threat to environment and human health (AUDIO)

12:46 PM Dec 9, 2013 | 76

-6792- Fukushima radiation possible culprit in huge starfish die off from Mexico to Alaska - Potential catastrophe, extremely virulent going on up and down coast... going to change what's out there pretty fundamentally

10:48 AM Dec 9, 2013 | 142

-6791- Plutonium from Fukushima in New Mexico desert - Local and regional contaminations of plutonium in environment have resulted from nuclear accident

07:10 PM Dec 8, 2013 | 107

-6790- Report reveals highest level of radioactive xenon-133 to hit Canada after Fukushima over 6,000% more than gov't website claims

### **Starfish**

-8403- TV: Starfish on Pacific coast - babies die so quickly - just disappear-change in seawater could have activated deadly pathogen - ecosystem changes now appearing (VIDEO)

12:18 PM Sep 2, 2014 | 158

-8402- Fukushima forecast used by Gov't shows nuclear waste crossing ocean in single massive cluster - maximum concentration propagates eastward in Pacific toward U.S. - Highest levels worldwide remain along coast of N. America thru 2026 (VIDEO)

01:48 PM Aug 27, 2014 | 150

-8392- Japan Models show North America hit with very high levels from Fukushima plume - Radioactive material in ocean off West Coast 500x more than expected (VIDEO)

09:26 AM Dec 12, 2013 | 106

-6802- CNN: The Pacific has seen its fair share of weird recently - Bay in California now a massive soup bowl - Miles of anchovies, mountains deep - It's like none ever recorded (VIDEO)

### **Shellfish**

12:59 PM Feb 8, 2015 | 269

-8560- Shellfish disappear on west coast - systemic crisis - finding Pacific shellfish next to impossible - no local scallops, supply gone - began a few months ago, oyster farms flourishing for years all of a sudden had to shut down (VIDEOS)

### **Squid, oyster, sardine, mackerel, birds, pelican, sea lions, whales, mammals, fish - sick or missing**

03:23 AM Jun 17, 2014 | 138

-8287- Southern. California - Haven't seen a squid, usually 10,000 lbs/day - crashes at oyster hatcheries - sardines, mackerel missing in areas - pelican sites deserted -

sick sea lions - ultra-rare whales appear after decades - mammals, birds, fish in odd places

### **Mussels, clams, oysters**

07:01 PM Apr 1, 2014 | 96

-8134- High concentrations of Fukushima cesium in Vancouver area - ocean currents slow down - Levels are increasing - hotspots where radiation concentrates - chances are high for marine life to absorb it... concern about mussels, clams, oysters (AUDIO)

### **Oyster, scallop, shellfish die-offs**

11:50 PM Feb 28, 2014 | 115

-8047- Pacific Northwest: Die-off of oysters and scallops, millions of shellfish, deformed shells, smaller in size - July mortality hit 95 to 100 percent (AUDIO)

09:32 AM Jan 22, 2012 | 45

-2347- Oysters grow at double speed in North Japan - Rafts would have sunk from weight of oysters

11:05 AM Aug 18, 2015 | 520

-8700- Official: Thousands of millions of fish wash up dead in Alaska - Piles of them... I have never seen anything like it... First time we've ever heard of this (VIDEO)

06:07 PM Aug 25, 2015 | 544

-8701.C- [editor's note: duplicate number error -8701- renamed --8701.C- ] Southern California coast: Fukushima nuclear waste detected - highest levels in North America since testing program began - 8.4 Bq/m3 of radioactive cesium measured near beach between Los Angeles and San Diego (VIDEO & MAP)

07:52 AM Aug 24, 2015 | 266

8701.A- [editor's note: duplicate number error -8702- renamed -8701.A- ] Horrific environmental mystery... Everyone's freaked out: 1,500% normal death rate in whales off West Coast - Gov't declares unprecedented Unusual Mortality Event - Scientists alarmed, no idea what's happening - Expert: it's all going to cascade up to us - Other die-offs being reported (VIDEOS)

10:23 AM Aug 20, 2015 | 888

-8701- Scientists stunned as 3 rare giant oarfish found dead off Los Angeles in recent weeks - Flesh falling apart while still alive, body parts missing - Biologist: Of course I'm very concerned... for some reason they're dying... it's very strange - Being tested for toxins (VIDEO)

#### **Seafloor covered with dead fish**

11:59 PM Jun 2, 2015 | 348

-8647- TV: Scientists warning of mass die-off along California coast - Official: Seafloor littered with dead fish, washing up as far as I could see - Toxin has spread all up and down West Coast - (VIDEO)

11:45 AM May 21, 2015 | 395

-8637- Pacific Northwest: Deadly black fungus being found on fish - Gov't: There was some concern Fukushima radiation could be involved - Biologists investigating how this land-based mold is now appearing in ocean -reports of unusual rotting sores, growths, bumps, cancer (PHOTOS)

11:09 AM Jul 29, 2014 | 137

-8339- Millions of jellyfish-like creatures wash up on Pacific beaches across multiple states - line entire Oregon Coast - seen for first time in a great many years - cover the sea surface... as far as we could see - thought to mix with ones from Japan (VIDEO & PICS)

10:29 AM Oct 19, 2013 | 146

-6568- Sailor: After we left Japan, it felt as if the ocean itself was dead - Nothing alive for over 3,000 miles - no longer saw turtles, dolphins, sharks, birds - saw one whale, it appeared helpless with big tumor on head

-6568.1- Similar reports about wildlife around the Pacific Rim, include: sardines -- seals --- sea lions --- polar bears --- sea stars --- turtles --- salmon --- herring --- coral and more.

-6568.2- 150 dolphins wash ashore at multiple locations - 50 miles from Fukushima border - Could be largest mass stranding ever reported in nation's history - Gov't Expert: Dolphins may have had

psychological problems. We don't see any immediate signs of cancer (VIDEO) Apr 11, 2015

-6568.3- Nuclear material came off unused fuel assembly removed from Fukushima Unit 4 pool - Cobalt-60 at 1,400,000,000 Bq/kg - Debris felt like grit (PHOTOS) Mar26, 2013

-6568.4- Am I upset about Fukushima poisoning the Pacific Ocean? Yeah - Am I upset about Tepco & Japan's gov't lying through their teeth? Yeah Feb 4, 2014

-6568.5- see: Video: Fukushima birds unable to fly Jan 5, 2012

-6568.6- Japan Doctor: Tokyo should no longer be inhabited - Everyone here is a victim of Fukushima - People truly suffering - Bleeding under skin, urinary hemorrhaging - children's blood tests started changing last year - Time running short - up to physicians to save our citizens and future generations Jul 17, 2014

#### **Sea stars, sea otters**

03:38 PM Oct 9, 2013 | 40

-6520- Vancouver Aquarium Blog: Area with 'rivers' of body parts from sea stars - 'Strange behavior' reported in sea otters (VIDEO)

#### **Marine mammal strandings & baby deaths**

12:58 PM Feb 5, 2015 | 658

-8558- Marine mammal strandings shatter records on West Coast - 10x worse than they've ever seen before - Expert: 3 years of babies have crashed & burned... doesn't make sense that they're fine, then all of a sudden 3 years in a row, they're not (VIDEO)

#### **Animals on sea floor looking sick or dead - everything's dying**

12:59 PM Nov 18, 2014 | 359

-8502- West Coast Scientists: Many animals on sea floor looking sick or dead - Everything's dying... Dead, dead, dead, and dead - Experts investigate what's killing sea urchins and cucumbers in Pacific Northwest - Seeing things never previously observed (PHOTOS)

There were several videos: some showed three blown-up Fukushima Dai-ichi reactors.

05:56 AM Sep 27, 2011 | 15

-1415- Plutonium evaporates - spreads as gas, after Fukushima meltdowns

And, at the same time TEPCO video news footage testified to normal reactor operations conducted by normal work crews in clean and crisp work clothes... as if the reactors hadn't blown up and melted down, at all.

Back in the days before you'd be understood saying, 'TEPCO is *fake news*', we called *fake news* what it was: propaganda, misinformation, disinformation, brainwashing, actual tactics of psychological warfare to destroy harmony.

Watching the videos and seeing the pictures of Fukushima Dai-ichi reactors all blown up and melted down, and TEPCO pictures showing there had been no blowing up, no melting down, and no damage ...to speak of, was hard to grasp.

### **Mainstream news today-- in total denial or sell-outs?**

Up to and following the Trump inauguration, the 'system' continues to blame the lesions, tumors, bleeding eyes and rotting flesh, death and near extinction-levels of sea species, on what hiding behind a stupid grin they call, *new and mysterious diseases caused by global warming*.<sup>a</sup>

### **Editor's note: 'New and mysterious diseases'**

07:26 AM Apr 25, 2016 | 98

-8809- Dead animals litter California beaches - graveyard of washed-up sea life - malnourished sea creatures - starving to death - Covered in sores - stunted growth - Weak immune systems (PHOTO & VIDEOS)

10:15 PM Mar 1, 2017 | 390

-8852- Mysterious cancer kills sea lions along West Coast - Bones turn to mush - Inside, masses of yellow, cancerous tissue - die at alarming rates (VIDEO)

05:01 PM Feb 25, 2017 | 81

-8849- Officials warn mysterious radioactive cloud spreads - Authorities 'baffled' over release - could be leak from nuclear plant

---

<sup>a</sup> Global warning and global cooling cycles: <https://youtu.be/vIdTHFujDnI>

02:13 PM Feb 20, 2017 | 7

-8846- 'Mystery': Radiation spikes detected in many countries - U.S. military secretly deploys 'nuclear sniffer' aircraft - Radioactivity levels quadruple - Iodine-131 proves recent release - origin unknown"

05:10 PM Feb 5, 2017

-8841- Record whale deaths in Hawaii - throughout islands in Pacific - Sick and starving mystery to experts - "Possible health effects" from Fukushima radiation off coast (VIDEO)

02:24 PM Jan 29, 2017

-8834- Gov't declares "disaster" over diseased and dying fish on US West Coast — "Sudden, unexpected large decreases" in population — Scientists "mystified... stumped" — Officials: "Environmental disaster... Devastating... Alarming... Dire" (VIDEO)

8736- Seaborne West Coast: **Fukushima nuclear waste off shoreline of California, Oregon, Washington, and Alaska - Highest radiation off San Francisco** (MAP-a)

-8736.1- Fukushima nuclear waste detected along Southern California coast - Highest levels seen anywhere in North America since testing program began - 8.4 Bq/m<sup>3</sup> of radioactive cesium measured near beach between Los Angeles and San Diego (VIDEO & MAP) Aug, 2015

-8736.2- Scientists detect Fukushima radiation on North American shores - Coastal communities 'concerned' - Over 7 Bq/m<sup>3</sup> of cesium from dock in Pacific Northwest - Professor: It indicates arrival of other radioactive substances - Represents potential radiological health risk (VIDEO) Apr, 2015

-8736.3- Unprecedented': China bans all imports of shellfish from U.S. West Coast - Official: They've never done anything like that that I've ever seen - Includes Washington, Oregon, Alaska and N. California - Gov't says it will continue indefinitely (AUDIO) Dec 13, 2013

-8736.4- TV: Billions of mysterious creatures dead along West Coast - Literally covering all of Oregon coast - Washing up from California to Alaska - Expert: Death totals are staggering, it's got to be billions (VIDEO) May 3, 2015

-8736.5- Spike in radiation levels for West Coast? Abnormal readings on 8 of 18 EPA monitors for California, Oregon, Washington - Devices now undergoing quality review Mar 22, 2011

-8736.6- Twice as much Fukushima radiation near California coast than originally reported; Highest levels found anywhere in Eastern Pacific - Scientist: Very little we can do... It's unprecedented... God forbid anything else happens - Gundersen: Multiple plumes now along west coast... Will be coming for century or more (AUDIO) Nov 20, 2014

-8736.7- BREAKING: Fukushima nuclear waste detected along Southern California coast - Highest levels seen in North America since testing program began - 8.4 Bq/m<sup>3</sup> of radioactive cesium measured near beach between Los Angeles and San Diego (VIDEO & MAP) Aug 25, 2015

07:52 AM Aug 24, 2015 | 266

-8702- Horrific environmental mystery... Everyone's freaked out: 1,500% normal death rate in whales off West Coast - Gov't declares unprecedented Unusual Mortality Event - Scientists alarmed, no idea what's happening - Expert: it's all going to cascade up to us - Other die-offs being reported (VIDEOS)

09:40 PM Jul 20, 2015 | 206

-8681- TV: Mystery green goo decimating fishing on West Coast - Like ectoplasm in Ghostbusters - Experts: About as severe as we could ever anticipate... Lot of unusual things going on - we're not catching any fish... Never as bad as right now... Almost non-existent... Worst season ever (PHOTO)

11:17 PM Jul 12, 2015 | 129

-8675- U.S. scientists test for radiation in dead whales as Mysterious die-off in Pacific continues - 14 carcasses reported - death toll could rise - may have consumed something toxic (VIDEO)

09:04 AM May 3, 2015 | 233

-8623- TV: Billions of Mysterious creatures dead along West Coast - Literally covering all of Oregon coast - Washing up from California to Alaska - Expert: Death totals are staggering, it's got to be billions (VIDEO)

**Alaska polar bears suffering lesions, seals sores**

-8591- Mysterious affliction in Alaska - polar bears suffer baldness and lesions; spikes 1,000% after Fukushima began - Gov't: Ongoing reports of unusual number of hairless seals with sores - Seals continue to be reported with hair loss... it makes U.S. nervous (PHOTO)

05:22 PM Feb 22, 2015 | 227

-8574- Bizarre, milky rain falls for days by most contaminated nuclear site in U.S. - Expert: I've never seen anything like it - Very unusual for our area - Nuke lab didn't collect enough to analyze... never planned to do real study on mystery material - NOAA contaminates sample, then loses it (VIDEO)

02:21 PM Jan 13, 2015 | 332

Sick marine mammal surge on California coast

-8536- Mysterious surge in sick marine mammals all along California coast - **Infested with parasites, emaciated; ill...** in very bad shape - Experts: we're extremely concerned right now - Deaths up 1,500% at

rescue facility - Number mystifies officials (VIDEOS)

08:14 AM Nov 4, 2014 | 146

-8486- Mysterious Phenomena off U.S. West Coast: Fish disappeared, whales nearly absent, no krill, high rates of egg failure among birds - California Fishermen: There's almost nothing there, just a lot of warm clear water

01:06 AM Sep 26, 2014 | 261

-8436- We found mystery Fukushima plutonium; Why it's there is yet to be understood, this was not expected - U.S. Gov't Expert: I don't want to go down the rabbit hole too far... There's speculation about plutonium fuel and about what other fuel they were using (VIDEO)

09:00 AM Sep 10, 2014 | 180

-8413- Head Scientist: I used to think I knew why mystery epidemic is decimating millions of West Coast starfish, but now I don't - toxic pollution suspected - Fukushima not dismissed as cause - California Professor: Significant levels of fallout got into our coastal food web

**Sea lions dying from organs falling out of place, tumors**

08:20 PM Sep 6, 2014 | 352

-8408- California sea lions dying from organs falling out of place, tumors, accumulation of puss inside bodies (PHOTOS) Marine mammal deaths reported by The Marine Mammal Center (Sausalito, Calif) since June 2014 (domoic acid-related deaths excluded):

(12) Abscess: Collection of pus in tissue of t body

(1) Carcinoma: Cancer that begins when altered or damaged DNA occurs so that cells become transformed, and begin to exhibit abnormal malignant properties.

(1) Cardiomyopathy: Heart muscle disease - deterioration of the heart muscle, usually leads to heart failure

(1) Coccidioidomycosis: Fungal disease - serious complications may occur in patients with weakened immune systems

(2) Disseminated Intravascular Coagulation: Blood clots [that can] lead to multiple organ

damage - clotting is disrupted - severe bleeding can occur

(7) Neoplasia: Commonly referred to as a tumor - malignant neoplasm is a cancer

(6) Otostrongylus: Lungworms in lungs or heart of seals

(3) Peritonitis: Inflammation of tissue lining inner wall of abdomen - may result from infection (often due to rupture of a hollow organ)

(4) Pneumonia: Inflammatory condition of the lung

(6) Prolapse: Latin for to fall out - organs, such as the uterus, fall down or slip out of place - organs protruding through vagina or rectum

(3) Pyothorax: Accumulation of pus in the pleural cavity

(2) Renal Failure: Kidneys fail to adequately filter waste products from the blood

(5) Septicemia: Potentially fatal whole-body inflammation caused by severe infection

-8408.1- CBS San Francisco: Record number of sick seals & sea lions - large pockets of green and yellow puss all over body (PHOTO & VIDEOS) Apr 20, 2014

-8408.2- Federal gov't declares Unusual Mortality Event in So. California - 70% of all newborn sea lions may be dying - Testing for toxins, infectious agents (VIDEO) Mar 28, 2013

-8408.3- Alarm as record numbers of seals and sea lions 'starving to death' along California coast - calls coming nonstop - washing ashore May 4, 2014

-8408.4- NBC: Record level of sick or injured California seals and sea lions turning up - numbers are extraordinary - pups should be weighing 2x or 3x as much, severely malnourished (VIDEO) Apr 18, 2014

-8408.5- TV: Huge increase in dead and sick sea mammals on California coast - Unprecedented numbers, annual record broken in 7 months - starving, drooling, brain damaged, suffering seizures - Sea lions 'mysteriously' vanishing on other side of Pacific - Experts: We don't know what's happening (VIDEO) Aug 3, 2014

02:05 PM Aug 22, 2014 | 175

-8381- Time Magazine: Doctor links recent outbreaks of mysterious rashes to Fukushima - Cancer Specialist: There's so much societal pressure to not even mention the word radiation - Video: Huge number of cancers already... Gov't engaged in propaganda (VIDEO)

10:03 AM Jun 18, 2011 | 19

-771- Pasture grass contaminated with cesium above safety standard 200 km from Fukushima plant - Radiation levels over safety limits in many locations

12:29 AM Aug 15, 2014 | 356

-8368- Mystery illness hits California horses - nobody will even tell us what it is -**skin falls off, covered in painful lesions, eyes swollen shut, liver damage, fainting** - Never seen anything like it in 40-year career (PHOTOS & VIDEOS) - also, note similar condition of losing skin in marine mammals

01:26 PM May 6, 2015 | 417

Seals & walrus suffer

-8627- U.S. university tests animals in Pacific for Fukushima fallout - **bodies riddled with tumors, eyes bleed, covered in lesions - missing testicles, eyeballs - skin disintegrates, peels off, turns yellow - Mammals affected by diseases never seen in species** (Photos)

-8368.1- Biologist finds pink salmon canary yellow on Canada's Pacific coast - Insides yellow: Heart parts, gill arches, spines, cartilage in head - Spleens swollen, livers spotted, some with bugged-out eyes (PHOTOS) Oct 17, 2013

-8368.2- Sickened Alaska animals getting more tests for Fukushima radionuclides - Oozing sores, bleeding, swollen internal organs, hair loss (PHOTOS) Mar 14, 2013

01:26 PM May 6, 2015 | 417

-8368.3- U.S. university testing animals in Pacific for Fukushima radiation - Photos show bodies riddled with tumors, eyes bleeding, covered in lesions - Some are missing testicles, eyeballs - Skin disintegrating, peeling off, turning yellow - Mammals affected by diseases never seen in species (PHOTOS) May 6, 2015

-8368.4- Eye swelling a symptom of thyroid disorder - I often hear how children's eyes become swollen after being in radiation-contaminated sandboxes, says Japanese organizer... Remember the kitten? (VIDEO) Oct 31, 2011

-8368.5- 'Marine Mystery' in California: Toxic outbreak threatening marine life - Birds falling from sky, sea lions convulsing - Worst they've ever seen - Toxin hits record level, almost 1,000% above gov't limit - Heart lesions, severe shrinking in part of brain, nervous system failure (VIDEO) May 3, 2014

10:19 AM Aug 14, 2014 | 241

-8367- Fukushima radiation causes serious biological effects - irreversible major shifts in ecosystems - abnormality and mortality (PHOTOS)

-8368.5- 'Marine Mystery' in California: Toxic outbreak threatening marine life - Birds falling from sky, sea lions convulsing - Worst they've ever seen - Toxin hits record level, almost 1,000% above gov't limit - Heart lesions, severe shrinking in part of brain, nervous system failure (VIDEO) May 3, 2014

01:12 AM Aug 6, 2014 | 133

-8353- Alaska: New mystery disease much worse - could wreak havoc **from Alaska to Mexico** (VIDEO)

-8073- Fukushima: Plutonium, Uranium-236, Curium discharged into environment in form of fine particles **I would say they're much more an ingestion hazard. And that usually tends to target children and agricultural workers- A child on average consumes between 100 and 200 milligrams of soil a day because of hand-to-mouth activity ... something to think about.** (PHOTO)

Environmental Science & Technology (ACS Publications), March 6, 2014: *Isotopic compositions of <sup>236</sup>U and Pu isotopes in Black Substances collected from roadsides in Fukushima Prefecture: fallout from the Fukushima Dai-ichi Nuclear Power Plant accident* - Black colored road dusts were

collected in high radiation areas in Fukushima Prefecture. Measurement of <sup>236</sup>U and Pu isotopes and <sup>134</sup>,<sup>137</sup>Cs in samples was performed in order to confirm whether refractory elements such as U and Pu from the fuel core were discharged. The concentrations of <sup>134</sup>,<sup>137</sup>Cs in all samples were exceptionally high, ranging from 0.43 to 17.7 MBq/kg, respectively. <sup>239</sup>+<sup>240</sup>Pu was detected at low levels, ranging from 0.18 to 1.14 Bq/kg and with high <sup>238</sup>Pu/<sup>239</sup>+<sup>240</sup>Pu activity ratios of 1.64 to 2.64. <sup>236</sup>U was successfully determined in the range 0.28 to 6.74 x10<sup>-4</sup> Bq/kg. The observed activity ratios for <sup>236</sup>U/<sup>239</sup>+<sup>240</sup>Pu were in reasonable agreement with those calculated for the fuel core inventories, indicating that trace amounts of U from the fuel cores were released together with Pu isotopes, but without large fractionation. The quantities of U and <sup>239</sup>+<sup>240</sup>Pu, emitted to the atmosphere were estimated as 2.3x10<sup>9</sup> Bq (150 g) and 3.9x10<sup>6</sup> Bq (580 mg), respectively. fractionation between volatile and refractory radionuclides associated with the dispersal/deposition processes with distance from the FDNPP was found.

Environmental Radioactivity Journal, June 2014: *Isotopic Pu, Am and Cm signatures in environmental samples contaminated by the Fukushima Dai-ichi Nuclear Power Plant accident* - Dust samples from the sides of roads (black substances) have been collected together with litter and soil samples at more than 100 sites contaminated heavily in the 20-km exclusion zones around Fukushima Dai-ichi Nuclear Power Plant (FDNPP) (Minamisoma City, and Namie, Futaba and Okuma Towns), in Iitate Village located from 25 to 45 km northwest of the plant and in southern areas from the plant. Isotopes of Pu, Am and Cm have been measured in the samples to evaluate their total releases into the environment. When these activity ratios were compared with those for fuel core inventories in the FDNPP accident estimated by a group at JAEA, except <sup>239</sup>,<sup>240</sup>Pu/<sup>137</sup>Cs activity ratios, fairly good agreements were found, indicating that transuranic nuclides, probably in the forms of fine particles, were released into the environment without their large fractionations.

*Japan kids ingest pieces of Fukushima fuel rods? Mystery black substance very likely contains concentrated unburned nuclear fuel (VIDEO)*

*Marco Kaltofen, President at Boston Chemical Data Corp. & Doctoral student researcher at Worcester Polytechnic Institute: We kept hearing reports about something unusual, a black dust we finally got a very small sample of that*

What's different about this material is unlike a lot of the soil and dust samples we've gotten, there's a real uniformity to this stuff. It's a single substance. It's not a mix of mineral particles and pieces of dead bugs and plant matter and dust particles. It's actually very homogenous and uniform when you look at it under the microscope. And it doesn't look like the surrounding soils. And it is much more intensely radioactive than any other soil or dust sample we've gotten from around Fukushima Daiichi. So this material is different. It's not a natural soil. There's something unusual happening with this stuff.

The sample had fairly high levels of radium 226. Now that's not a radioisotope that we hear as much about. The radium 226 has almost as much activity as the radioactive Cesium in the sample. Radium 226 is a degradation product of uranium and we can't really detect the uranium directly. And this tells me that this particle contains not only fission waste products from the reactor but very likely contains a concentrated unburned nuclear fuel. And that's unusual. This sample had by far the highest level of uranium daughters that we've seen in a dust or soil sample. We're actually seeing material that might well have come from inside a

failed fuel assembly. *Arnie Gundersen, Fairewinds' Chief Engineer: Okay. When I hear that, that's clear evidence that the containment was breached. The interesting thing to me is that when I hear black, I think of like algae or fungi or something like that. But you're saying this is not an organic substance. Is that right?*

*Kaltofen: No. It's not an organic substance. It's a mixture of very small particles and just the way they aggregate gives it the appearance of being black, but it's - it probably - I won't say optical illusion, but it's an optical effect of the size of the particles and the way they're joined together.*

*Gundersen: Are these particles light enough for people to ingest them or breathe them in?*

*Kaltofen: Well, certainly they could be ingested - right **now I would say they're much more an ingestion hazard. And that usually tends to target children and agricultural workers. A child on average consumes between 100 and 200 milligrams of soil a day because of hand-to-mouth activity. So that's something to really think about.***

-4883- NBC: Animals quietly falling sick and dying - near oil & gas drilling - Cows tails dropping off (PHOTO)

*In the midst of the domestic energy boom, livestock on farms near oil- and gas-drilling operations nationwide have been quietly falling sick and dying*

Earlier this year, Michelle Bamberger, an Ithaca veterinarian, and Robert Oswald, a professor of molecular medicine at Cornell's College of Veterinary Medicine, published the first (and, so far, only) peer-reviewed report to suggest a link between fracking and illness in food animals. The authors compiled case studies of twenty-four farmers in six shale-gas states whose livestock experienced neurological, reproductive and acute gastrointestinal problems. Exposed either accidentally or incidentally to fracking chemicals in the water or air, scores of animals have died. The death toll is insignificant when measured against the nation's livestock population (some 97 million beef cattle go to market each year), but environmental advocates believe these animals constitute an early warning.

In Louisiana, seventeen cows died after an hour's exposure to spilled fracking fluid. (Most likely cause of death: respiratory failure.) In north central Pennsylvania, 140 cattle were exposed to fracking wastewater when an impoundment was breached. Approximately seventy cows died; the remainder produced eleven calves, of which only three survived. In western Pennsylvania, an overflowing waste pit sent fracking chemicals into a pond and a pasture where pregnant cows grazed: half their calves were born dead.

Ever since a heater-treater unit, which separates oil, gas and brine, blew out on a drill pad a half-mile upwind of Jacki Schilke's North Dakota ranch, her own creek has been clogged with scummy growth, and it regularly burps up methane. No one can tell me what's going on, she says. But since the blowout, her creek has failed to freeze, despite temperatures of forty below. (Testing found sulfate levels of 4,000 parts per million: the EPA's health goal for sulfate is 250 parts per million.)

Schilke's troubles began in the summer of 2010, when a crew working at this site continued to force drilling fluid down a well that had sprung a leak. Soon, Schilke's cattle were limping, with swollen legs and infections. Cows quit producing milk for their calves; they lost from sixty to eighty pounds in a week; and their tails mysteriously dropped off.

humpback-whales-oregon-fear-whales-encountering-radiation-hot-spots-whale-watchi

New Mexico St. Univ., Mar 15, 2015 (emphasis added): *What's Killing Baja's Marine Animals?* **Dead gray whales and dolphins.** Corpses of **sea lions, birds and sea turtles** decomposing on the beach. Since the beginning of the year, the coasts of Baja California have been the scene of multiple discoveries of dead marine animals. The latest find was reported last week... **55 dead dolphins** and 4 sea lions... [The gov't will] probe the reasons for the **mysterious deaths.** In mid-January... **550 dead sea birds** and 4 dead sea lions near San Felipe. Another zone of mystery surrounds the Laguna Ojo de Liebre... where **150 dead, sea turtles** were discovered at the end of January. About two weeks earlier, **14 lifeless gray whales** (13 babies and 1 adult) and 16 dead, sea turtles were found in the same area... Mexican authorities hypothesized that sea turtles... could be succumbing to **hypothermia** [and] baby gray whales were dying from lack of nourishment... [They] **migrate to Baja California from northern Pacific** waters...

AP, Feb. 1, 2015: **Cold temperatures** are suspected of killing some 150 sea turtles found in a lagoon of Mexico's Baja California [the] environmental protection agency said [warm waters are blamed for record-setting deaths of California sea lions and West Coast sea birds ]... it would be difficult to determine the exact cause of death... **investigators also would try to determine whether some sort of contamination might have played a role.** In mid-January, federal inspectors found the bodies of 14 gray whales.

Fox News, Jan 15, 2015: Four sea lions and 550 birds found dead [in] Baja California probably died as a consequence of **climate change,** Mexico's Profepa Environmental Protection Agency said... Changes in the ocean water temperature are forcing schools of fish to swim deeper

NBC San Diego, Mar 20, 2015: A dead **gray whale** was found floating in the waters near

Torrey Pines State Beach Thursday morning, **San Diego** Lifeguard officials confirmed. The **young whale** [was] approximately 15 to 20 feet in length - *Reporter:* Because it does not look like it had anything to do with humans, **they believe** that maybe the **whale just got sick and died.**

California Gray Whale Coalition, Nov. 2014: The coast's winter whale watching season brings real **fear for visiting humpbacks and grey whales** encountering **radiation hot spots** along West Coast waters as they migrate to and from Alaska and **Mexico.** The central Oregon coast's whale watching training features more than 100 volunteers at 25 whale-watching sites... this year's **whale-watching volunteers** have been **trained in the dangers of radiation...** there has been a **rash of dead humpback whales** washing-up along central Oregon...

KION, Jul 3, 2014: A 35-foot-long humpback whale has washed up dead on a Central California beach... cause of death has not been determined. - *Reporter:* Researchers say the amount of whales found in distress this year is **significantly more than in previous years...** They usually only get 5 reports of entangled whales in an entire year. This year there have already been 8.

ABC San Francisco, May 22, 2014: *Dead Baby Humpback Whale Washes Ashore...* They're actually endangered, said Sue Pemberton with the California Academy of Sciences. So it's really important, **every single one that dies, it's important to know why** - unlocking the **mystery of why she died so young,** only half the size of a full-grown humpback. *Watch broadcasts:* *NBC San Diego, KION, ABC San Francisco, Press Democrat, Dec 25, 2016*

### Russians at it again

I read published abstracts of scientific research studies, written by Chernobyl scientists, and learned exposure to radionuclides causes bacteria and viruses to mutate, causing new and mysterious diseases.<sup>2</sup>

It took you less than ten seconds to read the previous sentence ...now, you know more than all the apologist bad science perps will ever admit.<sup>a</sup>

[[http://www.strahlentelex.de/Yablokov\\_Chernobyl\\_book.pdf](http://www.strahlentelex.de/Yablokov_Chernobyl_book.pdf) Published by New York Academy of Sciences, *Chernobyl: Consequences of the Catastrophe for People and the Environment*, written by scientists who used health data from 1986 to 2004; edited by Janet Sherman.<sup>3]</sup>

Here is an excerpt from *Chernobyl: Consequences of the Catastrophe for People and the Environment: Chapter 11. Chernobyl's Radioactive Impact on Microbial Biota*, by Alexey V. Yablokov:

[Abstract] Of the few microorganisms that have been studied, all underwent rapid changes in the areas heavily contaminated by Chernobyl. Organisms such as tuberculosis bacilli; hepatitis, herpes, and tobacco mosaic viruses; cytomegalovirus; and soil micromycetes and bacteria were activated in various ways. The ultimate long-term consequences for the Chernobyl microbiologic biota may be worse than what we know today. Compared to humans and other mammals, the profound changes that take place among these small live organisms with rapid reproductive turnover do not bode well for the health and survival of other species.

[Article] One gram of soil contains some 2,500,000,000 microorganisms (bacteria, micro-fungi, and protozoa). Up to 3 kg of the mass of an adult human body is made up of bacteria, viruses, and micro-fungi. In spite of the fact that these represent such important and fundamentally live ecosystems there are only scarce data on the various microbiological consequences of the Chernobyl catastrophe.

Several incidences of increased morbidity owing to certain infectious diseases may be due to increased virulence of microbial populations as a result of Chernobyl irradiation. ... ..

**All microorganisms (viruses, bacteria, fungi, and protozoa) and microbiological communities as a whole undergo rapid changes after any additional irradiation. The mechanism of such changes is well known: inclusion and increase in the frequency of mutations by natural selection and preservation of beneficial novel genes that for whatever reason appear more viable under the new conditions. This micro-evolutionary mechanism has been activated in all radioactively contaminated areas and leads to activation of old and the occurrence of new forms of viruses and bacteria.**

All but a few microorganisms that have been studied in Chernobyl-affected territories underwent rapid changes in heavily contaminated areas.

Our contemporary knowledge is too limited to understand even the main consequences of the inevitable radioactive-induced genetic changes among the myriad of viruses, bacteria, protozoa, and fungi that inhabit the intestines, lungs, blood, organs, and cells of human beings.

---

<sup>a</sup> 04:18 PM Aug 31, 2014 | 170

-8399- Pacific Ocean: Chunks missing from bodies of salmon from Pacific - lesions in over 50% of fish being reported - followed by bacterial invasions (PHOTO)

The strong association between carcinogenesis and viruses (papilloma virus, hepatitis virus, Helicobacter pylori, Epstein-Barr virus, Kaposi's sarcoma, and herpes virus) provides another reason why the cancer rate increased in areas contaminated by Chernobyl irradiation (for a review, see Sreelekha et al., 2003).

Not only cancer, but also many other illnesses are connected with viruses and bacteria. Radiologically induced pathologic changes in the microflora in humans can increase susceptibility to infections, inflammatory diseases of bacterial and viral origin (influenza, chronic intestinal diseases, pyelonephritis, cystitis, vaginitis, endocolitis, asthma, dermatitis, and ischemia), and various pathologies of pregnancy. The long-term consequences for microbial biota may be worse than what we understand today.

**Mussels, barnacles, limpet, rock shell, sea anemones mass die-off**

11:24 AM Feb 10, 2016 | 668

## 8. Sea lion species extinction?

### Review of the literature

#### Exhibit No. 7

-8408- Calif sea lions die as organs fall out of place, tumors, puss in bodies (PHOTOS) Marine mammal deaths reported by Marine Mammal Center (Sausalito, Calif) since June 2014 (domoic acid-related deaths excluded):

(12) Abscess: Pus in body tissue

(1) Carcinoma: Cancer begins when altered or damaged DNA occurs so cells transform, exhibit abnormal malignant properties.

(1) Cardiomyopathy: Heart muscle disease – deterioration, leads to heart failure

(1) Coccidioidomycosis: Fungal disease - complications w/weakened immune system

(2) Disseminated Intravascular Coagulation: Blood clots [that can] lead to multiple organ damage - clotting disrupted - severe bleeding

(7) Neoplasia: malignant tumor, a cancer

(6) Otostrongylus: Lungworms in lungs or heart of seals

(3) Peritonitis: Inflammation of tissue lining inner abdomen wall - may result from infection (often due to hollow organ rupture)

(4) Pneumonia: Inflammatory lung condition

(6) Prolapse: organs: uterus, fall or slip out of place - protrude through vagina or rectum

(3) Pyothorax: Accumulation of pus in pleural cavity

(2) Renal Failure: Kidneys fail to filter waste products from blood

(5) Septicemia: Potentially fatal whole-body inflammation caused by severe infection

# 9. Cry, baby

## Preface, Part 2

The problem with tackling a subject of this magnitude is any one of the 9,000 news stories I read about Fukushima Dai-Ichi and the nuclear energy industry is weighty enough for a book of its own. I have looked at recurring themes from 2011-to-2017 which made me cry, and selected those to include ...and, those that made me feel fury, and lust for revenge.

If you start feeling that way, I've won and the nuclear energy industry has lost. Someone has to drive the wooden stake through the vampire's heart ...and, it might as well be you.

### Déjà vu

In March of 2017, for the sixth year running, from Alaska to Mexico sea creatures are dying in near extinction levels. They are riddled with disease and starving; seabirds, sea lions, salmon, abalone, star fish, herring, tuna, dolphins, whales, turtles, seals, urchins and too many more in large die-offs dead and dying submerged and floating beneath the surface of the sea, on the surface, and thrown up squirming and rotting upon our shores. Dead birds wash ashore *en masse*, Cassin's Auklets, Murres, pelicans.

Massive die-off of sea creatures from California to Alaska — Animals starving as food chains continue to collapse — Mass starvation events plague West Coast —

Scientist: “Felt like I was doing nothing but counting dead animals” — TV: Deaths really quite troubling (VIDEO)

### 15,000 baby sea lions die

03:15 PM Feb 15, 2015 | 176  
-8566- California: 15,000 baby sea lions die - can kill a generation (VIDEO)

Coast - Concerned fishermen forced to pay for tests since officials not doing it - people don't trust gov't... they don't trust corporations (AUDIO)

04:21 PM Mar 4, 2015 | 356  
-8582- Gov't: it's getting even worse on West Coast this year - Experts say over 35,000 baby sea lions could be dead; Phenomenon unprecedented in scale - Hundreds of times more pups than usual at rescue center - Doctor: Definitely indicates ocean not normal... Really, we should be worried (AUDIO)

09:10 PM Jan 15, 2014 | 317  
-6926- Fukushima radiation on West Coast of N. America - Levels to rise for years - unprecedented event for Pacific, largest ever radioactive release into ocean (VIDEO)

### Dolphin deaths linked to radionuclides

09:10 AM Jan 16, 2014 | 83  
-6927- NPR Affiliate: Fukushima cesium detected in Alaska salmon sample - Radioactive plume already reaches West

-8611- Never seen before - white lungs found in **dolphins that died during mass stranding near Fukushima - Interruption of blood supply leading to death of tissue - Disease has been linked to radiation exposure**

07:45 PM Nov 30, 2013 | 27

-6760- Massive amount of debris off Hawaii, You had to be there -just kept going & going - so odd it was in straight line - accumulated off islands, warns of fish contamination - Rare dolphin washes up with heart problems & stomach lumps, last examined in 1980s

-6568.2- 150 dolphins wash ashore at multiple locations - 50 miles from Fukushima border - Could be largest mass stranding ever reported in nation's history - Gov't Expert: Dolphins may have had psychological problems. We don't see any immediate signs of cancer (VIDEO) Apr 11, 2015

#### **Whales in record numbers display unusual behavior**

11:51 PM Dec 21, 2013 | 100

-6839- Unprecedented activity near Canada West Coast: Whales in record numbers, displaying highly unusual behavior - Problems in Pacific could be bringing sea life to area; something amiss out there

11:14 PM Nov 30, 2013 | 36

-6761- Whale Expert near Vancouver: In 30 years never ever seen this behavior, they must sense this is a safe place to be - Captain: I've never seen anything like it in 50 years on Pacific - one even placed its head on the boat (VIDEO)

04:22 PM Nov 30, 2013 | 217

-6759- 100s of whales in California coastal bay; what's going on (VIDEO)

11:19 PM Nov 29, 2013 | 125

-6758- Leading edge of Fukushima plume now on West Coast - Fish Market Owner: My customers have a lot of concerns about the nuclear contamination (AUDIO)

09:43 PM Aug 30, 2014 | 297

Whales, dolphins, sea lions, birds - stranded, seizures, washing up dead

-8398- Surge in marine mammal strandings on U.S. West Coast - biggest fear is if this is everywhere along coast - whales, dolphins, sea lions, birds washing up in large numbers

- thousands likely dead - violent seizures shown on news (VIDEO)

#### **Whales, dolphins - no food, swam in radiation**

12:39 PM Aug 30, 2014 | 179

-8397- California - no food along Pacific but in isolated areas - Fukushima stresses sea life - dolphins, whales swam in radiation (VIDEO)

09:55 AM Aug 29, 2014 | 138

-8395- Officials reveal about 2 Trillion becquerels of Fukushima radioactive material flowed into ocean every month during 2013 - deadly strontium releases double cesium - Strontium gets into your bones... changes equation (VIDEO)

07:56 AM Aug 28, 2014 | 310

-8394- Strontium-90 from Fukushima along west coast of N. America - Plutonium - might be in plume - need more monitoring - no sign radioactive releases from plant are going to stop

10:29 AM Oct 19, 2013 | 146

-6568- Sailor: After we left Japan, it felt as if the ocean itself was dead - Nothing alive for over 3,000 miles - no longer saw turtles, dolphins, sharks, birds - saw one whale, it appeared helpless with big tumor on head

-6568.1- Similar reports about wildlife around the Pacific Rim, include: sardines -- - seals --- sea lions --- polar bears --- sea stars --- turtles --- salmon --- herring --- coral and more.

-6568.2- 150 dolphins wash ashore - 50 miles from Fukushima - largest mass stranding reported in nation's history? - Gov't Expert: Dolphins may have had psychological problems; don't see signs of cancer (VIDEO) Apr 11, 2015

#### **Sea lions, turtles 13 baby gray whales, 55 dolphins, found dead**

09:25 AM Apr 3, 2015 | 754

-8603- 13 baby gray whales & 55 dolphins dead on West Coast - dead humpback whales in Oregon - corpses of sea lions, birds, sea turtles decomposing - Fear for whales encountering radiation hot spots -

volunteers trained about dangers of radiation (VIDEO)

### **Hundreds of sea turtles wash up dead**

11:27 AM Nov 12, 2013 | 160

-6680- Hundreds of sea turtles wash up dead on Pacific coast - dogs stop breathing and die almost instantly when eating them - reproductive problems

### **Eastern Pacific Green Sea Turtles**

01:07 AM Nov 7, 2013 | 29

-6659- Fishermen report boats surrounded by hundreds of dead Eastern Pacific green sea turtles - some found swimming in circles as if dazed or confused

NOAA: Because of the highly migratory behavior of adult turtles, and the likelihood of shifting habitat requirements of post-hatchlings and juveniles, the populations of East Pacific green turtles in the Pacific Ocean cross international boundaries. The west coasts of Central America, Mexico and the United States constitute a shared habitat for East Pacific green turtles. The East Pacific green is the second-most sighted turtle in the east Pacific during tuna fishing cruises. Along the Pacific coast of America, East Pacific green turtles have been reported as far north as British Columbia. Adult and juvenile green/East Pacific green turtles have also been reported along the Washington coastline. The East Pacific green turtle was the most commonly observed hard-shelled sea turtle on the U.S. Pacific coast.

### **Sick seals & sea lions - green & yellow puss on body**

04:49 PM Apr 20, 2014 | 113

-8182- CBS San Francisco: Record number of sick seals & sea lions - large pockets of

green and yellow puss all over their body - (PHOTO & VIDEOS)

03:53 PM Aug 26, 2015 | 517

Baby Elephant seals & sea lions die of leukemia-linked disorder

-8702- California Coast: Many baby seals dying of leukemia-linked disorder- 1/3 of recent deaths at San Francisco Bay rescue center (CHART)

-8702.1- Physics and Radiobiology of Nuclear Medicine (Springer), Jun 29, 2013: **Leukemia is one of the most common cancers induced by radiation** in humans, accounting for one in five mortalities from radio-carcinogenesis. Risk of leukemia varies with age, **younger persons more prone to radio-carcinogenesis** - Leukemia appears as early as **2-3 years after exposure**, average latent period of 5 to 10 years.

-8702.2- California sea lions dying, organs falling out of place, tumors, a pus inside bodies (PHOTO)

12:16 AM Sep 15, 2015 | 228

-8711- Vast amount of dead birds in Pacific off U.S. coast, nothing will eat the bodies - no seals present - fish gone... all of them are starving - Animals acting weird, sick and weak, too weak to fly, too weak to run - Resident: We want to know if it's from Fukushima (VIDEO)

09:41 AM Feb 4, 2016 | 734

-8769- Pacific Rim: Bird die-off; stomachs empty; hundreds of thousands at risk (VIDEO)

### **Mothers and baby Orca whales dying**

Young orcas whales are dead and dying near Vancouver and their pods are decimated or gone.<sup>a</sup> Apologists say, there's not enough Chinook salmon and Coho chum salmon for them, 'which is basically all they will eat'<sup>b</sup>, that disappearing food sources are the reason for the population decline. A zoologist

---

<sup>a</sup> Pete Thomas Outdoors (Former columnist for the LA Times), Dec 22, 2016

<sup>b</sup> KOMO, Dec 22, 2016

says one of the mother orcas died in the prime of her life; mothers and their babies are dying.<sup>a</sup>

Common error attributes only slow starvation of each species, rather than death of the food chain, *itself*. The elephant in the room trumpets at me, *'Fukushima fallout' is destroying the food chains in the Pacific Ocean and around the Pacific Rim. Help us. Please. Help us.*

### **Dismembered sea stars, no clams**

Dismembered and dissolving, living sea stars litter the beaches of Kachemak Bay; Alaska; twenty-to-thirty thousand starved murre wash ashore in southwest and south central Alaskan beaches. Whales and otters wash ashore, dead and rotting.

No clams on Ninilchik beach again this year to dig up, not a young clam to be found. Sunflower Stars disappear, then all Star species, (and populations greatly diminish in Oregon and California).<sup>b</sup> Another year of empty nesting colonies of murre, tens of thousands have died of starvation, again this year. Remaining murre abandon nesting colonies; they know; do not raise chicks.<sup>c</sup>

#### **Murres, puffins, kittiwakes, gulls, shearwaters, whales, pinniped, sea otter, fish - dead on NW & West Coast beaches**

03:00 PM Jan 13, 2016 | 410

-8761- Pacific Rim West-/Northwest coast ... Alaska, British Columbia, Washington, California: Dead birds on beaches; also, reproductive failure, **thick-billed murre, black-legged kittiwakes, horned and tufted puffins, glaucous-winged gulls, and sooty and short-tailed shearwaters; concurrent with whale, pinniped, sea otter, and fish mortalities** (VIDEOS)

09:41 AM Feb 4, 2016 | 734

-8769- Pacific Rim: Bird die-off; stomachs empty; hundreds of thousands at risk (VIDEO)

02:28 PM Dec 12, 2013 | 88

-6804- Large die-off of Alaska seabirds from disease never found before in state history - Official: It's super, super common... except it's first time - Hundreds dead per km<sup>2</sup>; Continued to wash ashore - 'Relatively natural; Witness: Head flopped backward, appeared to have seizure, then dropped dead (AUDIO)

08:36 PM Apr 29, 2015 | 395

Animals sick, starving, too weak to swim, hemorrhaging, whales wash ashore

-8621- Whale deaths in California under investigation - whales washing ashore - animals sick, starving, emaciated, too weak to swim, hemorrhaging (VIDEO)

#### **Extinction-level event – plutonium radionuclides hot spots in Pacific to kill for hundreds of years**

06:45 PM Sep 2, 2015 | 631

-8705- West Coast: Whale strandings, cancer in seals, collapse of fish stocks (PHOTOS) and (VIDEO - whale final gasps on beach)

[http://enewnews.com/wp-content/uploads/2015/09/AK\\_whale.gif](http://enewnews.com/wp-content/uploads/2015/09/AK_whale.gif) (above: animated gif of a whale on the seashore breathing its last breaths as it fights for life after being poisoned by Fukushima plutonium in the Pacific).

# 10. Internet comments!

## Preface, Part 3

### God save the internet comments to online stories

#### **Orcas on top of food chain starve to death; not one scientist comes forward to say Fukushima is a cause**

*Vital1*: All embryonic sea life is hypersensitive to radioactive pollution, so the entire North Pacific food chain is collapsing. This view is sported by Dr. Sternglass in his research paper:<sup>a</sup> nuclear contamination from the nuclear bomb testing era caused a significant crash in Pacific Ocean fish stocks.<sup>b</sup>

If that's the case, it's logical to assume Fukushima nuclear fallout is having a similar effect.

Like the human embryo, embryonic sea life including fish eggs, are hypersensitive to radioactive contamination, hence the large number of reports of seals, whales and birds washing up on the west coast of North America, starving to death.

Sternglass says, "The purpose of the study was to determine whether continued atmospheric testing by France and China or potential releases from underground detonations that might unexpectedly escape into the nearby fishing grounds could have detectable effects on the reproduction of fish populations similar to the unanticipatedly severe effects of low level radiation on the human embryo and fetus, <sup>(2, 3, 4)</sup> recently confirmed by independent studies by other investigators. <sup>(5, 6)</sup> <sup>c</sup>

*CodeShutdown*: If you correlate the Sternglass paper with the amount of fallout from, then we have enough radioactive poison to kill the ocean's fisheries hundreds of times over.<sup>d</sup>

10:47 AM Oct 27, 2011 | 13

-1623- French Gov't: Fukushima to make Pacific twice as radioactive as after atmospheric nuclear testing in '60s - releases could persist

05:45 PM Sep 23, 2013 | 37

-6431- Fukushima atmospheric release of 210 quadrillion becquerels of cesium-137 - upper bound in simulation - Chernobyl estimated 70-85 quadrillion

---

02:32 AM Mar 13, 2013 | 43

-5554--8228.2- Japan Professor: I believe airborne release of cesium-137 from Fukushima equals 400 to 500 Hiroshima nuclear bombs - Another 400 to 500 bombs worth has already flowed into Pacific Ocean (VIDEO)

01:49 PM Jan 12, 2017

-8831- Massive die-off of sea creatures from California to Alaska - Animals starve as food chains collapse - Mass starvation events plague West Coast (VIDEO)

## **Collapse of Pacific Ocean life caused by climate change or nuclear fallout?**

*CodeShutdown:* Is collapse of the Pacific caused by climate change or nuclear fallout? The chitin in plankton absorbs radiation like a sponge. This concentrates nuke fallout up to 10,000 times. The plankton die, bringing the radiation with them to the bottom and the tiny fish that feed on the missing plankton starve. The result: scientists don't measure much radiation in the water, and larger fish that feed on smaller fish that feed on plankton, starve. This ripples up the food chain.

Orcas at the top of the food chain are starving to death and not one scientist comes forward to mention Fukushima as a cause.

A salmon's diet: juvenile salmon eat zooplankton, and larval and adult invertebrates. In the ocean, salmon eat smaller fish, such as herring, pelagic amphipods and krill. The populations of which, have crashed.

## **Plankton & food chains**

### **Salmon – plankton**

02:54 PM Aug 6, 2014 | 139

-8355- Pacific Northwest: die off of young salmon; healthy then die heading out to sea; far less plankton than normal; testing for Fukushima radionuclides (VIDEO)

04:30 PM May 21, 2013 | 83

-5899- **Highest levels of Fukushima contamination in plankton east of Hawaii?** (MAPS)

07:35 AM Mar 18, 2012 | 9

-2873- Cesium-134 detected in plankton 600km from Fukushima just 3 months after meltdowns - Scientists say necessary to look at bioaccumulation

07:53 PM Oct 15, 2011 | 53

-1546- Radioactive plankton heavily contaminated - Food chain fears - Continuously carried southward from Fukushima

06:45 PM Sep 2, 2015 | 631

-8705- West Coast: Whale strandings, cancer in seals, collapse of fish stocks (PHOTOS) and (VIDEO - whale final gasps on beach)

VOA, Sep 1, 2015: While President Barack Obama is in Alaska, he might have this question: Why have 30 dead whales washed ashore... [NOAA's] Fauquier said **extreme mortality event** complicated... Fauquier noted that in the ocean, toxins move up the food chain. Some of the whales actually filter the phytoplankton and the zooplankton... they get the toxins through that method... as you go higher up the food web, more toxin gets concentrated... NOAA hopes to explain why the whales died and why they perished in **such great numbers**.

07:59 AM Jan 14, 2012 | 87

-2263- Gov'ts refuse to provide funds to research Fukushima effects - Virtually zero monitoring

Fisher and other scientists secured funds from a private foundation for a research voyage in the Pacific to gather radiation data on fish, plankton and water. *Nicholas Fisher, a marine sciences professor at the State University of New York at Stony Brook is researching how radiation from Fukushima is affecting the Pacific fishery.* There has been virtually zero monitoring and research on this, he said, calling on other governments to do more radiation tests on the ocean's marine life. In the U.S., it's difficult to acquire funding to do that work. A lot of people are very frustrated.

11:45 AM Jan 10, 2017

-8830- Fukushima radiation contaminates West Coast fish - Fears the country's food chain is polluted... a terrifying discovery — Scientist: It appears plume has spread throughout vast area from Alaska to California — CBS: Bulk of radiation has yet to make it's way across Pacific (VIDEO)

10:13 PM Aug 23, 2013 | 41

-6243- Gundersen: Ocean contaminated from deluge of Fukushima toxic water – I will stop eating fish from west coast - Cesium at 1,000% normal levels in middle of Pacific

09:56 AM Aug 19, 2013 | 39

-6207- Sockeye salmon at dire historic low on Canada's Pacific coast - We think something happened in the ocean - The elders have never seen anything like this at all - Alaska and Russia affected (MAP)

-6207.1- *Gundersen: We will see top of the food chain animals like tuna and salmon that bioaccumulate. The FDA is not monitoring fish entering the United States. By 2013 we might see contamination of the water and the top of the food chain fishes on the West Coast.*

-6207.2- *Gundersen: Federal and state agencies are not measuring this - I've been trying to get people in **Oregon** and Alaska to demand of their state: check **salmon**, it is not difficult.*

07:30 PM Aug 23, 2013 | 29

-6242- Nuclear Expert: Fukushima melted fuel drifts in ocean and onto land, lacks any containment - ends up on coastline and

blows into communities - People get an exceptional dose - health harm to go on for thousands, if not tens of thousands of years (AUDIO)

01:49 PM Jan 12, 2017

-8831- Massive die-off of sea creatures from California to Alaska - Animals starve as food chains collapse - Mass starvation events plague West Coast - "Felt like I was doing nothing but counting dead animals" (VIDEO)

09:32 PM Mar 31, 2015 | 504

-8601- Experts: Pacific food web crashing - what's going on? Where are the fish? Where did they go? - To be honest, it's insane - You could equate it to a war zone - Food shortage all up & down West Coast - Fishermen believe pollution harming food chain, doubt NOAAs warm water theory (VIDEOS)

10:02 AM Sep 18, 2014 | 139

-8426- Fukushima radiation major threat to survival of baby birds - Immediate and worrisome impacts on marine wildlife discussed - More damage to come as radioactive material biomagnifies in food chain

09:45 PM Sep 14, 2014 | 78

-8420- Plutonium contamination of Pacific Ocean food chain from Fukushima suspected; potential long term problems for humans - Newspaper: Leakage of highly contaminated water into sea must be dealt with immediately - Gov't: Effect on health of U.S. public not significant (VIDEO)

03:44 PM Aug 4, 2014 | 104

-8350- Experts: Fukushima globally enhanced cesium-137 levels in air by 2 to 3 orders of magnitude - radionuclide plume reaching Europe contaminates land and food chain

12:11 AM Jun 3, 2014 | 249

-8263- Strontium reaches 500 Billion Bq/m<sup>3</sup> in basements at Fukushima - Record levels reported at 5 locations near ocean - U.S. Senior Scientist: We see strontium becoming more of concern... **food chain will have to be studied more carefully**

**Ocean food chain contaminated**

04:18 PM Feb 4, 2014 | 54

-7053- Months of uncontrolled radioactive releases from Fukushima a problem for Pacific, radionuclides building up in food chain - Health threat to Americans not likely if leaks ended soon after 3/11 (VIDEO)

08:32 AM Jan 23, 2014 | 95

-6960- Significant amount of radioactive seawater to hit Southern California? Expected on beaches in near future - Fukushima contamination may be pervasive across food chain (AUDIO)

-6903- ABC in Fukushima: Radiation to be at U.S. coast early this year - effects on food chain from unprecedented amount of migrating radioactivity? - They tried to stop leaks, it's just not working - TEPCO: We don't know what's gone into ocean (VIDEO)

08:21 PM Jan 9, 2014 | 152

-6902-Gundersen: I'm not eating Pacific Ocean fish - Bio-accumulation of Fukushima nuclear waste concerning - effects of lower-level radiation worse than predicted (VIDEO)

05:59 PM Jan 9, 2014 | 337

-6901- Pacific Wasteland? Japan Gov't Scientist: 'Big problem' for whole ocean if Fukushima water release has strontium-90 - TV: It may not get filtered out; All bets are off without way to plug plant leaks - NHK: All decontamination systems stop working, may not restart for long time (VIDEO)

09:15 AM Jan 8, 2014 | 435

-6896- Pacific ecosystem collapsed since Fukushima - Plutonium and uranium spread thru food chain? (VIDEO)

12:20 AM Jan 8, 2014 | 177

-6895- Hot spots at 1,400% baseline radiation levels on San Francisco-area coast - State: naturally occurring materials not radioactivity associated with Fukushima - Expert: Don't let babies or kids inhale or eat the sand

05:06 PM Jan 7, 2014 | 214

-6894- Dead Conjoined Baby Gray Whales found on West Coast of N. America - Could

be first ever recorded - 2 heads and 2 tails, joined in middle (PHOTOS & VIDEO)

03:05 PM Jan 7, 2014 | 193

-6893- CBS: Health officials are investigating radiation levels along coast near San Francisco after finding higher than typical readings - UC Berkeley Professor: Absolutely no correlation with nuclear disaster; compares eating banana to drinking water from Fukushima plant (VIDEO)

02:31 PM Dec 27, 2013 | 112

-6854- Fission products are flushed into environment by water used on Fukushima molten fuel, including plutonium and curium - radioactivity to recirculate for many generations in ocean food chain, meat content to increase with time

09:12 AM Dec 27, 2013 | 148

-6852- Post-Fukushima Report: Concern over Plutonium and Uranium deposit and re-concentrate far away - Isotopes transfer to land via sea spray, aerosols, flooding - human exposure by inhalation, food, contact<sup>-a-a</sup>

09:50 AM Dec 23, 2013 | 69

-6844- Expect enormous amount of cancer around Pacific - all at risk, radiated water to hit right in U.S. - we're at top of food chain - we get highest radiation dose - 35 people now suffering cancer after U.S. rescue mission off Fukushima (VIDEO)

11:21 AM Dec 16, 2013 | 79

-6814- Releasing Fukushima radioactive water into Pacific 'inevitable' - Reports: Japan very aware of danger posed by past releases; Contaminants concentrated thousands of times in food chain; at end of chain are humans who may suffer genetic damage, cancer, other health problems and death

11:15 PM Oct 6, 2013 | 20

-6504- Concern over small quake triggering another crisis at Fukushima - 'Silly' for gov't to claim leakage contained - Scientist questions if food chain is contaminated far from plant

11:45 PM Aug 22, 2013 | 18  
-6233- Canadian University Scientist: Test seafood for Fukushima contamination - continuous inputs for 2 years - opportunity for re-concentrating up food chain - not enough being done on this side of Pacific

08:40 PM Aug 12, 2013 | 67  
-6170- Enormous amount of contamination flowing from Fukushima will probably imperil entire Pacific Ocean - Threatens other countries, food chain - Absolutely can reach U.S. and Canadian shores (VIDEO)

01:39 PM Aug 11, 2013 | 242  
-6162- People of Japan are responsible for poisoning of world's food chain due to Fukushima catastrophe - They have to stand up and take action - the buck has to stop somewhere (VIDEO)

10:10 PM Jul 22, 2013 | 70  
-6055- 'Fear marine life poisoned' by nuclear material flowing from Fukushima - food chain contamination warnings - TEPCO flip-flop 'shocking'

#### **Hanford**

02:33 PM Jul 15, 2012 | 41  
-3794- World food chain compromised by Fukushima Daiichi radionuclides? Levels high in Bluefin tuna (AUDIO)

05:28 PM Aug 23, 2013 | 88  
-6241- New Scientist: Dump Fukushima nuclear waste in Pacific, no risk to U.S. - have to make people understand low levels of radiation don't matter - None of this is going to do anything health wise.

# 11.

## The Life Force is under attack as never before. Feel it?

### **Preface, Part 4**

*Your* understanding or lack of understanding is the most pressing issue of our Time, and Life everlasting.

You have within you the seed of a new understanding empowering you to be active, rather than reactive, and to discern then undo nuclear energy industry death machination<sup>a</sup>.

The bottom line is hidden in the air you breathe, in your vacuum-, car-, ac- and air filters, and lungs and in the water, tap water and bottled water from the store, drinking water ...and, in the radioactive urine you may dispel.

---

<sup>a</sup> machination: a scheming or crafty action or artful design intended to accomplish some usually evil end

The bottom line is hidden in the food you grow, you buy in supermarkets and restaurants, and eat. It is hidden in your bloodstream and throughout your body and DNA, passed to your unborn kids and mutates them before they are born or they experience death, before birth.

<http://www.fairewinds.org/nuclear-energy-education/new-video-of-scientist-kaltofen-presenting-to-american-public-health-association>

“In Seattle we had a two week period where we actually had 4-5 hot particles of radioactive material that was trapped by our quantitative filters in the amount of air that people would breathe in a day.”

05:57 PM Nov 18, 2011 | 67

[GENDAI BUSINESS ONLINE \(ARTICLE IN JAPANESE\)](#), Jun 14, 2016: [J]ust before the 5th anniversary of the triple meltdown at Fukushima Daiichi, a group of young girls in the city of Minami-Soma rode their bikes to school past a **shocked and saddened pedestrian. That upset observer was Arnie Gundersen**, nuclear reactor expert... What surprised me at this visit to Japan... is that the decontaminated area is contaminated again, Mr. Gundersen said while explaining why it was **such as sad shock to witness the girls on their bicycles**. This was not what I had expected. **I had thought that we would not find such high doses of radiation in the decontaminated area**. But, sadly, our results prove otherwise.... Gundersen collected samples of dust [though] the official data cannot be released before the publication of formal scientific papers, it is evident that **high doses of radiation, usually found in nuclear waste, was detected from these samples**. This means that **highly radioactive dust is flying around the city**. In other words, **the decontaminated land is contaminated again**. Little girls are affected by the radiation 20 times as much as adult men. The Japanese government's standard of 20 mSv is based on exposure assessments for adult men. The girls on their bicycles are actually being affected by a radiation dose equivalent to as much as 400 mSv. Mr. Gundersen also pointed out that human lungs are heavily affected by internal exposures to radiation. At this visit, **I wore a radiation proof mask that can filter out 99.98% of radiation for six hours. I sent my filter to the lab, and they found a high dose of Cesium**. But, unfortunately, the Japanese government only cares about the number on a Geiger counter and does not consider the internal exposure. This has resulted in **a hazardous downplay of this kind of data and human lungs are**

**affected by the serious internal exposure....** [T]he radiation from the mountains are coming back to the city by way of wind and rain. Mr. Gundersen noted the **extreme radioactive contamination of the mountains...** vegetables grown in that area exceed the government's standard by 1500 Bq. These vegetables were sold at the Michino Eki in Tochigi prefecture, and **the bamboo shoot grown in this contaminated region was used for elementary school lunches in Utsunomiya. These school lunches contained more than twice as much radiation as the government's standard...** However, the government continues to push for the end of people's relocation and force the return to re-contaminated areas... **Mr. Gundersen also found that Tokyo remains contaminated**. He measured dust... and **found a high dose of radiation**. That dust is in the air that will be inhaled by the visitors and athletes of the 2020 Olympic Games. Needless to say, the current residents are inhaling it every day... [CCTV CHANNEL 17 INTERVIEW](#)

*A Plus*, Aug 27, 2015: *The Story Behind This Picture Is So Mysterious, Scientists Are Scratching Their Heads; **What is going on here?!***... the number has skyrocketed. Thirty whales spanning at least four species have been found... NOAA Fisheries scientists and partners are **very concerned about the large number of whales** stranding in the western Gulf of Alaska in recent months, Dr. Teri Rowles of the NOAA said... these enormous, gorgeous animals are **dying in such high numbers.**

VOA, Sep 1, 2015: While President Barack Obama is in Alaska, he might have this question: Why have 30 dead whales washed ashore... [NOAA's] Fauquier said the **extreme mortality event** was complicated... Fauquier noted that in the ocean, toxins move up the food chain. Some of the whales actually filter the phytoplankton and the zooplankton... they get the toxins through that method... as you go higher up the food web, more toxin gets concentrated.... NOAA hopes to explain why the whales died and why they perished in **such great numbers.**

*Cordova Times*, Aug 28, 2015: *Whales..Thirty dead whales ....And **no one knows why***... when thirty of them die in four months, three times the usual rate, something is not right.... between **700 deaths** over the years, scientists have managed to perform **two full necropsies.** For this particular event, they've done **one limited necropsy**... While they keep an eye on algae, **they have been testing all possibilities. Possibilities like fallout from Fukushima,** and while they did radiation testing as part of the limited autopsy, it came back with background

levels that would occur normally in Alaska -Julie Speegle, speaking on behalf of NOAA.

*Newsweek*, Aug 27, 2015: Over the last few months, dead whales have been **appearing regularly on beaches along the Northern California** coast. In the same period, 30 whale carcasses have washed up along the coast of Alaska, puzzling scientists.

*Washington Post*, Aug 30, 2015: *Concerns mount as whales are found dead in Gulf of Alaska* - Researchers are **scrambling** to determine what's behind the death of 30 whales... Other dead whales have been reported **off the coast of British Columbia.... starvation or disease could be behind the deaths... more likely culprit is unusual water conditions.**

Criminally, this understanding that would benefit mammals (including human) as species is absent from mainstream news, K-12 classes and higher education; all who appear to be apologists for the nuclear death industry.

It is our view that the increased amount of cancer in women worldwide parallels the rise of nuclear testing and the nuclear power industry ...and heightening cancer rates in females and males, alike; (although new research reveals fallout and the nuclear energy business is more dangerous to women, in utero life in the womb, infants and girls than to men and boys).

In other words, we argue the increased amount of cancer in mammals (including human) worldwide *parallels* the rise of nuclear testing, the nuclear power industry, use of depleted uranium weapons, as well as normal, and catastrophic and cataclysmic nuclear energy events ...all-the-while new

-6807- China bans all imports of shellfish from U.S. West Coast - inc: Washington, Oregon, Alaska, N. California - to continue (AUDIO)

research documents low level exposure to radionuclides over long periods of Time appears more dangerous to Life Everlasting, than sudden upchucks.

Surplus human death as a result of atmospheric nuclear testing since 1945 are counted by epidemiologists at 60,000,000 deaths. And, 120,000,000 cancers from radioactive releases. Plus, add in several more million dead babies and fetuses.

Since March 2011, Fukushima has doubled the existing amount of fallout in the world, that you are exposed to, that shows up in the food you eat, the water you drink, and the air you breathe ... as a species.

The Fukushima fallout amount is described as the same as 500 Nagasaki plutonium-nuclear bombs exploded in the sky ...plus, another 500 plutonium-nuclear bombs exploded in the sea. So, can we now double the estimated additional surplus death toll?

Sure.

If you see through your mind's eye, consider beside humans other mammals who breathe the same air and drink the same water and eat plants and fruits grown in the same soil as our food, watered by the same nuclear rain-through and touched by the same nuclear ground shine.

In our opinion, you can double the death toll again, if you include animals, created by Our Hand.

The excess human death toll *in the United States* since 2011 from Fukushima fallout according to epidemiologists is 20,000 human deaths.<sup>a</sup>

Perhaps 100,000, and counting.

Now again, consider animals on land in the United States.

Now, consider animals in the sea.

Now again, across the northern hemisphere.

Consider this: 1,000,000 cancers from Fukushima in Japan over the next 20 years - first thyroid, then lung, organ, brain then leukemia.

To date, Fukushima fallout in North America is estimated 400,000,000,000,000 Bq Cesium-137 – resulting in cancer if one particle is ingested.

Ongoing- ...new disease ...suffering ...mutation and ...death from historic atmospheric nuclear testing and leaks from renewed underground testing, and ongoing leaks from the nuclear power industry (not to mention from normal day-to-day operations) and depleted uranium weapons can be slowed down ...all we have to do is phase out the nuclear power industry, depleted uranium weapons, decrease nuclear testing ...and, in its place, phase in alternative energy.

But listen well, the damage is already done; ongoing consequences cannot be undone or reversed. The cancer rate is now one-in-two.

Soon, thanks to nuclear energy industry, it will be one-in-one.

The Life Force is being attacked as never before. Can you feel it?

It needs our help.

---

# 12. Mammals versus idiots

## Introduction, Part 1

The Nuclear Regulatory Commission says that nuclear energy is safe ... the current trend is to build 1,000-to-2,500 new reactors to prove the point it's great for the environment. The premise of this book is that it is not safe ... Facebook and YouTube are coming alive with excitement we're at the crossroads ... the crossroads are in the rearview mirror. We're racing, we're half-past dead ...and unless we can get it from this book, we're having 2,500 nails put in our coffin.

(This is the first book that documents the nuclear energy industry and prior atmospheric testing are killing mammals (including human), and females are most vulnerable.)

**Animal lovers:** 20,000 excess human deaths in the U.S. followed Fukushima fallout, and infant mortality doubled in Seattle and Vancouver BC, while prior atmospheric testing is resulting in 60,000,000 people dead and 100,000,000 with cancer. We argue: if you include animals, those rates double, triple and more. We argue in defense of mammals (including human), who can't speak out and prosecute the owners of the nuclear power industry wiping them out. This book is a summary of evidence, a book of exhibits for a public trial of those who profane natural- and Divine order.

Currently, children and other baby mammals, as well as adults, are terribly suffering worldwide from nuclear power. And, the legion of evil doing this to us are persecuting whistleblowers. Even the trees and flowers and insects and birds and reptiles and whales and dolphins and starfish and pelicans and seabirds and cows, horses, dogs and cats and everything living that reproduces itself after its own kind, have their DNA in the crosshairs of nuclear madmen owned and governed by the G8 and International Monetary Fund and World Bank and Bank of International Settlements ...the western central banks, that have become the new face of the Inquisition, carelessly killing all who do not worship money and even those who do, and bent on destroying Natural Order, Gaia and Divine Order. Now, hidden and aided by the Chinese central banks.

We look at Hillary's WikiLeaks-released emails while stationed post-Fukushima in Japan as State Secretary in the aftermath of Japan's three meltdowns following directives from Obama and Kissinger not to allow Japan to be nuclear free by 2030 ...and as a consolation prize Hillary's pact with Japan that food imported from Japan into the U.S. not be tested for radionuclides. The Fukushima emails disappear.<sup>a</sup>

01:06 AM Oct 2, 2012 | 78

-4411- Sec. Clinton personally pressures Japan leader to keep nuclear power as President Obama wishes it

### ***Donald and the Trumpettes***

Nuclear power makes global warming worse.

*Maybe, just maybe* this Administration, Donald and the Trumpettes, will refuse to fund the nuclear reactor industry (with our tax dollars) who now say they will fight global warming by lowering our carbon footprint, and adding 1,000-to-2,500 new reactors will get of the problem ...not to mention all living things – (so, it appears to the learned eye).

Yes, we have no Obama. But, we had none even before Entergy was caught poisoning Manhattan.

*Obama says there is no danger here in the United States from Fukushima fallout ...why?* Obama's chief political strategist, David Axelrod, worked for Exelon, the largest nuclear plant owner in the U.S., planning strategic public affairs. Exelon's former chief Washington lobbyist, Elizabeth Moler, served as deputy national co-chair for the Obama campaign. Barack had successive White House energy czars describing nuclear power as 'safe, clean, and reliable' ... parroting the industry position. Entergy does Vermont.

This time, you'll know about Tritium.

Fukushima is continuing to poison Portland Oregon. Portland is just over the *other* pond, from Fukushima. Portland prides itself on t-shirts and bumper stickers, as being 'weird'. Seventeen states, including Puerto Rico and the District of Columbia, have laws intended to provide statewide fluoridation ... Oregon is not one of them [<http://fluoridealert.org/content/mandatory-fluoridation-in-the-u-s/>].

Portland citizens repeatedly vote to keep fluoride out of drinking water and keep it pure, based on new scientific research that fluoride reduces I.Q. in children and causes dementia in seniors ...with all the pro and con documentation included in their voter handbook. Some weirdo's document that fluoride calcifies your pineal gland, or 'third eye', the seat of your foresight, hindsight, imagination, dreams, intuition, simply seeing beyond normal sight ...after all, the pineal gland has rods and cones like your other two eyes. ...say it isn't so.

Portland doesn't know an organic farm in southeast Portland voluntarily closed down because it was *permanently* contaminated from Fukushima radionuclide *rain-through (nuclear fallout)* and resultant nuclear fallout *ground shine* ...it could no longer grow food safe to eat, ever again. Nor, that Portland had/has the most rain-through and ground shine of Fukushima fallout in the U.S., as much as around Fukushima Dai-Ichi. The Pacific Cascades, even more.

Just as in Seattle folks did not know, and still do not know, they breathed in hot particles daily that increase nose bleeds and asthma and pneumonia then lodge in the lungs and cause lung cancer, we here in Portland did not know we breathed hot particles in, too.

Not a peep from the people of Portlandia, news or city commissioners ...nothing. Not even from Obama, Hillary or Trump when auguring for the inauguration. Not a single word.

*That's weird.*

We trace the tragic extinction-level journeys of whales and dolphins in currents constantly re-filled for six years with floating and submerged Fukushima plutonium from Japan to the west coast. There, they surround and circle fishing boats crying and lay their heads against a boat, pleading for help, breaching and listing, swimming in circles helplessly, huge tumors on their heads, hiding by the hundreds in small harbors.

Then, the whales and dolphins wash up dead and dying on the beaches, alongside dead crabs, starfish, octopi and pelicans in a death freeze, pressed into the sand from Alaska to Mexico

Note the Alaskan seals, eyes bleeding and faces covered in lesions and tumors where jet stream rain-through brought airborne Fukushima hot radionuclide particles down upon them, and the polar bears, marked like the salmon with lesions and tumors from seaborne hot particles.

Notice the young sea lion pups off California, not one survived where thousands were expected, birds falling from the sky, thousands washing up dead on the shorelines, harbors covered with dead fish and in California the skin is falling off the horses just like the seals, faces of both covered in bleeding lesions and tumors.

### **Got milk?**

Milk from cows across the USA is reported too full of Fukushima fallout to be safe to drink because our pastures, like Japan's, are covered with Fukushima fallout *shine*, and the breast milk of women in Japan and Tokyo is filled with Fukushima radionuclides and unsafe. [Editor's note: See Chapter 38, *Got Milk?*]

Children are being born there with extra legs like the animals in Chernobyl, and kids being born without brains around Hanford, today just like when they closed it down when sheep were born without faces or mouths and legs joined.

It is too much for me to bear; I go out walking in the snow till my feet get too cold and look up into the clear night filled with stars, the air is crisp and clean and I am torn apart. It is all a State secret, in Japan and in the United States, too. All mammals (including human) are stricken in awe, breathing a death rattle. The nuclear energy industry reassures us, nuclear energy is safe and clean. I am not comforted.

Alaska seal deaths and Fukushima fallout - Skin lesions, hair loss, lethargy

(Note: The following two endnotes accompany this info.) Alaska Marine Science Symposium (pdf), Jan. 20-24, 2014 (*emphasis added*): *2011 Fukushima Fall Out: Aerial Deposition On To Sea Ice Scenario And Wildlife Health Implications To Ice-Associated Seals* (Dr. Doug Dasher, John Kelley, Gay Sheffield, Raphaela Stimmelmayer) –

On March 11, 2011 off Japan's west coast, an earthquake-generated tsunami struck the Fukushima Daiichi nuclear power plant resulting in a major nuclear accident that included a large release of airborne radionuclides into the environment.

---

<sup>a</sup> Sea ice and snow would act as a refuge for deposited radionuclides; thus radionuclides

Within five days of the accident atmospheric air masses carrying Fukushima radiation were transiting into the northern Bering and Chukchi seas. During summer 2011 it became evident to coastal communities and wildlife mgt agencies that there was a novel disease outbreak occurring in several species of Arctic ice-associated seals.

Gross symptoms associated with the disease included lethargy, no new hair growth, and skin lesions, with the majority of the outbreak reports occurring between the Nome and Barrow region.

NOAA and USFWS declared an Alaska Northern Pinnipeds Usual Mortality Event (UME) in late winter of 2011. The ongoing Alaska 2011 Northern Pinnipeds UME investigation continues to explore a mix of potential etiologies (infectious, endocrine, toxins, nutritional etc.), including radioactivity.

Currently, the underlying etiology remains undetermined. We present results on gamma analysis (cesium 134 and 137) of muscle tissue from control and diseased seals, and discuss wildlife health implications from different possible routes of exposure to Fukushima fallout to ice seals.

Since the Fukushima fallout period occurred during the annual sea ice cover period from Nome to Barrow, a sea ice based fallout scenario in addition to a marine food web based one is of particular relevance for the Fukushima accident.

Under a proposed sea ice fallout deposition scenario, radionuclides would have been settled onto sea ice. Sea ice and snow would have acted as a temporary refuge for deposited radionuclides; thus radionuclides would have only become available for migration during the melting season<sup>a</sup> and would not have entered the regional food web in any appreciable manner until breakup (pulsed release).

The cumulative on-ice exposure for ice seals would have occurred through external, inhalation, and non-equilibrium dietary pathways during the ice-based seasonal spring haul-out period for molting/ pupping/ breeding activities.

would only become available for migration during melting season

Additionally, ice seals would have been under dietary/metabolic constraints and experiencing hormonal changes associated with reproduction and molting.

Radiation from Fukushima, APRN (Alaska Public Radio Network), Jan. 24, 2014: They're having trouble sealing up the leaking nuclear power plants in Japan and they're also having trouble disclosing what is going on there. Is this a reason to distrust Alaska seafood?

Researchers: Skin ulcers on Alaska wildlife after Fukushima were never observed before -- Also reported in seals from Japan -- We couldn't document fallout pattern when plumes hit and animals were on the ice (AUDIO)

### **Girls versus boys**

People within 25 miles or downwind of a reactor, like in Manhattan, are more likely to get cancer. In Japan from Fukushima fallout, women, fetuses, newborns and girls have higher cancer rates than men and boys. We argue: the directors of the nuclear energy industry are misanthropes and misogynists.

Speaking of embryos, fetuses, and unborn children and abortions in Fukushima, Chernobyl, Hanford, and Semipalatinsk, Kazakhstan affected by fallout, let me say only this: Look in the photos, inside the jars of formaldehyde pickled on the shelves do you see the fully developed baby with no face and the single eye in the middle of the oversized forehead? ...yes, the cyclops. That one. Is that clean and safe enough for you? We promise you before this book is over, we will name the perpetrators. And we will ask them the same question.

And in Fallujah Iraq, Syria and Afghanistan affected by depleted uranium weapons see the living newborns and toddlers with stretched out and squashed faces like they were made of nutty putty, is this safe and clean enough?

**Radiation effects on fetuses**  
 08:06 PM May 12, 2014 | 150

 respond to people (GRAPHIC PHOTOS &  
 VIDEO)

U.S. soldiers stationed in those countries suffer more casualties from suicide than combat; and thousands of casualties from depleted uranium friendly fire causing cancer and related diseases ...courtesy of the nuclear power industry. Not to mention the dark fate of the U.S. sailors upon the U.S.S. Ronald Reagan stationed as guinea pigs off the shore of the exploding and melting down Fukushima reactors.

We will come to know Marco Kaltofen, and his work on hot spots. And the work of Janet Sherman and Joseph Mangano.

**A walk in the park in the dark**

We look at Japan's public relations solution that radionuclides don't hurt people who are happy and smile, just people with a gloomy disposition, and, at founding of 'smile parks' for children to play in, and at play areas, schools, whole villages and sidewalks in Tokyo chosen at random by fallout in Japan that in the U.S. would be *radiation control zones*. We argue: there is a misanthropic fallout cover-up of Olympian and global proportions, culminating in the 2020 Olympics being held in Japan as part of the cover-up and its consequences, as Japanese suffer and wither like human guinea pigs. We ponder any advisory role of CIA in drafting Japan's new laws defining as treason journalists 'forcing opinions onto others' that disagree with the State, and propaganda used in covering-up danger from the nuclear energy industry in Japan, the U.S., and around the world.

In the United States under the Obama Administration, radiation measurement instruments are removed by EPA in areas exceeding radiation safety levels because they are assumed to be faulty and never returned.

The global nuclear energy industry says that plutonium and fallout is good for you and builds up your resistance to disease' that Fukushima radiation is

less dangerous than radiation you get eating a banana or potato chips, or sleeping beside someone, or from a walk in the park on a sunny day. We disagree with the global nuclear energy industry, the United Nations, the United States, Japan, and the University of California. We side with the nuclear whistleblowers, who point out that industry apologists make no distinction between exposure to natural radiation and ingesting manmade radionuclides: inhaling one atom of plutonium increases your chances of getting cancer.

The reactors that blew up at Fukushima had over 30 years of nuclear waste stored on top. The reactor cores that melted down aerosolized into the jet streams and otherwise dispersed as hot particles covering the entire northern hemisphere and as molten lava burned down into water aquifers polluting the Pacific Ocean daily the last six years amounts to 600 tons of plutonium. The plutonium bomb dropped on Nagasaki had 16 pounds. I don't smile over it, not even make one joke and I'm a funny guy. Instead, I cry. My heart is broken. My cheeks and nose streak with tears. They get on my fingers and cover my keyboard. They are not hot tears. They make my face cold. Is that clean enough for you?

*Smile that.*

### **Tokyo & 2020 Olympic sites are covered with plutonium dust blown down from mountains practically, for Eternity**

Dead Olympians walking thru the looking glass: It escapes Red Bull, Sports Illustrated and ESNB that 2020 Tokyo 32nd Olympiad

athletes must compete in protective radiation suits, boots, gloves and respirator headgear to be safe from fallout.

According to nuclear scientists who measure fallout radiation there, and to citizen's groups who have taken radiation measurements at 2020 Olympic event locations: Japan, Tokyo and 2020 Olympic sites are covered and re-covered with plutonium dust blowing down from the mountains practically, for Eternity and onto the Olympian athletes and spectators as it does on the people of Japan, to enshrine them in their very own Pantheon of dead men walking.

---

Gaia and Natural Order, DNA and Divine Order, are not pleased with the directors of the nuclear energy industry and demand the sacrifice of their lives.

---

## **We agree with the twelve gods living on Mt. Olympus**

We argue that given their divine sanctions, the twelve gods living on Mt. Olympus, the planets, months of the year and days of the week all named after them, and Gaia and Natural Order, DNA and Divine Order, are not pleased with the directors of the nuclear energy industry and demand the sacrifice of their lives.

### **The writing is on the wall: are dreams graffiti in the Pineal gland?**

Alternative lives or none at all: '[In 2016], the nation's largest nuclear energy companies pushed through the first massive bailout in New York. State residents and businesses will pay \$7.6 billion dollars in subsidies to uneconomical nuclear reactors. [In 2017], the nuclear energy industry is pushing New York as a model for the rest of the country, costing \$160-\$280 billion dollars by 2030. We argue: if we spent that kind of money on clean energy solutions, within a generation, we could ensure healthy air and water, good jobs, and a bright, sustainable future for our children and our communities.'

We argue the Administration has to answer: Will Trump phase in alternative energy because it is 50 percent to 75 percent cheaper than nuclear energy? Especially since he wants to manufacture domestically, and reactors are manufactured only overseas ...in South Korea, India and Japan; (re-tooling here is cost-prohibitive).

# Is radical Islamic terrorism a G8 distraction from the central banks that finance and own the nuclear energy industry?

We question if Trump can make a deal with the nuclear energy industry for the benefit of America, first; and second, for the mammals and sea life of the Pacific Ocean; and third, phase out the 500 reactors currently operating; and fourth, just say no to the nuclear energy industry's request for 1,000 new reactors, and the 500 China wants to build; and to phase out all of Japan's 46 reactors and tell them the Trump Administration wants Japan to be nuclear-free by 2030 ...and the U.S., and the world, too.

Almost all Japan's reactors are aging, built on multiple earthquake faults and near active volcanoes.

Most of the existing 500 reactors are old and can shatter like glass ...if many fail, so do we and all life forms in the northern hemisphere, then the southern. And the fallen ones who are the nuclear energy industry and the central banks that provide the credit and reap the annual interest on the national debt and the politicians and fake news both being the apologists for the industry, will have won.

That is why we agree with the twelve gods living on Mt. Olympus.

Just for starters.

And: Is radical Islamic terrorism a G8 distraction from the central banks that finance and own the nuclear energy industry?

## 13. Attention animal lovers

### Introduction, Part 2

Mammals (including human) are targeted, distorted and destroyed by fallout in small exposure amounts, as well as large. As are all Life forms, including animals, invertebrates, fish, reptiles, plants, trees...even bacteria and viruses. All that God has given the breath of life, are tortured and destroyed by the nuclear power industry.

*Isn't it about time for some revenge?*

-3033- Spiders bio-concentrated radioactive silver at 1,000x level in soil;

dead babies and fetuses, war crime far greater than any in recorded human history - (VIDEO)

With recent epidemiological studies suggesting the cancer rate is now 1-in-2, and epidemiological studies citing those living within 25 miles of a reactor or downwind have higher cancer rates, that in utero life, women and girls are more vulnerable to nuclear fallout than men or boys, that there are 60,000,000 excess deaths as a result of ongoing fallout from previous atmospheric nuclear tests, and 100,000,000 cases of cancer, and the death toll from Fukushima fallout in the U.S. is 20,000-to-50,000 excess deaths ... isn't it about time we stop nuclear reactors and put their perpetrators in prison?

Instead, the previous and current regimes are considering building 1,000-to-2,500 additional nuclear reactors ... that is the final solution for Life on this planet, and Life as it was ordained by our Creator, to exist.

This book is a summary of evidence, a book of exhibits in order to publicly try and convict and imprison the perpetrators and their apologists. *We gather here today not to praise the nuclear power industry, but to bury them alive in their own nuclear waste.*

For you to see how the exhibits in this book work, let's take a look at a quick summary of the documentation in Exhibit 9:

The links to the news articles in Exhibit 9 documents how many people in the U.S. died so far from Fukushima fallout in the United States. Then, documents increased infant mortality in Seattle as a result of Fukushima fallout in the United States. Exhibit 9 documents radionuclide 'hot particles', otherwise known as 'fallout'...from Fukushima, deposited in the U.S. and then Arnie Gundersen explains the effect of hot particles on mammals (including human) even when the hot particles are not detected in us. I remember here in Oregon several years ago experiencing a unique 'metallic taste', in my mouth and a strange almost 'electric' feeling in the air ...Arnie documents that is a telltale sign of nuclear fallout, then reassures the Japanese who experienced that in Japan are not imaging it, (as the Japanese authorities, intelligence services, and nuclear industry maintain). In additional documentation, Arnie mentions Marco Kaltofen measuring the amount of hot particles fallen in Seattle, and how the measurements were done – and that will inevitably create lung cancer in Seattle residents, and in Portland, and the Pacific Northwest including all along the Pacific Cascades, and into Vancouver British Columbia ; and how (either in this or a following article) that could have been prevented had the Obama Administration and Canadian politicians not covered it up and people (like you and me) instead had been warned and put on 50-cent filtering masks to avoid ingesting the particles, and taking 50-cent iodine pills to avoid getting thyroid disease and thyroid cancer. The, the documentation draws parallels to increased U.S. infant mortality as a result of Chernobyl fallout, here ...and mortality of birds. This exhibit includes Arnie's concluding statement that 'dilution of fallout and waste' is not the solution, and another concluding statement, by Helen Caldicott, which will drive the weak of heart to drink or even suicide, that the ongoing pollution of the Pacific Ocean by Fukushima fallout will continue, practically, to the end of Time, extinguishing oceanic food chains, then land-based, until we are all, *kaput*.

[Editor's note: Now you see how exhibits work, and what documentation they contain, establishes. You might not win a bar room argument with democrats, republicans or independents ...but, you will eventually meet other aware people whose minds function and are not brainwashed by the *State* (not to mention the nuclear industrialists who control it and central bankers who own and fund it).]

### **Reactors will pour water into Pacific for the rest of time**

10:15 AM Feb 21, 2017

-8847- Scientists fear Fukushima radiation hitting U.S. to worsen - A lot of people are very concerned - Billions being exposed - Reactors will continue to pour water into Pacific for the rest of time. (VIDEO)

Arnie Gunderson, former nuclear engineer, Feb 2, 2017: Gunderson: “When I went to school, the saying was ‘dilution is the solution to pollution’, and that’s what the Japanese believe.

If they dump radioactive water from Fukushima Daiichi on their side and it floats over to the West Coast of the U.S. - the Pacific’s a big place - it’ll dilute out. I don’t think that’s appropriate ...people are going to die.

Regardless of how low the radiation is, it does cause cellular damage and cancer.

If you spread it out in a big body of water, the concentration goes down, but on the other hand, you’ve got a couple billion people exposed to it because they’re on the edge of that big body of water. So, the concentration is down but the population is up and you’re still going to get cancer, and die; it’s inevitable.”

Caldicott: Reactors will continue to pour water into Pacific for the rest of time (VIDEO)

Dr. Helen Caldicott, Feb 13, 2017: As the water flows beneath the damaged reactors, it immerses the three molten cores and becomes extremely radioactive as it continues its journey into the adjacent Pacific Ocean.

Every day since the accident began, 300 to 400 tons of water has poured into the Pacific where numerous isotopes including cesium 137, 134, strontium 90, tritium, plutonium, americium and up to 100 more, enter the ocean and bio-concentrate by orders of magnitude at each step of the food chain... tuna, salmon and other species found on the American west coast now contain some of these radioactive elements... [Fukushima Daiichi] will continue to pour water into the Pacific for the rest of time

# 14.

## **Do Children suffer from nuclear power?**

**Quick Summary: Exhibit 10.** Under Japan’s new secrecy law, reporters are not allowed to change the opinion of the public mind when doing so contradicts the State position; that is *treason*. [Editor’s note: The Japanese nuclear energy industry and global nuclear energy industry are interwoven; consequently, the State (as ‘owned’ and directed by the nuclear

industry and central banks), being inherently and covertly fascist, are now externally and overtly, so ...and, trending in the 21<sup>st</sup> Century.]

### Review of the literature

-4937- Bags of radioactive waste sit on Fukushima coastline - isn't there going to be another tsunami? ...says worker  
<https://cleantechnica.com/2016/03/08/greenpeace-stanford-publish-fukushima-impacts-lessons/>  
"Government massive decontamination program will have almost no impact on reducing the ecological threat from the enormous amount of radiation from the Fukushima nuclear disaster," said Kendra Ulrich, Senior Nuclear Campaigner at Greenpeace Japan. "Already, over 9 million cubic meters of nuclear waste are scattered over at least 113,000 locations across Fukushima prefecture. The Abe government is perpetuating a myth that five years after the start of the nuclear accident the situation is returning to normal. The evidence exposes this as political rhetoric, not scientific fact. Unfortunately for the victims, this means they are being told it is safe to return to environments where radiation levels are still too high and are surrounded by heavy contamination."

Terrible things going on in Fukushima. No one to help us. I talked to local authorities in Fukushima, no one will listen to me; they believe the government [there is no danger]. Radiation is here - it is killing children.

Ex-city mayor, Fukushima rgn: Authorities hiding truth - radiation killing and crippling our children  
(above) Fukushima radiation killing our children - heart problems, leukemia, thyroid  
They are dying of heart conditions, asthma, leukemia, thyroid complications. Lots of kids are extremely exhausted after school, others are simply unable to attend PE classes. Authorities hide the truth from

us, I don't know why. Don't they have children of their own? It hurts so much to know they won't protect our children. This UN report is false. Report made by a representative of Japan, Professor Hayano. Representing Japan, he lies to the whole

world from the UN podium. It's a shame. We need to admit many people are dying; we are not allowed to say that.

<http://rt.com/shows/sophieco/fukushima-disaster-radiation-children-740/>

# 15. Tritium

**Quick Summary, Exhibit 18.** Tokyo dumps 300 tons of radioactive water into the Pacific Ocean, every day. Nuclear waste from Fukushima mixes with waste from U.S. reactors that is dumped into the ocean, then washes up on the West Coast.

(Diablo Canyon dumps more tritiated water into the Pacific than Fukushima Dai-ichi does ...not over the year, but in a several day period. Sources allege that Diablo Canyon lies in its reports to the NRC and says it's dumped over the whole year.)

Tritium rain routinely falls around all operating nuclear reactors, on an ongoing, business-as-usual basis.

There are tritium leaks in 75% of U.S. nuclear energy facilities.

The amount of Cesium in the ocean around Fukushima is 8x higher, two years after the initial event.

## Review of the literature

Exhibit No. 18

01:01 PM Feb 4, 2014 | 146

-7052- Kyodo: Dumping Fukushima radioactive water is Governments only solution - Risk of damaging effects from toxic discharges - Even if fully implemented, around 300 tons of contaminated groundwater will still flow into Pacific every day (VIDEO)

10:00 AM Feb 4, 2014 | 121

-7051- Report: Fukushima nuclear waste will merge with radiation from U.S. reactors when washing up on West Coast - startling amounts released from operating plants - Diablo Canyon officials admit to recently discharging more tritium than Fukushima (VIDEO)

-7049- Dr. Donald Moiser, professor at The Scripps Research Institute (Department of Immunology) and member of Del Mar city

council in California, Oct. 19, 2013 (*at 27:15 in*): The problem with the data is tritium releases are episodic, so they'll have a release of tritium one day a month when they report that to the NRC they'll say this is the amount of tritium we released over the year. You have 5 days of release but you divide that by 365 days it doesn't look like so much tritium, but if you're sitting right next to the plant on the day of release, it's quite a bit. There's some data from Europe that says the spikes are dangerous. There's no data in the U.S. to interpret.

-7050- Bloomberg News, Feb. 3, 2014: Fukushima-U.S. radiation runoff will merge on West Coast - The runoff from the Japanese plant will mingle with radiation released by other atomic stations such as Diablo Canyon in California. Under normal operations, Diablo Canyon discharges more

radiation into the sea, albeit of a less dangerous isotope, than the Fukushima station - startling amounts are released into the environment by the 435 nuclear power plants worldwide - Diablo Canyon plant in San Luis Obispo discharged 323 million liters of water into the Pacific in 2012, or about 870 tons a day, according to data from its operator, PG&E - that water contained 3,670 curies of tritium, or 136 trillion becquerels, according to the company, almost three-and-a-half times the amount released from the Fukushima plant into the ocean in the period starting May 2011. The plant also discharged cesium-137 and strontium-90 though at lower levels than Fukushima.

radioactive rainfall occurs around nuclear plants during normal operations (VIDEO)

When a nuclear power plant operates, it creates tritiated water.

All reactors release tritium on an ongoing basis.

Tritiated air can penetrate your skin then bond with moisture.

Or, the tritiated air picks up moisture and rains down as fallout ...there is tritiated rain fallout near atomic reactors across the U.S. and all over the world.

*The public doesn't even suspect.*

---

Tritiated water crosses the placental barrier. It hits all the organs and lodges particles in your organs

---

Tritiated water crosses the placental barrier, it stays in the body when organically bound.

Tritiated water crosses the placental barrier and hits all the organs and lodges particles in your organs. Although the industry says tritiated water stays in your body for 50 days; reliable sources proved it stays in your body for several years.

## 16. Yes, we have no Obama ...Hillary or Trump reactor presence of mind

### What is the sound of no hands clapping?

**Editor's note:** Both Obama Administrations and the Hillary Clinton State Department official position was that no airborne or seaborne Fukushima fallout ever reached the United States in any significant amount to be dangerous, and that the nuclear energy industry is safe and clean. Is the Trump Administration and Tillerson State Department any different? It's still plain old Kissinger/Globalist G-8 nuclear hardball.

President Obama went to Hiroshima in his historic visit. He did not mention radiation in Hiroshima; he didn't mention the Fukushima meltdowns. He was in denial.

---

[The Obama Administration,] the Nuclear Regulatory Commission and Department of Energy ...the U.S. agencies are complicit in their cover-up in Japan ... *is Trump?*

---

Japan, the U.S. Government and the G8 won't retard their commercial interests in nuclear energy, because they are retarded.

## **Westinghouse (Toshiba) building new nuclear plants in China**

Westinghouse is building all the new nuclear plants in China; they're touting and marketing their nuclear products all over the world. And, Japan is too. Westinghouse is owned by Toshiba and they're in Japan and General Electric is owned by Hitachi.

## **Westinghouse is owned by Toshiba in Japan General Electric is owned by Hitachi in Japan**

In the midst of nuclear slaughter in Japan and the Pacific Ocean, Japan keeps selling nuclear plants and services globally ...just like the United States.

# **17. Welcome to my world**

June 14, 2016 <sup>a</sup> - Just before the 5th anniversary of the triple meltdown at Fukushima Daiichi, a group of young girls in the city of Minami-Soma rode their bikes to school past a shocked and saddened pedestrian. That upset observer was Arnie Gunderson, a nuclear reactor scientist.

"What surprised me this visit to Japan is the decontaminated area is contaminated again," Mr. Gunderson said. "This was not what I expected. I thought we would not find such high doses of radiation in the decontaminated area. Sadly, our results prove otherwise."

Gunderson collected samples of dust (official data cannot be released before publication of a scientific paper.) It is evident high doses of radiation, usually found in nuclear waste was detected.

This means highly radioactive dust is flying around the city.

The decontaminated land is contaminated again.

---

**"Little girls affected by radiation 20x more than adult men,"  
he said.**

---

<sup>a</sup> *Gendai Business Online* ([article in Japanese](#)) [Editor's note: the following has been shortened and the translation from Japanese into English clarified by the editor.]

“Little girls are affected by the radiation 20x as much as adult men,” he said.

The Japanese government’s standard of 20 mSv is based on exposure assessments for adult men. The girls on their bicycles are actually getting radiation dose equivalent to as much as 400 mSv.

Gundersen pointed out human lungs are heavily affected by internal exposure to radiation. Adding, “At this visit, I wore a radiation proof mask that can filter out 99.98% of radiation for six hours. I sent my filter to the lab; they found a high dose of Cesium.”

The Japanese government only cares about external Geiger counter readings; it does not consider internal exposure. But, our lungs are severely affected by internal exposure.

“The radiation from the mountains is coming back to the city by way of wind and rain,” he said. “The mountains are very radioactively contaminated.”

Vegetables grown in that area exceed the government’s standard by 1500 Bq. These vegetables are sold at the Michino Eki in Tochigi prefecture, and the bamboo shoots grown in this contaminated region are used for elementary school lunches in Utsunomiya. These school lunches contain more than twice as much radiation as the government standard. But, the government continues to push for ending people’s relocation, and force them to return to the re-contaminated areas.

Gundersen found Tokyo remains contaminated. He measured dust there and found high radiation. That dust is in the air and will be inhaled by visitors and athletes of the 2020 Olympic Games.

Current residents inhale it every day.

British government (G-8) plan to play down Fukushima - work behind scenes with multinational companies: EDF Energy, Areva, Westinghouse- hide truth to prevent incident undermining public support for nuclear power

# 18. Monju (Godzilla)

Monju is a breeder reactor ...it ran for a couple months in the 90's. The Japanese gave up ...but the Japanese myth persists that if they can have a successfully running breeder reactor, then, they can recycle all the uranium and won't need to have a nuclear dump for spent fuel.

All of Japan's 64 reactors sit on or near active earthquake faults, in or by tsunami zones, and often beside active volcanoes. It is not a question of 'if', there will be more accidents like Fukushima Dai-Ichi ...but, 'when?'

<http://www.nucleartourist.com/world/japan.jpg>

64 nuclear reactors in Japan; Monju site (not shown) sits on 7 earthquake faults, is sodium-cooled, uses plutonium fuel, designed to produce fuel for Japan's 63 nuclear plants, and as a commercialization prototype.

Reuters-1, Reuters-2

<http://www.nucleartourist.com/world/japan.jpg> 64 nuclear reactors in Japan; Monju site (not shown) sits on 7 earthquake faults, is sodium-cooled, uses plutonium fuel, designed to produce fuel for Japan's 63 nuclear plants, and as commercialization prototype.

# 19.

## Is Trump reactor-friendly, or not?

---

Climate-aware nuclear fans like Dr. James Hanson promise next generation nuclear reactors will be safe and power all of the world's needs. Everybody can claim next generation nuclear is going to be better than the last 70 years, before. There's always another gimmick in the nuclear industry. – Arnie Gundersen

---

Gundersen: *Oh, the next one's going to be cheaper and on paper, I can prove it.* When it gets out in the field, it's not cheaper.

Dr. Hanson was the first person to tell Congress the world is increasing in temperature because of carbon dioxide. Now, he's got a chair at a university funded by a prominent nuclear sponsor. Hanson proposes the solution is nuclear power.

On the other hand, watch, *Smokescreen*<sup>a b</sup> (a two-minute animation).

---

**“But, building 1,000 new nukes? ... Hanson wants to build 2,500. A thousand new nukes, is a nuke every twelve days for the next thirty-five years. And, 2,500 is a nuke every three or four days for the next thirty-five years.” --Arnie Gundersen**

---

A thousand new nukes is \$8 trillion.

Hanson's number would be 2-1/2x that, or \$20 trillion.

Hanson doesn't look at better uses of the money.

Nuclear is not the solution; it's the problem.

### **Terrified to think about effects of radiation on in utero children and babies born in Autumn**

An editorial says it's hard to imagine anything more frightening than 5-year-olds marching off to irradiated school playgrounds with Geiger counters strapped to their chests. Locals are terrified to think about effects of radiation on in utero children and babies born in Autumn. In the U.S. four months after Chernobyl, there was a huge spike in U.S. infant mortality rates; similarly, excess U.S. baby deaths following the Fukushima fallout is 20,000. In the Pacific Northwest, there was a 35% infant mortality spike post-Fukushima.

Fifty miles away from Fukushima Dai-ichi, children are suffering nosebleeds, diarrhea and lack of energy. A measurement of 6.46 microsieverts/hr is detected in the outskirts of Tokyo, a few meters away from children on a playground.

### **Fake UN fallout report says no radiation- related deaths or diseases among workers and public**

*April 2014*, A United Nations report on radiation fallout from Fukushima says  
there are no radiation-related deaths or acute diseases among exposed workers  
in the TEPCO Fukushima reactor facility and in the exposed general public.

### **Two million people have medical issues**

Katsutaka Idogawa, former Futaba mayor in Fukushima Prefecture,  
disagrees: there are two million people still living in the prefecture, who have  
medical issues. Authorities claim this has nothing to do with Fukushima  
radioactive fallout. I demanded authorities substantiate their claim in writing;  
they ignored my request. There are terrible things going on in Fukushima. The  
biggest problem is that there is no one to help us.

Interview: Katsutaka Idogawa, former mayor of Futaba, Fukushima Prefecture.

### **Radiation is still there - it is killing the children**

I talk to local authorities in different places in Fukushima; no one listens to  
me. They believe what the government says, while in reality radiation is still  
there —it is killing the children.

### **Kids dying of heart conditions, asthma, leukemia & thyroid complications**

Children are dying of heart conditions, asthma, leukemia, and thyroid  
complications. Lots of kids are extremely exhausted after school, others are  
unable to attend PE classes. Authorities still hide the truth from us. I don't  
know why.

Don't they have children of their own? It hurts so much to know they can't  
protect our children. This UN report is false.

This report was made by a representative of Japan, Professor Hayano.  
Representing Japan, he lies to the whole world from the UN podium. It's a  
shame, authorities hide the truth from the whole world, and from the UN. We  
need to admit that many people are dying; we are not allowed to say that.

07:16 AM Apr 21, 2014 | 97

-8184- Fukushima radiation killing children - heart problems, leukemia, thyroid - terrible things are going on - authorities hiding truth from world - we need to admit many people are dying, but not allowed to (VIDEO) There are some terrible things going on in Fukushima. The biggest problem is that there is no one to help us. I talked to local authorities in different places in Fukushima, but no one would listen to me. They believe what government says; but, radiation is there - it is killing children. They are dying of heart conditions, asthma, leukemia, thyroid complications. Lots of kids are extremely

exhausted after school, others are simply unable to attend PE classes. But the authorities are still hiding the truth from us, and I don't know why. Don't they have children of their own? It hurts so much to know they can't protect our children.

### **Strange tumors, kids and pets dying - doctors threatened for blaming Fukushima radiation**

*October 2014, "Truly Frightening":* Doctors being threatened for linking illnesses to Fukushima. Strange tumors, kids dying, pets dying. Much higher incidences of whole range of health problems reported. 1,000,000 cancers, many ailments possible.

12:43 PM Oct 28, 2014 | 154

-8478- Doctors being threatened for linking illnesses to Fukushima - Strange tumors, kids dying, pets dying - Much higher

incidences of whole range of health problems reported - experts: 1,000,000 cancers - many other ailments possible (AUDIO & VIDEO)

### **My newborns died within hours, tumors all over, brain disintegrated after massive stroke**

*December 2014,* Cemetery blocks filled with babies downwind of U.S. nuclear site. This needs to be talked about, the children ... murdered. My newborns died within hours, tumors all over, brain disintegrated after massive stroke. Body parts, cadavers, fetuses, the nuclear industry took in the dead of night from all over U.S.

02:33 PM Dec 16, 2014 | 601

-8525- Video: Cemetery blocks of dead babies downwind of U.S. nuclear site - newborns died within hours, tumors all over,

brain disintegrated after massive stroke; body parts, cadavers, fetuses... the nuclear industry took in dead of night all over U.S.

### **Mom: "I'm worried ...children not the same sick nosebleeds, rashes, white blood cells decreased**

*March 2015,* Officials lying, many kids getting cancer after Fukushima: 1,200+ deaths from "illness caused by prolonged exposure." Mom: "Worried; children not the same; sick; nosebleeds; rashes; white blood cells decreased."

10:28 AM Mar 11, 2015 | 231  
-8585- TV: Officials lying, kids getting cancer  
- Report: 1,200+ deaths from illness caused  
by prolonged exposure - Mom: I'm really

worried... children not the same... sick...  
nosebleeds, rashes - white blood cells  
decreased - Radiation by school 100 times  
normal (VIDEO)

### **Surge in babies born with extra arms, legs in Fukushima**

*April 2016*, Surge in babies being born with extra arms, legs after Fukushima. "I feel officials know the cause is radiation." Nurse says many are getting abortions to avoid 'inconvenient' babies. "High number of stillbirths" Many people reporting cancers, even far away from Fukushima.

08:14 AM Apr 18, 2016  
-8806--8806.2- TV: Surge in babies born  
with extra arms, legs after Fukushima - I feel  
officials know the cause is radiation - many

get abortions to avoid 'inconvenient' babies -

### **Astronomical radiation in downtown Tokyo - extreme levels found where food grown for school lunches**

*August 2016*, Astronomical amounts of radiation found in downtown Tokyo, directly outside government building. 'Horrorific' readings where kids play in Fukushima; 'extreme' levels found where food is grown for elementary school lunches. Nuclear expert shocked, upset by discovery.

12:10 PM Aug 22, 2016 | 628  
-8827- TV: Astronomical radiation in  
downtown Tokyo - directly outside gov't  
building - 'Horrorific' readings where kids play  
in Fukushima, 'extreme' levels where food  
grown for school lunches - nuclear expert  
shocked, upset by discovery. Gundersen  
found Tokyo remains contaminated -

measured dust and found high dose of  
radiation. That dust (that continually blows  
down from the mountains) is in the air that  
will be inhaled by the visitors and athletes of  
the 2020 Olympic Games. Current residents  
inhale it every day (VIDEO-CCTV Channel  
17 interview)

## **21 . Hillary caught poisoning U.S food supply**

[My article, *Hillary caught poisoning U.S. food supply*, under consideration by the editor-in-chief of *National Inquirer* (now sits in their slush pile.)]

Codenamed 'H' in WikiLeaks recovered emails (and according to Trump, as 'Evergreen' in NSA emails), Hillary's former State Department ratted her out and leaked her shady deal.

She figured Japanese food products too poisoned to eat in Japan would be fine for U.S. families to eat.

“The previous Administration came up with a decision at the highest levels of the State Department, and other departments to downplay Fukushima,” said Arnie Gundersen of Fairewinds.com in a SolarIMG interview.

“The Clinton State Department source said Hillary Clinton signed a pact with her counterpart in Japan, agreeing for the United States to continue buying food from Japan, despite that food not being properly tested for radioactive materials,” he said. “So we are not sampling the food coming into the United States” ...that other countries refuse to accept because it’s poison.

FDA Import Alert 99-33 (always under revision), includes: beef, poultry, fish, clams, sea urchin, rice, grains, breakfast cereals, vegetables, milk, milk- and infant milk products, mushrooms, seaweed, spinach, lettuce, celery, cress, endive, escarole, chard, collards, leafy vegetables, turnips, broccoli, cauliflower, mushrooms, bamboo shoots and Kiwi fruit.

Which, if eaten causes immune deficiencies, diseases, cancers, untold suffering and death ...(like what U.S. sailors stationed offshore the Japan meltdowns on U.S.S. Ronald Reagan, experience).

BEEF SIDEBAR

BANNED FOODS SIDEBAR

WikiLeaks

Hillary knew better; and should have cared about protecting us ...but didn’t.

An email leaked by WikiLeaks shows Hillary knew what was up. On Mar 12, 2011, Cheryl Mills sent an email to Hillary with explicit instructions not to forward it. Note the *Secret* classification, and instructions not to declassify until 3/12/2031.

WIKILEAKS EMAIL SIDEBAR

Hillary’s Fukushima emails from hell

Could Hillary’s missing Fukushima emails be hiding at the six intelligence communications centers around the world that record every single phone call and digital transmission made?

Hillary’s missing emails say more by their absence.

The blackout of Hillary’s Fukushima emails was so important to her, she committed a crime by not providing them under subpoena, nor warning American families she is now poisoning.

END OF STORY

BEEF SIDEBAR

Timeline: Beef over radioactive limits -- U.S. EPA to raise amount of radionuclides allowed in U.S. food

03/12/11, Email from Cheryl Mills to H.

07/18/11, *Yomiuri Shimbun*: Government: We never thought that straw cows eat would be a source of radioactive contamination”

07/22/11, *Japan Times*: Internal radiation dose of 80 milliSv is result of eating 2 pounds of radioactive beef – (INTERNAL exposure).

02/03/12, *Nature* (International Weekly Journal of Science): 70,000 reports of suspected health damage yearly among German nuclear workers exposed to less than 20 milliSv – (EXTERNAL exposure)

07/17/12, *NHK World*: U.S. halts shipments of Japanese beef in the due to radionuclide contamination concern (VIDEO)

10/14/12, *NHK World*: Fukushima beef being shipped to U.S. restaurants

10/18/12, *Jiji (Japan Times)*: Miyagi Prefecture, the prefectural government tells farmers to not ship beef.

### **BANNED FOODS SIDEBAR**

09/09/13, FDA Import Alert 99-33 rev 9/9/13: *Detention without Physical Examination of Products from Japan Due to Radionuclide Contamination*

09/28/13, FDA Import Alert 99-33 rev 9/28/13: Bans Agricultural and Fishery Products from 14 Prefectures in Japan into the U.S. due to Fukushima radionuclides.

05/09/15, <http://en.people.cn/n/2015/0509/c98649-8889831.html> Revision to alert is due to radionuclide contamination. *People's Daily*: "According to Import Alert 99-33 issued by U.S. FDA, is a list of Japanese food to be banned unless it passes physical examination.

05/12/15<https://nuclear-news.net/2015/05/12/us-follows-hong-kong-and-taiwan-to-restrict-food-import-from-japan-over-radionuclide-contamination-concern/> Comment: "If things get too hot with exports to the U.S. from Tohoku and Kanto contaminated regions, Japan will likely change the origin address of products to Kansai, Chubu, Chugoku, Shikoku and Kyushu" ...to pass contamination controls. Or, they may mix contaminated products from one area with lesser contaminated products from another (as done in Chernobyl), to get acceptable levels to enter the U.S. ...as they do in Japan with rice." U.S.A relies on certificates of origin, not questioning data, and seldom monitors radionuclide levels of all incoming food stock.

12/29/16, FDA Import Alert 99-33 rev 12/29/16: Detention without Physical Examination of Products from Japan due to Radionuclide Contamination. Reason for rev: removes items from list of products restricted by Japan for export to U.S.

<>

EPA under the Obama Administration, pushed legislation to raise amounts of radionuclides acceptable in U.S. water and food products, far below Federal safety standards established about 77 years ago.

From a guy we know here in japan who does background searches for us etc...

This is not advice that is currently in the news. You've met the source before < > Also by coincidence, I have a

1.4(C)  
B1

Radiation leak from the Fukushima reactor,

Stay indoors if at all possible. There is nothing, no events, parties, sports, movies, etc that are worth getting more exposure to radiation. The stuff travels far, very far.

1.4(C)

B1

Wind is all over the place, but we must assume it is heading towards a major area like Tokyo, a city, a heat source.

As long as the radiation leak is going, and up to 24-48 hours later, the threat is at its highest in most cases. Here is a wind chart online. It shows wind all over the place, but one trend is there - winds head to Tokyo.

[http://www.surfline.com/weather-forecasts/japan-wind-chart\\_2731](http://www.surfline.com/weather-forecasts/japan-wind-chart_2731)

Also, power outage expected to hit about 1800 this evening as more people return home and start using more electricity. Charge any devices you have that need charging. People will draw a lot of power about 1800-1900, so expect blackouts and brownouts. Get your flashlights ready, with new batteries.

Very similar to 3-Mile Island, and maybe Chernobyl. VOA news has this take.

<http://www.voanews.com/english/news/asia/Japans-Tsunami-Death-Toll-Seen-Reaching-1000-117829978.html>

Leak has been doing since last night. It is still not under control. A US team was flown in to help get this thing under control, but that is not public record yet. It will come out later, I think.

Anyway, leak from last night means it is hitting us about now. I am not going outdoors for a while.

Normally one might also take K-I (Potassium Iodine) tablets as a precautionary measure. Substitutes include alternative sources of iodine including *isojin* or consuming seaweed (*nori*).

Wear a mask, and a hat if possible. Take a shower immediately after you return home and wash your clothes. Radioactive steam was released yesterday and continues today. It will likely be in the area now. What I suggest above is not costly, and not too onerous. Do it and play it safe.

Don't go outdoors unless it is necessary.

Mitch

Official government source of emails from Nukepro; Nukepro’s conclusions, (<https://foia.state.gov/Learn/New.aspx> ):

- 1) Hilla  
ry was well advised what the risks are, and what precautions to take.
- 2) After  
initial emergency, they focused on economic impact and impact to the nuclear industry.
- 3) The  
first two emails urging the trip were followed by a complete blackout on emails related to her trip (for three weeks we checked). *This blackout of the Fukushima-related trip to Japan was so important, it required committing a crime to not provide these emails under subpoena.*

01:17 PM Nov 3, 2014 | 143  
-8485- Food products heavily contaminated by Fukushima found in U.S.; Over 30,000 pCi/kg of cesium, also had Cobalt-60 and

Antimony-124; *FDA: We found no Fukushima contamination in U.S. food supply during routine monitoring*

## 22. Hillary does Japan

**Stationed in Japan with explicit nuclear directives to impose from the Obama Administration**, Secretary Clinton was briefed by email from Cheryl Mills it was too scary to go outside or to a movie, or to dinner. “...This stuff is lethal.”<sup>a</sup>

She went over her to-do list:

<sup>a</sup> See Chapter 21.

Follow Kissinger's directive to tell the Japanese government to abandon their plans to be nuclear free by 2030 or it would displease the Obama Administration.

01:06 AM Oct 2, 2012 | 78

-4411- Sec. Clinton personally pressures Japan leader to keep nuclear power as President Obama wishes it  
September 25, 2012 Nikkei report translated by EXSKF:

It has been revealed that the United States government was strongly urging [the Japanese government] to reconsider its policy of "zero nukes in 2030s" which was part of the energy and environmental strategy of the Noda administration, as "President Obama wishes it"...

According to the multiple government sources, as the Noda administration was moving in August toward explicitly putting down "zero nuke" in the official document, the US strongly requested that Japan reconsider the "zero nuke" policy, saying the request was "the result of discussion at the highest level of the government", indicating it was the Obama administration's consensus, from the president on down.

On September 8, Prime Minister Yoshihiko Noda met with the U.S. Secretary of State Clinton during the APEC meeting in Vladivostok in Russia. Here again, representing the US president, Secretary Clinton expressed concern. While avoiding the overt criticism of the Noda administration's policy, she further pressured Japan by stressing that it was President Obama and the US Congress who were concerned...

(According to Former Deputy Energy Secretary Martin,) the US government thinks that "The US energy strategy would be more likely to suffer a direct damage" because of the Japan's policy change toward zero nuclear energy.

[GUNDERSEN ON FUKUSHIMA FISH SALES AND REACTOR'S BUCKLING BUILDING](#)

Five O'clock Shadow with Robert Knight - Jun 28, 2012

At ~18:45 in

<http://www.radio4all.net/index.php/program/61062>

In a startling mix of market forces and nuclear therapy, the Japanese government is now allowing the sale of seafood from Fukushima, where radioactivity continues to

be released daily into the Pacific from the doomed Fukushima Daichi nuclear power stations. Officials and merchants insist the locally sold octopus and snails are safe for consumption. But a new study shows alarming levels of hot cesium, strontium and plutonium in local anchovies, crabs, and other marine species. However, sea bass off the coast of Japan are being thrown back for exceeding radiation limits, and hot Bluefin tuna have now traveled all the way to the U.S. west coast, Nuclear expert Arnie

Gundersen of Fairewinds Associates fairewinds.com has the latest details:

Here in the United States we have this 'don't ask, don't tell'. We don't ask the Japanese what's in it, and they don't tell us. But the South Koreans are banning imports of Japanese seafood.

I've been told by people in the State Department last year that they were told by the U.S. government to downplay the health effects of radiation. And so I think we've really gone out of our way not to measure

Tell the Japanese government in return the U.S. would not test any Japanese food products coming into the U.S. for ionizing radiation even though they're being tested and refused by neighboring countries.

Tell them Obama said they should do nothing to cause the share price of TEPCO (Tokyo Electric Power Company) to fall further.

See if the Japanese are on track with their illegal production of Mox-based (oxygen-enriched) nuclear fuel used to manufacture 'clean' nuclear bombs.<sup>a</sup>

Ensure Japan's program to mass produce and commercialize breeder reactors to the world was on track.

And figure out what was wrong with Japan's Monju reactor, their prototype fast breeder reactor. After all, the owners of the nuclear power industry hadn't secretly been supplying nuclear power equipment to Japan and Iran since 1950, for nothing.

Yes, that was about it for this trip.

Then status Kissinger when she returned home and he would tell ...whom? ...and of course connect some of the dots for Obama.

She knew she was not alone; the CIA was there as well, to tell the Japanese how to deploy domestic psyops<sup>b</sup> techniques humming the pre-internet mantra of Bill Casey and transfiguring it into Japanese doublespeak: *'We will know when our domestic psychological warfare operation has succeeded when everything the ~~American~~ Japanese<sup>c</sup> people believe to be true, is a lie.'*

<https://dcbureau.org/201204097128/national-security-news-service/united-states-circumvented-laws-to-help-japan-accumulate-tons-of-plutonium.html>

United States allowed Japan access to the  
United States' most secret nuclear weapons  
facilities while it transferred tens of billions  
of dollars-worth of American tax paid  
research that has allowed Japan to amass  
70 tons of weapons grade plutonium since

Their latest slogan was being successfully deployed and repeated by  
Japanese school kids to their parents every day: *'Radiation does not harm people  
who smile, only those who have an unhappy outlook on life.'* Educated doctors  
returned home to find their children brainwashed, thanks to the CIA and the  
people they work for ...which are?

[Editor's note: Answer - Rothschild's G8 central banks and G8-driven Bank of International  
Settlements; the Rockefeller's IMF, Export-import Bank, and World Bank; ...and now, the  
largest Chinese banks functioning as a G8 money, arms, drugs, oil and human trafficking  
laundry ...(having replaced BCCI-ICCI), and all serving together as a nuclear energy industry  
laundry representing the demons of hell winning a battle against DNA and Divine Order.]

The U.S. had considered helping evacuate everyone in Tokyo and relocating  
them ...but, where? The Japanese government considered relocating itself  
somewhere safer. But in the end, it was cheaper to quietly sacrifice a few  
generations of Japanese, and far better for business. And that would ensure  
Japan hosting the 2020 Olympics. Their legislators suggested turning the  
stricken nuclear power facility into an amusement park testifying to clean and  
safe nuclear power. Simply not say the Olympic sites would remain permanently

the 1980s, a National Security News Service  
investigation reveals. United States has  
known about a secret nuclear weapons  
program in Japan since the 1960s,  
according to CIA.

## 23. Edo does himself – at war with the earth and sky and water

Japan's prime minister blamed the nuclear catastrophe on America for blacking out those portions of the GE Mark 1 nuclear reactor operations manual warning of the design flaws inherent in the GE Mark 1. He swore the U.S. told him to dump waste into the sea, bury it, and burn it up into the sky.

After three of six reactors melted down on day 1, the melt-downs were denied by TEPCO<sup>a</sup> for months; *the Japanese population kept smiling*. Yakuza gangsters supplied drunks and homeless to work in the reactors, and mentally infirm to whom they issued no protective gear and deducted for room and board until all wages were taken ...because sane and sober people refused to work there. It was an instant ticket to death. *The Japanese population kept smiling*.

Job ads promising lucrative wages failed to mention where the job was located. New hires didn't know they would be scrubbing down contaminated facilities and sites and landscapes. There was no need to train them. It was made clear to people 60 or over, they were kamikaze and being *old* were, therefore, expendable. Drunks with the shakes and DT's working in the lethal plants, hurrying back from buying liquor onsite, struggled to remove damaged fuel rods from the reactors, where one false move bumping together two fuel rods could result in an explosion.

Japan passed a secrecy law making it illegal for journalists to *force* an opinion upon anyone or to otherwise threaten the State. Words like, 'meltdown', were censored and not allowed to be spoken by the press. Doctors were told not do any thyroid tests on children, because it would give people the wrong idea, by suggesting there were any health consequences to the three meltdowns that never happened. If doctors mentioned the word, 'radiation', in any of their diagnostic reports, the State would not pay the bills. Doctors and nurses were forbidden to talk about ... or even keep records of ... mutated fetuses being aborted at increasing rates, and more and more children delivered with extra fingers, toes, arms, legs and heads, termed, '*inconvenient*' births.

### ***What? Me worry?***

Eventually, people were required to move back into the forbidden zones from which they'd been evacuated in order to continue receiving monthly checks from the government. It was of no concern the forbidden zones were more contaminated after they were decontaminated than before ...re-contaminated as radionuclides continually rained, washed, or blew down from the mountains, practically forever. Hundreds of thousands of giant bags of contaminated dirt and debris line the countryside and beaches, waiting for next tsunami to strike.

Unspoken, plutonium dust covered the forbidden zones, and 150 miles away covered Tokyo, too ...everyone lived in dangerously radioactive homes, kids played in ubiquitous plutonium dust sterilizing their reproductive organs, went to radioactive schools and ate radioactive food grown locally in radioactive dirt, smiling away their radioactive Time to keep healthy. Kids and adults alike were told their nosebleeds and rashes and constant coughs and continual vomiting and diarrhea for weeks and months were from 'bad nerves'. They were ridiculed by doctors, nurses and friends for even mentioning the word, 'radiation', or 'radiation sickness'. After that came pneumonia, heart attacks, thyroid disease, and cancers of the liver, eye, breast, prostate and other organs, bone and brain, and melanoma.

*This plutonium dust awaits the 2020 Olympians, and their audience. Could she augur their Fate? Can you?*

Hillary didn't have to tell Obama everything, did she?

Or, if she did, he wouldn't have to tell us ...did he?

Besides, what the Democrats and Republicans and especially the 'Deplorables' didn't know, wouldn't hurt her ...would it? It would hurt them. She was taking precautions. After all, the U.S. was censoring the danger, too, in our homeland.

Japan learned well from CIA: deny everything. Japan imported an idiot professor from the USA preaching nuclear fallout is good for you. The Republican Party chair in Oregon is not stupid and follows suit. He wants to drop nuclear waste from airplanes to improve the health of Oregonians, and spread it throughout the water supplies to improve our immune responses. The nuclear power industry is chanting a smothering chorus in unison around the world: '*Nuclear power is safe and clean and green.*'

<>

[Author's note: Lord of Hosts, *all* the nuclear plants are fatally leaking (legislatively permitted levels of) tritium *in addition* to accidental leaks. The nuclear dumps are blowing up. The nuclear power sites are brittle with age and can shatter like glass at any moment.

[Some Christians steeped in faith *believe* this is the end time fulfillment of Biblical prophecy, that two-thirds of the fish of the sea will die and earthquakes and volcanoes and meteors and floods and world wars will consume the Earth and most of mankind, followed by 1,000 years of peace.

[On the other hand... could Trump make this the first decade of 1,000 years of peace? Can Trump eliminate nuclear power plants because they are too expensive, and instead use alternative power, that is much cheaper? Providing jobs and prosperity along the way.]

## 24. Smokescreen<sup>a</sup>

### ***Thoughts from Arnie Gundersen***

In the next 10 years, as many as 30 nuclear power plants are going to shut down because they just don't make economic sense. What are we going to do with them? There's no real plan to protect the community.

### ***Smokescreen***

Nuclear power is not cost efficient. Renewables are much more cost efficient and can be built in a much shorter time span than nuclear can. Here's a summary by Fairewinds.org from November 16, 2016, of the work of ten researchers over 18 months, from the Fairewinds two-minute, short animation, *Smokescreen*:

---

<sup>a</sup> <http://www.fairewinds.org/nuclear-energy-education//smokescreen>

In 2015, human activity released 35,810 million tons of CO<sub>2</sub> into the atmosphere. In order to avoid catastrophic climate change, this number must quickly be reduced (to 22,000 million tons). Currently, our CO<sub>2</sub> production grows by 2% every year (730 million tons) as people worldwide seek a more affluent lifestyle.

The World Nuclear Association (WNA) has a plan to solve this problem: building 1,000 new nuclear reactors before the year 2050.

That means we would need to build a nuclear power plant every 12 days for the next 33 years.

Our existing reactors (438) offset only 3 percent of global emissions.<sup>a</sup> Every time a new reactor goes online, our carbon footprint goes down slightly, and only by 7/1,000 of 1 percent.

Along the way, outdated reactors must be decommissioned; the deadly waste must be tended in perpetuity; and each new reactor built will increase the probability of atomic disaster somewhere in the world. Constructing this infrastructure will cost \$8.2 trillion dollars (\$8,200,000,000,000). Even after spending all this money and waiting all this time, by the year 2050, these new reactors will have offset only 3.9 GT<sup>b</sup> of CO<sub>2</sub>, which is less than 10% (9.3%) of the reduction we will need.

The nuclear industry touts CO<sub>2</sub> reduction to 'green-wash' its agenda.

For the nuclear industry, being paid \$8.2 trillion dollars over 33 years is good business. For humanity, it is an opportunity lost - precious time and money wasted on the wrong thing.

If we follow the World Nuclear Association, another generation will pass and climate change will only get worse. We already have clean, cheap, and timely ways to reduce CO<sub>2</sub> emissions, and nuclear power is not one of them. The nuclear energy solution to climate change is a smokescreen.

## **25. *Passover: Nuclear power is not safe and clean***

### **Yes, we have no Obama, (we have tritium)**

*When Fukushima fallout clouds like the Angel of Death passed over from Japan to North America not one safety alert was given nor a single safety measure taken for the general population of the United States. But, DNC and RNC secretly used emergency radiation testing at the Democrat and Republican national conventions for seafood, meat, vegetables, milk and water.<sup>5</sup>*

*On Election Day 2011 as votes were being counted, Helen Caldicott was live on TV saying half of Japan is contaminated with radionuclides, and news about*

-2317- 20,000 excess U.S. deaths after Fukushima, not 14,000? ... looks at age groups, cities

### **Yes, we have no bananaz**

The Director of U.S. Homeland Security said, 'Bananas are more dangerous'. The Alaska Department of Environmental Conservation agreed and refused to test.

Edward Morse, professor of nuclear engineering at University of California Berkeley, said, 'Nobody is exposed to any dangerous levels of anything. If an individual were to regularly drink water from the outer harbor around Fukushima for a full year the radiation exposure would be equivalent to flying in an airplane for a few hours. And: a single banana naturally contains higher rates of radioactivity than a roughly equivalent amount of that contaminated harbor water next to the stricken Fukushima nuclear power plant.'

### **Fake news: Sleeping by someone more radioactive than ingesting Fukushima fallout radionuclides -- not**

Local TV news near a leaking California nuclear plant included bananas, granite, and sleeping next to someone ... were all more dangerous than

breathing, eating, touching or being next to radionuclides ...insisting that exposure under 100 milliSv/yr was safe.

They don't appear to know about 70,000 reports of suspected health damage every year among German nuclear workers exposed to less than 20 milliSv each year ...but you do.

Then Chairman of the Oregon Republican Party wanted to drop nuclear waste from airplanes over Portland for health benefits and to take radionuclides from California's San Onofre facility and put them into Portland Oregon (un-fluoridated) drinking water. Weird-o.

### **Portland (Oregon)**

Portland (Oregon) is cited as having the most Fukushima fallout in the United States, as much as countryside beside Fukushima. But, so is Denver. And, so is Florida. An organic farm closes in southeast Portland because the soil is contaminated from Fukushima fallout. Infant mortality rates double in Seattle and Vancouver, British Columbia and water aquifers crossing down into Seattle are now permanently unsafe to drink, at least for the next several thousand years. Milk in San Francisco Bay Area, Denver, Texas, Florida, and across the country exceeds EPA radionuclide safety levels. Epidemiologists measure 14,000, then 20,000 excess deaths across the U.S.A. from Fukushima fallout, and predict 1,000,000 cancers in Japan.

### **From Alaska to Mexico**

And from Alaska to Mexico, thousands of whales, dolphins, seals, sea lions, fish, starfish, tuna, salmon, are riddled with lesions, suspended dead or dying beneath the surface of the water or washing up in death throes in the surf onto the shorelines, pressed into the sand in a death mask.

### **Review of the literature**

Exhibit No. 21

10:03 AM Jun 18, 2011 | 19

-771- Pasture grass contaminated with cesium above safety standard 200 km from

Fukushima plant - Radiation levels over safety limits in many locations

Equally horrific, the skin is falling off horses in Northern California just like it is falling off seals offshore ...and the horses and seals are covered with lesions and tumors ... both are mammals ... as are the people in Japan ...all mammals suffering the same Fukushima radiation sickness, illnesses, cancers, fetal mutations, stillbirths and unbridled anguish.

### ***There is no danger here in the United States***

*There is no danger here in the United States.*

Suddenly, rising up from the grave, unburied epidemiological reports appear that document prior nuclear testing killed 60,000,000 people worldwide and caused 120,000,000 cases of cancer. Plus a few million more dead fetuses and stillbirths, give or take several hundred thousand baby souls.

Faced with the West Coast covered in actively hot contamination not to mention Pacific Northwest mountain ranges and the rest of the country, mainstream scientists race to say, *'It's not from Fukushima, it's simply residual from prior nuclear tests'*. Fukushima fallout has unique identifiers, proving them wrong. But, they slipped up: ubiquitous residual radiation from prior testing still contaminating our food and water supply and spiking our cancer rates daily is supposed to be a *secret*. As are all the studies that show increased infant mortality rates after every nuclear test for 75 years. The rise in Swedish cancer rates allegedly parallel the rise in nuclear testing, (allegedly no other country has publicly available records from 1950 to date).

### **Women and girls more likely to get cancer than males from exposure to radionuclides**

New reports emerge documenting women and girls are more likely to get cancer than males from exposure to radionuclides. Risk of cancer skyrockets for those living within 25 miles of a nuclear power plant. You can bet on it.

### **2020 Japan Olympic sites permanently covered and re-covered with plutonium dust**

That sites for the 2020 Japan Olympics are now permanently covered and recovered with plutonium dust is reported once on an obscure website or two. Japan hurries to classify ongoing readings as 'background' radiation. Canada raises the legal limits of radionuclides in bottled water. The U.S. follows suit, with legislation poised to raise radionuclide limits in food, as well.

### **Axelrod**

At Obama's second Inauguration, seafood, meat, vegetables, milk and water were again checked for Fukushima nuclear waste.

Top officials agreed to publicly downplay the crises.<sup>a</sup>

*Obama says there is no danger here in the United States ...why?* Obama's chief political strategist, David Axelrod, worked for Exelon, the largest nuclear plant owner in the U.S., planning strategic public affairs.

### **Rowe**

John W. Rowe, chairman of Exelon, a classmate of Michele Obama at University of Chicago is also chairman of the Nuclear Energy Institute, a nuclear power lobby in Washington D.C. and an Obama campaign donor. Since 2003, executives and employees of Exelon, which is based in Illinois, have contributed at least \$227,000 to Mr. Obama's campaigns for the United States Senate and for president. Two top Exelon officials, Frank M. Clark, executive vice president, and John W. Rogers Jr., a director, are among his largest fund-raisers.<sup>b</sup>

---

<sup>a</sup> <http://solarimg.org/?p=1722>

<sup>b</sup> Nuclear Leaks and Response Tested Obama in Senate, *New York Times*, Feb. 3, 2008

According to a *NYT* article,

When Japan's Fukushima accident prompted a review of safety at United States nuclear power plants, Exelon had an obvious stake in the outcome. Mr. Rowe was the only utility industry executive serving on a commission appointed by Mr. Obama in 2010 that made recommendations based on the accident and concluded in January that nuclear waste stored in pools of water — as they were in Japan — present “no unmanageable safety or security risks.” ... Since the accident, Exelon has managed to minimize how much it must spend to address safety concerns at its plants, including its eight General Electric boiling water reactors — the same models as those at Fukushima.

That article appears incredulous, because all 23 of the GE Mark I series reactors in the U.S. all have the same design flaws as ten of the same models used in Japan, including five of the six reactors at Fukushima that under certain circumstances makes it impossible to cool the reactors, causing explosions, breach of containment and uncontrolled release of radionuclides.

### **Lawsuits**

Every Mark I in the U.S. has quietly settled lawsuits because of its flawed design and inherent vulnerability. And, the pools the nuclear waste are stored in sit on top of the reactor buildings, so when the reactors blow up, so do the storage pools.

Besides, GE and the U.S. Government knew of the design flaws in its reactors,<sup>a</sup> considered by experts as ticking nuclear time-bombs and tragedies waiting to happen.<sup>b</sup>

GE says, ‘There are another 32 BWR Mark 1 reactors operating as designed worldwide’.<sup>c</sup>

How many are shut down, and shut down they are equally dangerous. For example, in Hanford when lambs were born without faces or mouths and legs joined in pairs that Mark 1 was shut down. But today, in the tri-county area around the Hanford site waste pools, children are still being born without brains and are still buried together in baby cemeteries say local morticians, just like when the Mark 1 was up and running.

designer of containment vessels at  
Toshiba Corp.

## 26. Nuclear industry captures NRC

Arnie Gundersen: The NRC is responsible, first and foremost, for public protection ...that's not the way it works out in reality, though. The nuclear industry captured NRC and uses its own laws, against it. The industry helps NRC write the laws ... basically they've lassoed NRC so it's unable to protect the public health and welfare ...and, in fact, does just the opposite. It really is designed (now) to protect the nuclear industry from the public.<sup>a</sup>

### Review of the literature

Exhibit No. 22 [http://investigations.nbcnews.com/\\_news/2011/03/13/6256121-general-electric-designed-reactors-in-fukushima-have-23-sisters-in-us](http://investigations.nbcnews.com/_news/2011/03/13/6256121-general-electric-designed-reactors-in-fukushima-have-23-sisters-in-us)

According to General Electric: ...23 of the 104 nuclear plants in the U.S. are GE boiling-water reactors with GE's Mark I systems for containing radioactivity, the same containment system used by the reactors in trouble at the Fukushima Dai-ichi plant.

The U.S. reactors are in Alabama, Georgia, Illinois, Iowa, Massachusetts, Michigan, Minnesota, Nebraska, New Jersey, New York, North Carolina, Pennsylvania and Vermont.

In addition, 12 reactors in the U.S. have the later Mark II or Mark III containment system from GE. These 12 are in Illinois, Louisiana, Mississippi, New York, Ohio, Pennsylvania and Washington State.

#### **GE parent company of msnbc.com thru 49 percent stake in NBC-Universal -- NBC-Universal, Microsoft equal partners in msnbc.com**

General Electric is a parent company of msnbc.com through GE's 49 percent stake in NBC-Universal. NBC-Universal and Microsoft are equal partners in msnbc.com.

Since 2003, executives and employees of Exelon, based in Illinois, contributed \$227,000 to Mr. Obama's campaigns for United States Senate and president. Two top Exelon officials, Frank M. Clark, exec vice president, and John W. Rogers Jr., dir., are among his largest fundraisers.<sup>b</sup>

#### **The incredulity of Exelon**

The incredulity of Exelon was demonstrated again when the board of directors waited four years to announce there had been many secreted leaks at its Braidwood facility:

Exelon and Illinois state officials waited for four years until 2006 before disclosing that Exelon's Braidwood Nuclear Generating Station, a nuclear plant 60 miles southeast of Chicago, spilled millions of gallons of water containing tritium, a radioactive form of hydrogen, multiple times over a decade. Exelon officials eventually apologized. And, said the risks from the leak were 'minimal', with tritium levels in surrounding wells all found to be below regulatory limits.<sup>c</sup>

# 27. Fukushima does Portland, OR

## Two-headed kittens for fun and profit

*[Editor's note: Oregon had its first two-headed kitten born in 2013. If you look on the rear cover of this book you will find it, along with two-headed mammals, including people and whales (the picture of the two-headed dolphin is omitted in this edition.)]*

Portland Oregon is weird. Just ask it. Like San Francisco used to be, 35 years ago. But they don't know that. Oregon is the only un-fluoridated State in the U.S. ...citizens repeatedly vote to keep fluoride out of drinking water and keep it pure,<sup>a</sup> based on new scientific research that fluoride reduces I.Q. in children and causes dementia in seniors ...with all the pro and con documentation included in their voter handbook. Some weirdo's document that fluoride calcifies your pineal gland, or 'third eye', the seat of your foresight, hindsight, imagination, dreams, intuition, simply seeing beyond normal sight ...after all, the pineal gland has rods and cones like your other two eyes ...say it isn't so.

And, weird again, that Portland demonstrated in the street in support of the Occupy movement<sup>b</sup> against central bank social injustice. And, Portland held pro-Hillary, anti-Trump protest demonstrations.<sup>c</sup>

But what's really weird, is Portland doesn't know an organic farm in southeast Portland closed down because it was *permanently* contaminated from nuclear raindown ...it could no longer grow food safe to eat, ever again. Nor, that Portland had/has the most rainthru of Fukushima radionuclide fallout in the U.S., as much as around Fukushima Dai-Ichi. And the Pacific Cascades, even more.

And just as in Seattle folks did not know, and still do not know, they breathed in hot particles daily that increase nose bleeds and asthma and pneumonia then lodge in the lungs and cause lung cancer, we here in Portland did not know we breathed hot particles in, too.

Not a peep from the people of Portlandia, news or city commissioners ...nothing. Not even from Obama, Hillary or Trump when auguring for the inauguration. Not a single word.

Third eye or not.

That's weird.

Portland Oregon had the same amount of airborne Fukushima fallout as towns neighboring the Fukushima Dai-ichi nuclear power complex. Portland

---

<sup>a</sup> [http://www.oregonlive.com/portland/index.ssf/2013/05/portland\\_fluoride\\_for\\_the\\_four.html](http://www.oregonlive.com/portland/index.ssf/2013/05/portland_fluoride_for_the_four.html)

<sup>b</sup> [https://en.wikipedia.org/wiki/Occupy\\_Portland](https://en.wikipedia.org/wiki/Occupy_Portland)

<sup>c</sup> [http://www.oregonlive.com/portland/index.ssf/2016/11/portland\\_students\\_to\\_rally\\_mar.html](http://www.oregonlive.com/portland/index.ssf/2016/11/portland_students_to_rally_mar.html)

was cited as having the most radionuclides from Fukushima in the whole United States. But, so was Denver. And, so was Florida.

That was because the headlines followed behind the lethal clouds from day to day, week to week, month to month and year to year as airborne radionuclides continue to circle the Earth every 40 days. Seaborne radionuclides continue to pour out of Japan ...and will, for thousands of years on a daily and hourly and moment by moment basis.

Japan's radionuclide outpouring has become ours.

That outpouring was supercharged following the initial nuclear explosions by the largest storm hitting Japan ever seen by the astronauts in our space station.

"In Seattle we had a two week period where we actually had 4-5 hot particles of radioactive material that was trapped by our quantitative filters in the amount of air that people would breathe in a day."

That, was immediately followed by the largest solar storm erupting from our sun, threatening nuclear power control systems. That, was immediately followed

by more earthquakes. And, that was immediately followed by a nearby volcano erupting. Most of Japan's 64 nuclear reactors sit by or on single or multiple active earthquake faults, beside active volcanoes and tsunami zones.

-8051- We knew... and could not prove it (VIDEO); radiation from Japan's Fukushima nuclear plant has now reached the waters off North America's west coast - that's the word from the scientists.

In 2011 a deadly earthquake followed by a tsunami killed 15,000 people and caused Fukushima power plant nuclear reactor to melt down.

We stood in Tokyo, as they said: There is no meltdown, this is not happening- as steam rose from the place. They allowed workers to continue, they allowed residents to stay - and said, No, there's no nuclear meltdown, it's okay.

It's now reached the shores of North America. What a fantastical incredible lie that we knew at the time we were getting, and simply could not prove.

With that, nuclear dumps in the U.S.A. continued leaking, throwing up and blowing up, as the entire nuclear industry infrastructure of about 500 reactors wore out, threw up, became brittle with age from constant electron bombardment and were ready to literally, shatter like a dropped glass.

In the U.S., Fukushima fallout raindown made milk too dangerous to drink, broad-leafed vegetables too dangerous to eat everywhere it rained, doubled infant mortality rates in Seattle and Vancouver B.C.; closed an organic farm in Portland Oregon and blanketed Florida citrus groves.

-2410- TMI: Cancer death increase - Infant mortality doubles - birds disappear - mutations (VIDEO)

-742- Spike in U.S. infant mortality 4 mths after Chernobyl - infant deaths result of Fukushima fallout? (VIDEO)

In the 14 weeks following the March 2011 Japan meltdowns, epidemiologists tallied 22,000 excess (otherwise unaccountable) deaths in the U.S. for all ages. This was *missed* in 2016 election campaign speeches, but not in families suffering loss.

Then, epidemiologists and nuclear researchers reported women living within 20 miles of a nuclear facility are more vulnerable to cancer than men; and girls are three times more likely to get cancer from exposure to radionuclides than boys.

Consequently, we concluded females are more susceptible to low immune deficiency and 1,400 resulting illnesses associated with exposure to radionuclide (*ionizing radiation*) fallout, waste, failures and daily releases.

*Ionizing* means invisible electrons being shot non-stop from atoms like machine gun bullets or fireworks shooting through you killing cells and shredding ordained DNA genetic codes and equally holy electro-chemical immune responses.

Being machine-gunned thru and thru with electrons nonstop forever causes abnormal rapid cell growth (tumors) ...or, tears the genetic double-helix spiral so cells cannot reproduce faithfully (mutations); or, until you get tumors and lesions with bacterial and viral infections (cancer) and die.

Or, you produce a human fetus or newborn with extra arms and legs like in Fukushima and Fallujah, brains outside the head in sacks or supersized limbs like in Chernobyl, no brains at all like in Hanford, and cyclopes without faces and mouths like in Kazakhstan, and partially formed skulls, blood disorders, missing eyes or toes, fused fingers and brittle limbs like in India, and cancer clusters, double sets of teeth, missing eyeballs and brain tumors like in Missouri. Apologists refer to this euphemistically as, "*nuclear power is safe and harmless*".

The Obama Administration, and Hillary leading the State Department at the Time looked the other way. Will the Trump Administration wake up to this?

In addition to Fukushima atmospheric releases when three of the six improperly designed GE reactors with built-in predictable failures, with thirty years of fuel rod waste stored on top of them and one illegally producing weapons-grade 'clean-bomb' fuel blew up into the atmosphere, huge containment pools of liquid wastes also stored on their rooves shattered and dispersed and ran into the ocean.

Their nuclear reactor cores melted down into 600 tons of self-feeding molten lava easily burning through an inch or so of cement containers (containment vessels) so far down into the Earth they were never found. To this day, continually contaminating hundreds of tons of water in aquifers flowing into the Pacific Ocean daily the last six years and may continue practically, forever.

Consequently, also *missing* were hundreds of dolphins, whales and hundreds of thousands of seals and sea lions, millions of tuna, salmon, krill,

herring, lobsters, crabs, sea turtles, and pelicans and thousands upon thousands of other sea birds.

All these species hung suspended at varying depths, or lay floating on the sea, dying or dead; or washed up, dying or dead on beaches in Alaska, Canada, Washington, Oregon, California and Mexico. They were covered with lesions and infections, emaciated, starving, starfish were dissolving, tide pools once colorful as rainbows were now devoid of life and gray.

The establishment academic nuclear scientists in large funded by the nuclear power industry, attributes this daily holocaust to *new and mysterious diseases*.

There is never a word mentioned about Fukushima nuclear waste reaching its deadly hand across the Pacific Basin in ocean currents filled with annually migrating mammals and fish; killing all it touched instantly or causing epidemic misery and lingering death.

Behind the scenes of forbidden emails and leaks the Obama Administration instructed Hillary to tell the Japanese government to abandon their plans to be nuclear free by 2030's or it would displease the Administration; told her to tell them to do nothing to cause the share price of TEPCO (Tokyo Electric Power Company) to fall further. Hillary followed Kissinger's advice to tell the Japanese government the U.S. in return would not test for ionizing radiation. Japanese food products coming into the United States ... even though they were (and are) being tested and refused by countries neighboring Japan. [See Chapters 21, 22.]

In those countries are food markets, who as a courtesy to customers installed ionizing radiation measuring devices at their fish, meat and vegetable counters.

Japan's political leaders insist they were following orders from the Obama Administration to dump their nuclear wastes into the ocean and burn it up into the jet streams. But, it was later observed that seaborne radionuclides did not disperse and dilute; on the contrary they drew together. And airborne contaminants covered the Pacific Northwest, contaminated the Pacific Cascades for thousands of years, then continued on to contaminate much of the United States and the rest of the Northern Hemisphere as it circulated and recirculates around the Earth every 40 days and raindown brings it home.

## **Review of the literature**

Exhibit No. 23

09:47 AM Sep 27, 2012 | 36

-4372-Fukushima radioactive plume circles earth every 40 days - fallout shows spikes (VIDEO)

EPA actions for public safety spit into the wind. They issued no warnings. This resulted in Seattle citizens breathing in ten hot particles a day that will produce lung cancer ...because they were neither alerted nor advised to wear fifty-cent masks. Because EPA told no one to take ten-cent iodine pills to avoid absorbing radionuclide iodine, people in the Pacific Northwest, and across the country will get thyroid cancer

Obama said there was no danger, but had his personal and White House and party food and drink tested for Fukushima radiation, then immediately took his family and staffers to South America.

EPA [Editor's note: Actually, it was not EPA, but an aligned entity; the woman who ran that agency and removed the meters was later promoted to run the EPA (the documentation in in the database of 9,000 articles)], permanently removed from several States all ionizing radiation monitors that documented dangerously high readings.

Following Canada's 'safety actions' in raising their acceptable permissible amounts of ionizing radiation in water to dangerous levels, EPA in order 'to protect the public', is pushing legislation to raise our accepted permissible levels of ionizing radiation in drinking water and food to dangerous and threatening levels ...some 1,000 times higher than current safe standards. EPA is totally abandoning rigorously Government-tested traditional safety protocols established in the 1940's.

The same interlocking corporate directorates that own the nuclear power industry also direct the military-industrial complex, W, all Street investment banks, media and Federal Reserve, and according to a study published in 1976 by the U.S. House of Representatives most of the successful businesses in the United States. If that is not sufficiently unnerving, Japan is hosting the 2020 Olympics in sites in and around Tokyo that are, and will remain covered in deadly plutonium dust blowing Eternally down from the mountains. The mountains trapped a lot of the initial airborne contamination. And, they continue to trap radionuclides from hundreds of giant furnaces burning all of Japan's burnable Fukushima radionuclide waste not being dumped into the sea. The whole country of Japan cannot be decontaminated. Areas that were decontaminated simply become re-contaminated again and again.

What about Japan's plans to commercialize fast-breeding reactors?

And Australia's plan to accept shipments from all countries and become the world's nuclear dump because all the dumps in the U.S. are failing, along with the entire dated nuclear infrastructure failing or leaking and nuclear dumps leaking, burning and blowing up?

What is the nuclear energy industry response to all the sickness, suffering and death they are responsible for? ...of course, to build 1,000 more reactors. Bill Gates wants one of his own. China wants 500. Money's talking.

We are underdogs fighting an uphill battle. Not to mention, there were secret Reagan-Bush Administration transfers of technology allowing Japan to amass 70 tons of weapons-grade plutonium illegally produced sitting there onsite that blew up, too.

<> March 2011, the death toll from the Fukushima nuclear energy industry holocaust in Japan, is projected to top 500,000. December 2011, that number is augmented to include 1,000,000 cancers from Fukushima in Japan over the next 20 years ...first thyroid, then lung, organ, brain and leukemia.

*Chernobyl: Consequences of the Catastrophe for People and the Environment*, was written by scientists who used health data from 1986 to 2004, and concluded Chernobyl resulted in 985,000 deaths worldwide from 1986 to 2004.

And, that generally, you can expect 500 percent more cancer fatalities when using MOx (oxygen-enriched uranium-based nuclear fuel), as one of the three reactors that blew up in at Fukushima Dai-ichi, did,<sup>a</sup> (illegally).

Fukushima – Total Cost

*Watch the interview here*

Dec 21, 2011, Gundersen of Fairewinds Associates (a leading nuclear expert)

and Warren Pollock redefine the Fukushima nuclear incidents (meltdowns and explosions) in terms of human and total cost.

Rethinking nuclear power, Jerusalem Post, March 21, 2011

Mar 22, 2011 - Published by the New York Academy of Sciences, [Chernobyl: Consequences of the Catastrophe for People and the Environment](#) was written by scientists who used health data from 1986 to 2004 Scientists: Chernobyl resulted in 985,000 deaths worldwide as of 2004 - 500 percent more cancer fatalities when using MOX

Warning signals, Frontline Magazine (India), March 26, 2011 issue:

### Crimes beyond imagination

“Disasters like this remind us of our common humanity. ... We do not expect harmful levels of radiation to reach the United States. ... There’s no reason for Americans to take precautionary measures beyond staying informed.” -- President Barack Obama, March 19, 2011

Let’s get informed; epidemiologists report there are 20,000 otherwise unaccountable deaths in the U.S. immediately following Fukushima fallout across the United States. Fukushima fallout is estimated as the equivalent of 500 Hiroshima-sized nuclear bombs set off in the atmosphere, and another 500 Hiroshima-sized nuclear bombs set off in the Pacific Ocean. That opens the door to a cache of documentation that counts thousands of otherwise unaccountable deaths after each nuclear test since May 7, 1945. That epidemiological count is worldwide: 60,000,000 deaths plus at least several million fetal deaths, abortions, stillbirths and infant deaths. And, 100,000,000 cancers.

Is the fallout from all those tests is still active and still sickening and killing us? ...practically, forever. Apparently, all mammals (including humans) react the same to nuclear fallout. So, if you’re an animal lover like I am, you can double those numbers. And if you like fish, sea life, butterflies, birds, reptiles,

<sup>a</sup> Warning signals, Frontline Magazine (India), March 26, 2011 issue

insects ...double them again. Even the flowers, trees, grains, plants are affected and mutated by nuclear fallout. Even viruses and bacteria.<sup>a</sup> All living things. Even the water, the air and the soil.

# 28. Hot spots (hot particles)

## Real cause of nuclear crises

[Editor's note: The nuclear meltdowns at Fukushima Dai-ichi were caused by inherent design flaws in the Mark I and II reactors, and because they could not withstand the earthquake, which cracked the cooling systems and containment vessels. They were not caused by the Tsunami; that is a nuclear industry myth ...the reactors were damaged by the earthquake, not by the flooding ...which may, or may not, also have shorted electrical controls. However, the damage to the reactor was already done by the earthquake, before the Tsunami arrived.]

Real cause of nuclear crisis, Japan Times (abridged translation of an article from the December issue of *Sentakū*), Dec. 12, 2011 *Atsuo Watanabe, former designer of containment vessels at Toshiba Corp. (Oct. 26)*

- Most fundamental cause of the Fukushima plant fiasco probably lay in the blind acceptance of the safety standards adopted in the United States
- U.S. did not take into consideration all potential consequences from earthquakes
- Reactors damaged at Fukushima were of the GE Mark 1 type designed and built by General Electric
- In U.S., no need to consider the combination of an earthquake and a loss-of-coolant accident caused by broken piping
- It is reasonable to assume the earthquake and loss of coolant simultaneous at Fukushima No. 1

There are 10 other GE Mark 1 type reactors in Japan

Perhaps it was against such a background that Tepco blacked out crucial matters in the operational manual of the reactor

[Editor's note: There are 23<sup>a</sup> of the same GE Mark 1 type reactors in the United States ...all have allegedly and quietly settled lawsuits out of court because of the built-in design flaws.]

# 29. Atmospheric testing death toll jumps from 1-to-60 million

With low-level exposure added, jumps from 1million to 60 million deaths plus 120 million cancers

## Review of the literature

Exhibit No. 24

Table 14.4 Global consequences of exposures from nuclear project

Effect	ICRP yield	ECRR yield
Cancer death	1,173,606	61,619,512
Cancer total	2,350,000	123,239,024
Infant death	0	1,600,000
Foetal death	0	1,880,000

12:38 PM May 5, 2016

-8812- 60,000,000 killed by nuclear fallout - 120,000,000 cancers from radioactive releases - doesn't include millions more dead babies and fetuses- - war crime far greater than any in recorded human history (VIDEO)

Edited transcript excerpt from the documentary, 'Atomic Wounds' – [see IMDB page (emphasis added): *Starts at 50:00 in*]:

“Since the explosion of the first atomic bomb in 1945, there have been several thousand tests in the atmosphere and underground. Hundreds of supposedly secured nuclear sites are still active; atomic waste they cause disperse daily.

The official number of deaths from cancer due to nuclear activities since 1945, is 1,000,100. Taking into account low level radiation, European researchers have upped this estimate to 61 million. In other words 60x the UN official figure.”

European Committee on Radiation Risk (ECRR's Wikipedia page), 2010 (pdf): *Global consequences of exposures from nuclear project based on UNSCEAR figures up to 1989*. ECRR yield: Cancer death: 61,619,512; Cancer total: 123,239,024. Infant death: 1,600,000. Fetal death: 1,880,000

Latvian Academy of Science, presentation by Prof. Chris Busby of the University of Ulster, 2009 (pdf), excerpted and edited as follows:

<sup>a</sup> [http://investigations.nbcnews.com/\\_news/2011/03/13/6256121-general-electric-designed-reactors-in-fukushima-have-23-sisters-in-us](http://investigations.nbcnews.com/_news/2011/03/13/6256121-general-electric-designed-reactors-in-fukushima-have-23-sisters-in-us)

<sup>b</sup> Correct spelling in U.S. is 'fetal', in Britain and Canada, 'foetal'; referring to the fetus (baby in the womb)

ECRR calculations show that this has resulted in more than 60 million excess cancer deaths worldwide due to exposures up to 1995. The ECRR 2003 model makes clear that contamination of the environment from nuclear discharges comes at a great cost in human suffering ...for those now living ...and, for their descendants.

Prof. Chris Busby, University of Ulster, 2009 (pdf):

The global death yield of the nuclear age to 1992 is horrifying.

According to objective calculations by the European Committee on Radiation Risk: 61 million cancer deaths; 1,600,000 infant deaths; 1,880,000 fetal deaths.

There has been a loss of life quality of 10% (in terms of illnesses and aging effects). The blame for this can be squarely placed at the door of those scientists and administrators (WHO, UNSCEAR, ICRP) who develop and support the scientific risk models. This is a war crime far greater in magnitude than any that has occurred in recorded human history.

# 30.

## Seattle and Portland to avoid lung- & thyroid cancer for 60 cents

### *Coulda, woulda, shoulda ...is CBS fake news?*

Had Obama issued Fukushima fallout 'precautionary measures' to the citizens of Seattle, they could have purchased and worn a 50-cent respiratory mask and avoided breathing 10 hot particles a day which *will* give them lung cancer

And, taken a 10-cent iodine dosage and avoided thyroid cancer. Not to mention the rest of the country, Europe, and Asia ...primarily whenever it rained-down through the Fukushima fallout circling the northern hemisphere every 40 days.

Had Obama issued Fukushima fallout 'precautionary measures' to the citizens of Seattle, they could have purchased and worn a 50-cent respiratory mask and avoided breathing 10 hot particles a day which *will* give them lung cancer.

And, taken a 10-cent iodine dosage and avoided thyroid cancer. Not to mention the rest of the country, Europe, and Asia ...primarily whenever it rained-down through the Fukushima fallout circling the northern hemisphere every 40 days.

Fukushima fallout in North America included an estimated 400,000,000,000,000 Bq of Cesium-137.

To top it off, cancer is a certainty if even only one radioactive particle is ingested.

According to Vladimir Levchenko, a physicist who worked in Chernobyl exclusion zone:

“Many of those who were members of our group died later The worst in an accident zone is not the level of radiation itself, but that the explosion blew out an enormous amount of fine radioactive particles that was spread around by wind as dust. Sometimes it’s just one speck of dust lying somewhere around. If you breathe it in by accident or swallow it when eating, cancer is a certainty.”

Hot radioactive particles in Seattle were measured at 50 percent of the levels seen in Tokyo. They latch onto lung tissue.

(But, according to CBS: ‘Inaccurate internet reports stoked fear that radiation *had somehow come our way.*’)

Is CBS fake news?

08:51 AM Jun 5, 2011 | 155

-662- Average person in Seattle breathed in 10 hot radioactive particles a day in April

<p style="text-align: center;"><b>Thoughts from Arnie Gundersen</b></p> <p style="text-align: center;"><b>Hot particles absorbed by internal organs ignored</b></p> <p style="text-align: center;"><b>by regulatory bodies IAEA<sup>a</sup> &amp; WHO<sup>b</sup></b></p> <p style="text-align: center;">The proven impact of hot particle exposure is being completely ignored by federal regulators and all international health agencies.</p>
--

<sup>a</sup>

<sup>b</sup> World Health Organization

Fairewinds Energy Education and its scientific colleagues analysis indicates the contribution from small but highly radioactive particles (hot particles) absorbed by the internal organs of exposed individuals, is totally ignored by regulatory bodies worldwide such as the IAEA and WHO.

Human exposure to these small particles within internal organs exposes people to high-energy radiation for decades.

*Additionally, peer-reviewed scientific evidence indicates that small but highly radioactive particles are released in large quantities, post-accident as well.*

### **Radionuclide concentration in releases not uniformly distributed**

By not considering non-uniformly distributed radioactive particles in its dose calculations, the EPA is introducing a systematic bias to its dose calculations that will create radiation-induced casualties and a humanitarian calamity.

*The radioactive concentration in releases is not uniformly distributed. A thorough analysis of the dose consequences from hot particles must be ascertained.*

## 32. Sleepless in Seattle

Vancouver B.C. and Seattle now have 220,000,000 atoms of Fukushima Iodine-129 per liter of rainwater- with a 15 million year half-life in an aquifer that now supplies deadly drinking water to 120,000 people to British Columbia then crosses the border into Washington.

### Review of the literature

Exhibit No. 30

08:58 AM Feb 17, 2016 | 577

-8775- Vancouver B.C. & Seattle: 220,000,000 atoms of Fukushima Iodine-

129/liter of rainwater- w/15 million year half-life in aquifer; supplies deadly drinking water-to 120,000 people in BC/WA

(L) Global cumulative deposition of radiocesium ( $^{134}\text{Cs}$  and  $^{137}\text{Cs}$ ) after Fukushima NPP accident at end of 2011. (R) Annual effective dose from radiocesium exposure due to inhalation, surface deposition and fallout transport. (See text, below.)

*Global and local cancer risks after the Fukushima Nuclear Power Plant accident as seen from Chernobyl: A modeling study for radiocesium ( $^{134}\text{Cs}$  &  $^{137}\text{Cs}$ ), Nov. 29, 2013: ... The highest deposition was found in Fukushima (in the range of  $\text{MBq m}^2$ ), where deposition exceeded the contamination limit affecting an area with more than 9 million inhabitants.*

In the West USA the deposition was found between 100 and 500  $\text{Bq m}^2$  decreasing to the East.

For the South-west USA, Wetherbee et al. (2012) reported that the deposition of  $^{137}\text{Cs}$  was 30-240  $\text{Bq m}^2$  and 2-46  $\text{Bq m}^2$  for  $^{134}\text{Cs}$ , which is in the same order as in our calculations (Fig. 1).

The same investigators reported a deposition of  $^{137}\text{Cs}$  in Alaska to be 16-27  $\text{Bq m}^2$  and around 55  $\text{Bq m}^2$  for  $^{134}\text{Cs}$  similar to those presented here (50-100  $\text{Bq m}^2$ ).

In the rest of the U.S. they measured  $^{137}\text{Cs}$  between 1 and 45  $\text{Bq m}^2$  and  $^{134}\text{Cs}$  between 1 and 3  $\text{Bq m}^2$ , which are close to ours (50- 200  $\text{Bq m}^2$ ) –

According to the French Institute of Radioprotection and Nuclear Safety (IRSN, 2012) approximately 73 radionuclides were released after Fukushima. Therefore, one might argue on the low impact concluded in our study claiming that only radiocesium has been studied instead of 73 radionuclides emitted.

According to the French Institute of Radioprotection and Nuclear Safety (IRSN, 2012) approximately 73 different radionuclide classifications are released from Fukushima.

Agricultural Implications of the Fukushima Nuclear Accident - Radiocesium Absorption by Rice in Paddy Field Ecosystems (pdf), 2013:

Unexpectedly, we found that the fallout was relatively insoluble and only a small percentage of the radiocesium could be extracted by a boiling water treatment followed by nitrate leaching. We have very little knowledge about this fallout, including its chemical form and properties, but huge amounts of this relatively insoluble radioactive fallout are still bound to organic matters

Presentation by Yasuhito Igarashi of Japan's Meteorological Research Institute at IAEA's expert meeting (pdf), February 2014: Mar. 14-15

...sample contained insoluble materials not only in water but hot nitric acid! ... They are insoluble; even refractory to conc. nitric acid.

They will persist for a long time in the environment ... as well as in living organisms.

Scientific Reports (Nature Publishing Group) - *Emission of spherical cesium-bearing particles from an early stage of the Fukushima nuclear accident*, Aug. 30, 2013:

We analyzed the water solubility of Cs Particle 1 by comparing the particle's shape before and after exposure to water. The results show that there was no change in shape, suggesting that the particle was insoluble to water at least during atmospheric transportation.

American Chemical Society Publication, Analytical Chemistry - *Detection of uranium and chemical state analysis of individual radioactive microparticles emitted from the Fukushima nuclear accident...* (Tokyo Univ., Japan's Meteorological Research Institute), August 1, 2014:

We explored the possible sources of the 14 elements (Cr, Mn, Fe, Zn, Rb, Zr, Mo, Ag, Sn, Sb, Te, Cs, Ba, and U) found within the micro-particles.

These particle natures suggest that they could have relatively long-term impact on the environment, i.e., the release of soluble radioactive Cs into the environment as these insoluble glassy particles degrade.

Similar radioactive particles have been detected in soils, plants, and mushrooms - it is probable that these particles are the same as the micro-particles characterized in our study.

-900- Los Alamos Lab safe from wildfire? - Additional plutonium problems?

Peter Stockton, expert on nuclear materials and a senior investigator for the independent watchdog Project on Government Oversight (POGO)

...tipped off in 2009 by a whistleblower that in PF-4-where six metric tons of plutonium are ... they've painted over sprinkler system so many times it doesn't work ... LANL never tested fire hoses in

building. ... pressure in the system isn't enough for entire building, had to mitigate that.

TA-54 contains 20,000-30,000 drums of waste, but just because it's low-level waste doesn't mean anything. If that becomes airborne, and just a speck of plutonium gets into your lungs, you're going to end up with cancer down the road.

It's the most toxic substance known to man. It would be very nasty if those drums blew apart, and the wind carried them downwind.

## 34. Troubling trend

KRON, Apr 13, 2017 (emphasis added): A troubling trend – **sharks and other marine life are washing up** on Bay Area shorelines. First, it was Santa Cruz, and now, it's the Peninsula... dead sharks were found washed up Thursday morning... **Experts say similar reports are coming in every day**, and it's not clear why all the marine life is washing up... [T]he Pelagic Shark Foundation in Santa Cruz is pleading with Bay Area people to be alert on walks and report to them immediately.

KRON transcript, Apr 13, 2017: "There are a lot of small dead sharks that have been found, just today... **it's just not clear why all the marine life is washing up like this.**"

Santa Cruz Sentinel, Apr 8, 2017: [Sean Van Sommeran, Pelagic Shark

Research Foundation executive director] said **there have been too many white-shark strandings this year throughout coastal Northern California...** he is frustrated about the lack of help for stranded sharks. "There's been **over 100 dead this year** in San Francisco, San Mateo, Oakland and Berkeley Aquatic Park... **We get them all the time** in the San Francisco Bay Area."

California Department of Fish and Wildlife, Apr 14, 2017: The carcass of a young great white shark was recovered on April 8 near Pleasure Point in Santa Cruz... It died of **multiple organ failure, with major lesions in the brain, liver and heart...** **Unidentified microorganisms were observed in the fluid surrounding the brain and heart. Additional testing is underway to attempt to identify these pathogenic organisms**

CBS San Francisco, Apr 11, 2017: Marine Biologist Giancarlo Thomae said a necropsy found an infection had **damaged the shark's brain and other organs.** "The species of the bacteria

that contributed to the shark's death is unknown at this time... However, the **brain did have many lesions**. In addition to that the shark's heart and liver also showed damage, so we can conclude that the immune system of the shark was also compromised."... **Die-offs of leopard sharks and other types have occurred in the San Francisco Bay in the last two years.**

KXTV, Apr 14, 2017: *Washed up Great White Shark died of organ failure...* Biologists believe the shark died of multiple organ failure, with major lesions in the brain, liver and heart. **Unknown microorganisms** were also found and additional testing is being done.

NBC Bay Area, Apr 11, 2017: A pathogen that eventually caused brain lesions is the reason why a shark became stranded on a Santa Cruz

beach and later died last weekend. Animal experts say the pathogen is **unlike any kind of bacteria that has been seen in sharks before.**

KSBW transcript, Apr 11, 2017: "They say it could be the same **infection that's killing mako sharks** this year... but **the question remains, why is the infection making its way through different shark species?**" - *Sean Van Sommeran, Pelagic Shark Research Foundation executive director*: "Let's see if we can exactly identify what appears to be a **new type of brain infection** - first of its kind, documented in a white shark like that."

KSBW, Apr 11, 2017: Van Sommeran said the pathogen is unlike any kind of bacteria that has been noted in sharks before. "Necropsy results show severe necrotic brain lesions"

## 35. Low doses of internal emitters

Janet Sherman<sup>a</sup> & Joseph Mangano<sup>b</sup>

<http://radiation.org/> and [www.janettesherman.com](http://www.janettesherman.com)

---

"A 2012 study of all nuclear plants in France found elevated levels of child leukemia in the vicinity of the plants. A 2008 study in Germany came to a similar conclusion regarding child leukemia and

She is a specialist in internal medicine and toxicology. She edited the book, *Chernobyl: Consequences of the Catastrophe for People and Nature*, written by A. V. Yablokov, V. B. Nesterenko, and A. V. Nesterenko, published by New York Academy of Sciences, 2009. Her primary interest is prevention of illness through public education.

<sup>b</sup> **Joseph Mangano, MPH, MBA,** is the author of, *Mad Science*, (pub. 2012) and many articles on the effects of nuclear power. He is an epidemiologist, and Executive Director of the *Radiation and Public Health Project*

Germany's nuclear generating facilities. A study in, *Archives of Environmental Health*, in 2003 found cancer rates in children were 12.4 percent higher (than nationwide occurrences) in 49 counties surrounding 14 nuclear plants in the eastern United States.”<sup>a</sup> - Janet Sherman

---

**Newsire: Low doses of internal emitters**  
**An unspoken argument to (legally)**  
**guillotine some officials and all apologists**

**Nuclear apologists play shoot the messenger on radiation<sup>b</sup>,**  
**By Helen Caldicott for The Age (Australia), April 26, 2011:**

The proponents of nuclear power first piece of disinformation is to confuse the effects of external and internal radiation. The former is what populations were exposed to when atomic bombs were detonated over Hiroshima and Nagasaki in 1945.

Internal radiation, by contrast, emanates from radioactive elements that enter the body by inhalation, ingestion, or skin absorption. Hazardous radioactive elements being released in the sea and air around Fukushima accumulate at each step of various food chains (for example, into algae, crustaceans, small fish, bigger fish, then humans; or soil, grass, cow's meat and milk, then humans). Entering the body, these elements – called internal emitters – migrate to specific organs such as the thyroid, liver, bone, and brain, continuously irradiating small volumes of cells with high doses of alpha, beta and/or gamma radiation, and over many years often induce cancer.

Further, many remain radioactive in the environment for long periods, posing danger for future generations.

The grave effects of internal emitters are of the most profound concern at Fukushima – as indeed they continue to be at Chernobyl. It is **erroneous and misleading to use the term “acceptable levels of external radiation” in assessing internal radiation doses**. To do so is to propagate inaccuracies and to mislead the public worldwide and journalists who are seeking the truth about radiation's hazards.

**Review of the literature**

Exhibit No. 33

*March 2011: Cancer risk increases with any level of radiation exposure says experts, no safe threshold ...self-interested parties imply, it's OK*

-103- Comparisons with X-rays and CT scans meaningless - inhaling particles

increases radiation exposure by a factor of a trillion

### **Fukushima nuclear power plant accident and state of the media**

---

<sup>a</sup> Sep 25, 2014,

<sup>b</sup> <http://radiation.org/fukushima-update-radioactive-fallout-and-mortality-increases-in-the-united-states-international-journal-of-health-services-2012/>

<sup>c</sup> Translation by Douglas Lummis; <https://www.counterpunch.org/2011/03/22/what-they-re-covering-up-at-fukushima/>

**by Hirose Takashi<sup>a</sup>**

Hirose Takashi: Every day the local government is measuring the radioactivity. All the television stations are saying that while radiation is rising, it is still not high enough to be a danger to health. They compare it to a stomach x-ray, or if it goes up, to a CT scan. What is the truth of the matter?

***1 millisievert – per year vs  
400 millisieverts – per hour***

For example, yesterday. Around Fukushima Daiichi Station they measured 400 millisieverts – that's *per hour*. With this measurement, Chief Cabinet Secretary Edano admitted for the first time that there was a danger to health. But, he didn't explain what this means.

All the news media are at fault here.

They are saying stupid things like, 'Why, we are exposed to radiation all the time in our daily life, we get radiation from outer space. *But, that's one millisievert per year.*

***Do the math ... you get 3,500,000 times  
the normal dose. You call that safe?***

A year has 365 days, a day has 24 hours; multiply 365 by 24, and you get 8,760. Multiply the 400 millisieverts by that, you get *3,500,000 times the normal dose*. You call that safe?

What media have reported this? ...none.

They compare it to a CT scan, which is over in an instant; that has nothing to do with it.

**The reason radioactivity can be measured is that radioactive material is escaping. What is dangerous is when that material enters your body and irradiates you from inside.**

**Industry-mouthpiece scholars**

These industry-mouthpiece scholars come on TV and what do they say? They say as you move away the radiation is reduced in inverse ratio to the square of the distance.

I want to say the reverse. Internal irradiation happens when radioactive material is ingested into the body. What happens?

Say, there is a nuclear particle one meter away from you.

You breathe it in, it sticks inside your body; the distance between you and it is now at the micron level.

One meter is 1000 millimeters.

---

<sup>a</sup> Hirose Takashi: The Fukushima nuclear power plant accident and the state of the media, Asahi New Star, March 17, 2011

**A thousand times a thousand squared is a factor of a trillion**

One micron is one thousandth of a millimeter.

That's a thousand times a thousand, squared.

That's the real meaning of 'inverse ratio of the square of the distance'.

Radiation exposure is increased by a factor of a trillion.

Inhaling even the tiniest particle, that's the danger.

**So, making comparisons with X-rays and CT scans has no meaning, when you can breathe in radioactive material.**

**What they measure has no connection with the amount of radioactive material in your body**

When it enters your body, there's no telling where it will go.

**The biggest danger is for women, pregnant women, and little children**

Now, they're talking about iodine and cesium, but that's only part of it, they're not using the proper detection instruments. What they call, *monitoring*, means only measuring the amount of radiation *in the air*.

Their instruments don't eat.

What they measure has no connection with the amount of radioactive particles you ingest.

[Editor's note – we supplied the following head and subhead, the passages below are excerpted.<sup>a</sup>]

**Hanford**

**"You don't need a weatherman to know which way the wind blows." – Bob Dylan**

In Fukushima there is the Daiichi Plant with six reactors and the Daini Plant with four, a total of ten reactors. If even one of them develops the worst case, then workers must either evacuate the site or stay on and collapse.

So if, for example, one of the reactors at Daiichi goes down, the other five are only a matter of time. We can't know in what order they will go, but certainly all of them will go. If that happens, Daini isn't so far away, so probably the reactors there will also go down. Because I assume that workers will not be able to stay there.

I'm speaking the worst case; the probability is not low.

This is the danger the world is watching.

Only in Japan is it being hidden.

As you know, of the six reactors at Daiichi, four are in a crisis state. So even if at one everything goes well and water circulation is restored, the other three

---

<sup>a</sup> Translation by Douglas Lummis; <https://www.counterpunch.org/2011/03/22/what-they-re-covering-up-at-fukushima/>

could still go down. Four are in crisis, and for all four to be 100 per cent repaired ...I don't think so.

If so, then to save the people, we have to think about some way to reduce the radiation leakage to the lowest level possible. We have to think of all six going down, and the possibility of that happening is not low.

Everyone knows how long it takes a typhoon to pass over Japan; it generally takes about a week. That is, with a wind speed of two meters per second, it could take about five days for all of Japan to be covered with radiation.

We're not talking about distances of 20 kilometers or 30 kilometers or 100 kilometers. It means of course Tokyo, Osaka.

That's how fast a radioactive cloud could spread.

Of course it would depend on the weather; we can't know in advance how the radiation would be distributed.

It would be nice if the wind would blow toward the sea, but it doesn't always do that. Two days ago, on the 15th, it was blowing toward Tokyo.

That's how it is.

07:26 PM Apr 22, 2011 | 29

-367- Editorial blasts UC Berkeley professor over radiation. [Fukushima Fallout, Alameda Sun Editorial, April 22, 2011](#)

## **Don't let your pets drink rainwater**

**Fukushima Fallout, Alameda Sun Editorial, April 22, 2011:**

I opened the Alameda Sun on Friday, April 7, and read with horror its front page article, "Nuclear Scientist Counts Radiation Levels Locally."

The article states [UC Berkeley professor Kai Vetter] says, 'fallout in our area from the Fukushima disaster is nothing to worry about', and that "the extremely low levels of both iodine and cesium he measured should reassure people that there is little danger being in the presence of these elements. The levels were low to begin with and are even lower now."

The article goes on to say that "Vetter told KTVU news that even at the highest levels measured, a person would have to breathe that air for 2,000 years to be exposed to the same amount of radiation that one would experience from a cross-country flight.

"You should not be worried about your dog going out and drinking some rainwater - he will not light up," he stated about the rain that recently fell."

I don't know about *Alameda Sun* readers, but I think it is criminally irresponsible for Vetter, a nuclear scientist, to lie to us about the safety and amount of radiation he is measuring, and that the public is being exposed to.

Radiation is cumulative. It is much more dangerous when it is ingested than when it is outside of you.

Vetter's own tests have shown the levels to be 181 times the MCLs [Maximum Contaminant Levels] on March 23.

The nuclear industry has been bending over backwards in this tragedy to protect their continuing interests in building plants throughout the world.

They could care less about you, or I, or anything other than themselves ...by telling us that we have nothing to worry about from this ongoing disaster, to let our dogs drink the rainwater, Vetter should be last person to take advice from in ongoing tragedy.

-360- Half of Japanese women tested show radioactive iodine-131 in breast milk - Highest contamination found 150 miles from Fukushima

Humans are mammals, having mammary glands and giving birth to live young.

Across the U.S., milk from cows (mammals) is documented to contain too much Fukushima radionuclides (radiation) to be safe to drink.

Whales, dolphins, seals, sea otters, walruses, sea lions, manatees, cats, dogs, goats, elephants, rats, mice ...all vertebrate animals that have mammary glands where females give birth to live young and secrete milk to suckle (nurse) their young ... are mammals (both males and females of a species, both having mammary glands, are *mammals*). This is one reflection of Gaia ... a commonality of mammalian Life. All mammals appear to be equally devastated by exposure to Fukushima fallout and nuclear energy industry-related radionuclides (manmade radiation).

What about other animals that are not mammals? ...birds, reptiles, insects, fish and all living things that reproduce themselves after their own kind? Guess what? Exposure to nuclear energy industry radiation destroys their God-given and -Ordained ability to reproduce themselves after their own kind.

The nuclear energy industry intentionally destroys Divine Order.

They cover it up, intentionally.

The nuclear energy industry is an abomination and produces suffering and disease; and destroys Gaia, the ability of all life forms and wind and rain and soil to self-regulate the Life Force of the Planet Earth and keep Life Force self-sustaining. This is evident by the nuclear energy industry intentionally

destroying Life, Gaia, and the Life Force, and the God-given ability of living things to reproduce themselves after their own kind.

The owners of the nuclear energy industry know they are doing this, but don't care ...because they worship money and power and disdain God, Divine Order, Natural Order, Gaia, Life, and the Life Force ...and, consequently, intentionally cause told and untold suffering.

They say their nuclear energy industry is *safe and clean*.

They need to be directly exposed to plutonium, and their industry phased out, now ...and replaced with renewables.

### **The nuclear-energy industry produces the same nuclear fallout as detonating nuclear bombs**

Fallout from the nuclear energy industry ... in the smallest or large amounts ... from every day (regulated) business-as-usual cancer-causing discharges from normal operations, and from reactor mishaps and from foreseen facility-obsolescence leaks, everyday nuclear dump leakage and mishaps, and uranium mining and tailing operations, and shipping nuclear materials and waste by plane, ship, train, truck and container mishaps ...produces the same fallout that detonating a nuclear bomb produces.

### **That silver lining!**

The good news is that alternative energy is now 50 percent to 75 percent cheaper to produce than nuclear energy. It creates no long-term waste storage problems. It produces no health threat to us, the unborn or to Gaia.

### **Effects of today's nuclear energy industry leaks and fallout on pregnant women**

Since 1947, the effects of nuclear fallout on pregnant women is well documented in our nuclear energy industry history. It is nothing new: U.S. unspeakable experiments include hundreds of pregnant women fed nuclear material; children given radioactive lemonade to drink, and infants injected with radioactive iodine: <sup>a b</sup>

*Inhuman Radiation Experiments*, John LaForge, *Counterpunch*, April 12-14, 2013:

[An April 17, 1947 memo by Col. O.G. Haywood of the Army Corps of Engineers explained why the studies were classified. "It is desired that no document be released which refers to experiments with humans and might have adverse effect on public opinion or result in legal suits."<sup>c</sup>

Victims included civilians, prison inmates, federal workers, hospital patients, pregnant women, infants, developmentally disabled children and military

---

<sup>a</sup> *Inhuman Radiation Experiments*, John LaForge, *Counterpunch*, April 12-14, 2013  
<http://www.counterpunch.org/2013/04/12/inhuman-radiation-experiments/>

<sup>b</sup> Apr 12, 2013 - U.S. Unspeakable Experiments: Hundreds of pregnant women fed nuclear material — Infants drinking radioactive lemonade — "All I could think of was Nazi Germany"

<sup>c</sup> "Radiation tests kept deliberately secret," *Washington Post*, Dec. 16, 1994; Geoffrey Sea, "The Radiation Story No One Would Touch," Project Censored, March/April 1994

personnel - most of them powerless, poor, sick, elderly or terminally ill. Eileen Welsome's 1999 exposé, *The Plutonium Files: America's Secret Medical Experiments in the Cold War*, details "the unspeakable scientific trials that reduced thousands of men, women, and even children to nameless specimens."

[...]

In one Vanderbilt U. study, 829 pregnant women were unknowingly fed radioactive iron. In another, 188 children were given radioactive iron-laced lemonade. From 1963 to 1971, 67 inmates in Oregon and 64 prisoners in Washington had their testicles targeted with X-rays to see what doses made them sterile.

At the Fernald State School, mentally retarded boys were fed radioactive iron and calcium; but, consent forms sent to parents didn't mention radiation. Elsewhere, psychiatric patients and infants were injected with radioactive iodine.

[...]

In a rare public condemnation, Clinton Administration Energy Sec. Hazel O'Leary confessed being aghast at the conduct of the scientists. She told *Newsweek* in 1994: "I said, 'Who were these people and why did this happen?' The only thing I could think of was Nazi Germany." None of the victims were provided follow-on medical care. [...]

## **BC official connects with pregnant moms and newborns after rain radiation levels rise**

### **'No-drink' order in Old Massett BC follows radiation increase<sup>a</sup>,**

Apr 9, 2011 – *Queen Charlotte Islands Observer*, April 8, 2011:

Old Massett (British Columbia) has issued a no-drink order for rainwater after levels of iodine 131, an indicator of radioactivity, were found to be rising. ...

Seeing levels of iodine 131 in rainwater rise steeply (from unmeasurable to 1.1 Becquerels per liter) between March 24 and April 1, [Acting band manager John Disney] ramped up testing to once a day. [He] said the level determined as dangerous, is 6 ...but because the tests are a few days behind, he is worried about continuing increases. ...

As the band manager, he realized he was responsible for the community, so he went to the Health Centre and got a regime going. A private lab in Saskatchewan is doing the tests, which he says can be turned around in 48 hours. He also set the Emergency Preparedness committee in motion to come up with a plan. ...

At the end of the day, the community's health is at stake. So far he has been trying to share the information and post it in public places.

---

<sup>a</sup> No-drink order in Old Massett, following radiation increase, <http://www.qciobserver.com/Article.aspx?Id=4908>

He also has a direct email list and a connection with pregnant mothers and those with newborns, who are at a higher risk. He sent the no-drink order to other communities on the islands.

[End]

<>

### **Human embryos in U.S. bio-accumulate radioactive iodine, cesium, strontium - Harvard Med School doctor**

#### **There is no safe exposure to radiation<sup>a</sup>**

Apr 9, 2011 - Radiation from Japan is now detectable in the atmosphere, rain water and food chain in North America. Fukushima reactors are still out of control and hold 10x more nuclear fuel than there was at Chernobyl, thousands of times more than the bomb dropped on Hiroshima.

#### **Bioaccumulation**

Bioaccumulation increases the concentration of many contaminants as one moves up the food chain. Beef is much higher in dioxins than cattle feed and tuna fish have much higher mercury than their marine environment. Radioactive iodine, cesium, and strontium, all beta emitters, become concentrated in the food chain because of bioaccumulation.

#### **At top of food chain are humans, including fetuses & human breast milk - radioactive iodine in the thyroids of mammals**

At the top of the food chain, of course, are humans, including fetuses, and human breast milk.

In 1963, one week after an atmospheric nuclear bomb test in Russia, our scientists observed the magnifying power of bioaccumulation when they detected radioactive iodine in the thyroids of mammals in North America even though they could not detect smaller amounts in the air or on vegetation.

Bioaccumulation is one reason why it is dishonest to equate the danger to humans living 5,000 miles away from Japan with the minute concentrations measured in our air. If we tried, we would now likely be able to measure radioactive iodine, cesium, and strontium bio-accumulating in human embryos in this country. *Pregnant women, are you okay with that?*

#### **Genetic damage of ionizing radiation on humans**

Hermann Mueller, a Nobel Prize winner, is one of many scientists who would not have been okay with that. In a 1964 study, *Radiation and Heredity*, Mueller spelled out the genetic damage of ionizing radiation on humans. He predicted the gradual reduction of the survival of the human species as exposure to radioactivity steadily increased. Indeed, sperm counts, sperm viability and fertility rates worldwide have been dropping for decades.

<sup>a</sup> Apr 9, 2011 – *There is no 'safe' exposure to radiation*, Salt Lake City Tribune  
<http://www.sltrib.com/sltrib/opinion/51585989-82/nuclear-radiation-scientists-bullets.html.csp>

### **Radiation risks from Fukushima no longer negligible in Europe'**

Independent French radiation commission warns Europe that health risk from Fukushima fallout is “no longer negligible” — Says U.S. west coast has 8-10 times more contamination

Apr 11, 2011 *Radiation risks from Fukushima 'no longer negligible', EurActive*

The risks associated with iodine-131 contamination in Europe are no longer negligible, according to CRIIRAD,<sup>a</sup> an independent French research body on radioactivity. ...

The document, published 7 April, advises against consuming rainwater and says vulnerable groups such as children and pregnant or breastfeeding women should avoid consuming vegetables with large leaves, fresh milk and creamy cheese.

The risks related to prolonged contamination among vulnerable groups of the population can no longer be considered negligible and it is now necessary to avoid risky behavior, CRIIRAD said. ...

[This] is applicable to other European countries, as the level of air contamination is currently the same in Belgium, Germany, Italy and Switzerland, for example.

Data for the west coast of the United States, which received the Fukushima radioactive fallout 6-10 days before France, reveals that levels of radioactive iodine-131 concentration are 8-10 times higher there, the institute says.

<>

#### **What level of radiation can be a risk?**

Euratom<sup>b</sup> Directive of 13 May 1996 establishes general principles and safety standards on radiation protection in Europe. ...Beyond [ten microSieverts per year], possible measures should be considered to reduce exposure, it says. ...

#### **Children to two most vulnerable, ingestion of 50 Becquerel (disintegrations per second) is too much**

CRIIRAD notes the amount of iodine-131 capable of delivering a dose of 10 [microSieverts] varies greatly depending on the age of consumers. Children up to two years old are the most vulnerable and ingestion of 50 Becquerel (disintegrations per second) is enough to deliver to the body a dose of 10 microSieverts, according to the institute.

If the foods (leafy vegetables, milk etc.) contain between one and 10 Bq per kg or more, it is possible that the reference level of 10 [microSieverts] may be exceeded within two to three weeks, the institute added.

-2279- Over EPA limit: Cesium levels in San Francisco area milk now higher than 6 months ago

Collector's Name: Victoria Brandt		Date/Time Collected: 01/06/2012 15:28			
Site Name: Cal Poly Dairy Farms		Source Name: Winter Forage			
R Number: R 92449		Sample Type: Vegetation			
Sampling Point	Method	Parameter	Result ± CE	MDAs	Units
Harvested 4/1/11	HASL Ga-01-R	Cs-134	0.122 ± 0.00311	0.00603	pCi/g
Harvested 4/1/11	HASL Ga-01-R	Cs-137	0.177 ± 0.00507	0.0137	pCi/g

(Above) The June 9, sample result was 132.4 Bq/kg of cesium 134 + 137 (3,579 pCi/kg).

Measurements of Fission Products from the Fukushima Daiichi Incident in San Francisco Bay Area Air Filters, Automobile Filters, Rainwater, and Food, Dec. 27, 2013: A variety of environmental media were analyzed for fallout radionuclides from the Fukushima nuclear event. Winter forage vegetation at the California dairy farm had combined cesium 134 + 137 equaling 0.299 pCi/gram or 299 pCi/kg.

Cesium-134 levels would be even higher than reported due to the 9 months of radioactive decay that took place before testing occurred (37.5% into its 2-year half-life).

No reason is stated for the 9-month gap between when the vegetation sample was harvested and when it was tested.

[View more California milk testing results here](#)

### More thoughts from Arnie Gundersen

#### Impact of Fukushima radiation on the ocean

The Impact of the Fukushima Radiation on the Ocean, EcoReview, Community Television of Santa Cruz County, Dec. 7, 2011:

*[Excerpted from an interview with Arnie Gundersen, Chief Engineer, Fairewinds Associates; Nuclear Engineering, Safety, and Reliability Expert; Federal and Congressional hearing testimony and Expert Witness testimony; Former Senior Vice President Nuclear Licensee; Former Licensed Reactor Operator; 39-years of nuclear industry experience and oversight]*

At 53:35 in - I think if you're on the west coast and the Cascades you need to demand more of your - you know Oregon, Washington State, California - of your local officials, or of the federal government, to look into what's in the fish. Not just the saltwater fish ...but, also what's rained out on the land and is now in the local rivers.

At 55:10 in: It was a wave ...significant radiation hit the west coast and settled in on the Cascades

Three <sup>133</sup>Xe releases of 2·10<sup>18</sup>Bq between March 12 and March 16, 2011

15 Apr 2011

US include radiocesium (<sup>137</sup>Cs) from Japan earthquake and nuclear incident aftermath. Radiocesium was detected March 25, March 31, April 7 and April 14, 2011. Levels detected were 0.047, 0.137, 0.043 and 0.004 pCi/m filters collected before and after these dates had no detectable radioiodine.

<sup>131</sup>I sample contained 2072.0 ± 72 pCi/kg <sup>131</sup>I and 503.0 ± 29 <sup>137</sup>Cs. This was not a result of WCCGS operation, but is attributed to the Fukushima nuclear incident in Japan.

<sup>131</sup>I No iodine or cesium detected in resample.

Artificial radiation (μGy h <sup>-1</sup> )	Te-132	I-131	Cs-137	Cs-134	I-132	Cs-136

## **Radiation hitting streets of Los Angeles**

-3624.1- Radiation hitting L.A. streets (includes description of Chernobyl kids w/eyes on sides) of head, etc.

<http://drsircus.com/world-news/radiation-hitting-streets-la/>

Excerpts from article referenced in -3624.1- (above), as follows:

The plume from the burning graphite at Chernobyl traveled in a northwest direction toward Sweden, Finland and Eastern Europe, exposing the public to levels up to 100 times normal background radiation.<sup>22</sup>

Hope Burwell wrote, On my first trip to Chernobyl in November 2000, I spent three days touring schools in Cherikov and the even more contaminated areas of the Mogilev district. Then we traveled to children's hospitals in Minsk.

What I saw there still shows up in nightmares: children with eyes in the sides of their heads, and children with no eyes at all, children with fingers that look like toes and children whose genitals are so poorly formed one can't determine their sex. Those nightmares are audible with infant wails like the cries of wounded wild animals.

Burwell reported 23% of Belarus was contaminated with Chernobyl's fallout, 32,592 square miles.<sup>23</sup> The average level of contamination on the polluted territories, 37 curies (Ci) per square kilometer ...37Ci/km<sup>2</sup>. The International Atomic Energy Agency (IAEA) sets the safe-for-residency limit at a maximum of 5Ci/km<sup>2</sup>.<sup>24</sup>

Western predictions of Chernobyl's consequences were based on Hiroshima-Nagasaki data, and on the then-current belief iodine-131 had a low carcinogenic potential.

But, within a year after the accident, Belarus scientists reported an increase in a rare childhood thyroid cancer to 5,000 times its spontaneous occurrence in clean countries.

According to the 2000 report on Minsk's United Nations Development Program (UNDP), life expectancy in Belarus in the 1960s was almost level with that in Western Europe. By 1999, 13 years after Chernobyl, it had fallen 12-14 years for men and 7-9 years for women. A baby boy born in rural Belarus today can expect to live 59 years.

Nearly half of Belarus's teenagers have serious health problems.

Of those graduating from high school, 45-47% have physical disorders ...like, gastrointestinal anomalies, weakened hearts, and cataracts; 40% of them have chronic blood disorders and malfunctioning thyroids.

The number of handicapped adolescents has tripled in the last decade.

It has always been known ionizing radiation in higher doses than background levels can cause increases in cancers and leukemia as well as cause genetic mutations (that affect future generations).

This is what we are facing today in Japan, Hawaii, the continental United States, Canada and Europe: all received too much radiation from Fukushima.

Radiation is pouring out of Fukushima and ~~that radiation~~ is hitting the streets of Los Angeles quite hard.

In April 2012 environmental journalist and *LA Weekly* contributor Michael Collins, an independent who has tested over 1500 samples since the Fukushima earthquake of 2011, was shocked to find radiation levels in falling rain over L.A. measured five times above normal.<sup>25 26 27</sup>

Radiation can damage our bodies by breaking the chemical bonds in our cells.<sup>28</sup>

The greatest human experiment with radiation exposure is taking place in the Ukraine and Byelorussia, where much of the 50 million curies the Soviet government says were released by the 1986 accident at Chernobyl is being felt.<sup>29</sup> (As a reference point, the Hiroshima and Nagasaki bombs released an estimated one million curies.)<sup>30</sup>

TEPCO has reported on what happens in Fukushima. An estimated 1.6 billion becquerels of radioactive materials were released, compared with 500 million becquerels when the double doors of the building of reactor No. 1 were opened, one day in May.<sup>31</sup>

### **Monday morning in Washington D.C.**

**Oct. 31** - Monday morning in Washington D.C., Marco Kaltofen, PE, of the Department of Civil & Environmental Engineering at Worcester Polytechnic Institute in Massachusetts, [discussed current issues concerning radiation exposure in Japan](#). Kaltofen is a Massachusetts Registered Professional Engineer engaged in the investigation of nuclear material release. He investigated the transport of radioactive particles in his dissertation research at WPI.

Here are excerpts from the description for his presentation, 'Radiation Exposure to the population in Japan after the earthquake':

The Fukushima nuclear accident dispersed airborne dusts that are contaminated with radioactive particles. When inhaled or ingested, these particles can have negative effects on human health that are different from those caused by exposure to external or uniform radiation fields.

A field sampling effort was undertaken to characterize the form and concentration of radionuclides in the air and in environmental media which can accumulate fallout. Samples included settled dusts, surface wipes, used filter masks, used air filters, dusty footwear, and **surface** soils.

Isolated U.S. soil samples [outskirts of Portland, OR](#) contained up to 8 nanoCuries per Kg of radiocesium, while control samples showed no detectable

radiocesium. More: [Radiation Exposure to the Population in Japan After the Earthquake](#).

According to UC Berkeley, the highest cesium content in topsoil for each location sampled was fairly consistent throughout California:

Sacramento, CA Topsoil on Aug. 16, 2011:  
Total Cesium @ 2.737 Bq/kg

San Diego, CA Topsoil on June 29, 2011:  
Total Cesium @ 2.51 Bq/kg

Oakland, CA Topsoil on Sept. 8, 2011: Total  
Cesium @ 2.55 Bq/kg

Sonoma, CA Topsoil on Apr. 27, 2011: Total  
Cesium @ 2.252 Bq/kg

Alameda, CA Topsoil on Apr. 6, 2011: Total  
Cesium @ 2.52 Bq/kg

The highest cesium levels of any topsoil measurements by UC Berkeley since the crisis began was 2.737 becquerels/kg in Sacramento. This is equal to 73.9 picocuries/kg. ([Conversion](#): 27 picocuries = 1 becquerel)

## According to Kaltofen

According to Kaltofen, the highest cesium levels detected in U.S. surface soil were up to 8 nanoCuries per Kg of radiocesium in the outskirts of Portland, OR.

According to Kaltofen, the highest cesium levels detected in U.S. surface soil were up to 8 nanoCuries per Kg of radiocesium in the outskirts of Portland, OR.

Kaltofen's highest findings were up to 108 times greater than the highest findings by UC Berkeley.

Before Kaltofen's finding, the highest cesium content in US topsoil post-Fukushima was 700 picocuries/kg near Reno at the base of the Sierra Nevada Mountains by a person affiliated with the University of Nevada. However, this was only preliminary and appears to not have been confirmed.<sup>a</sup>

Though we do not know what location in the U.S. Kaltofen's samples were from (hopefully that information will soon be made available, [for update, see below]; we do know that UC Berkeley samples were taken in areas that had some of the highest radiation readings in the nation post-Fukushima.

Finally, Kaltofen's control surface soil samples (known to be unaffected by Fukushima fallout) showed no detectable radiocesium, meaning the 8,000 pCi/kg finding of cesium was caused by the triple meltdowns in Japan rather than leftover from atomic weapons tests decades ago.

---

<sup>a</sup> [See: [700 pCi/kg of Cesium-137 found in soil from base of Sierra Nevada mountains according to preliminary data](#)]

UPDATE 1: The [slideshow from Kaltofen's presentation is now available online](#) via the Fairewinds website. However, it does not provide any specific information on the cesium detection in the U.S. The only additional mention on this topic is that U.S. samples had only two isolated Cs-134 and Cs-137 detections in soil. It shouldn't take too long before we find out how many U.S. samples were tested, where they were from, and what results and minimum detectable amounts were.

UPDATE II: In [Arnie Gundersen's latest video he says](#): There is also data that indicates contamination on the ground in the Cascades, which are a mountain range right up against the Pacific Ocean. The only other time he mentions a specific location for ground contamination is, The Rocky Mountains stopped most of the radiation and deposited it on the ground. Gundersen says there is 'data' about the Cascade's ground contamination, where his statement about the Rockies was more general – So, it looks like it was somewhere around the Cascade range in the Pacific Northwest.

Title: [Kaltofen's soil measurement 100X UCB's? - 296 becquerel/kg?](#)

Source: UC Berkeley Department of Nuclear Engineering Forum

Date: April 5, 2012 <> *Submitted 2012-04-05 19:51 PT*

My group measured soil, air filter and dust samples from Washington, Oregon, California, and British Columbia. This particular soil sample, with 8 pCi/g of radiocesium, was our highest North American result. It came from a site on the outskirts of Portland, OR.

The next highest result came from a site near Boulder, CO.

Except for follow-up samples near these two sites, no other US or Canadian samples came close to the levels of radiocesium in these hot spots.

Given the nature of radioactive fallout, this is an expected result. Both hot spots are likely due to rainouts that took place during March or April 2011. A [recent study by the USGS](#), Fission Products in National Atmospheric Deposition Program-Wet Deposition Samples Prior to and Following the Fukushima Dai-Ichi Nuclear Power Plant Incident, March 8-April 5, 2011", found remarkably similar

results. The USGS study was more detailed, (and more with a much bigger budget), and found evidence of rainouts at Portland and Boulder. When you collect a lot of samples, some are bound to be much higher than the average. - Marco Kaltofen

[Editor's note: *This comment appears consistent with Kaltofen's communication style and past statements. Read the report here.*]

01:47 PM Mar 13, 2017 | 21

### Radioactive News

Health authorities continue to insist that there are no health risks involved, but *Huffington Post* tells us Bluefin tuna caught in California last August showed radiation levels that were ten times the norm, according to a new paper from the Proceedings of the National Academy of Sciences journal. Scientists believe that the radiation-in the form of the isotopes caesium-137 and caesium-134-came from the Fukushima Dai-ichi nuclear disaster that began in March of 2011.

In addition, radioactive debris is already being found on West Coast shores as far as Washington State and is expected to continue to be washed up in the next three years.

-8857- Fish leaking pus, covered in lesions, deformed along U.S. West Coast - Fisherman: Nearly all fish caught affected; I've never seen this... Some had pus all over body - Official: So many are showing illness, environmental conditions could be a factor (PHOTOS)

2:35 PM Mar 16, 2017 | 157

-8859- Massive die-offs reported in Pacific Ocean - Officials: No fish out there, anywhere, over a very large area. What's happening? Where's their food? Alarming. Frightening. Total failure in reproduction. Like nothing we've ever observed before (VIDEO)

3:40 PM Mar 19, 2017 | 111

-8861- Report: Hundreds of millions of Pacific salmon missing, presumed dead - Gov't issues emergency order along U.S. West Coast - Japan suffering historic collapse, fish starving to death - All forms of ocean life dying in stunning numbers across Pacific

12:43 PM Mar 30, 2017 | 163

-8866- Most catastrophic fisheries collapse in history expected along West Coast - Official: This is a nightmare, I have never in my life dreamed that it could get this bad - Threat of coast-wide fishing failure (VIDEO)

-6040- U.S. military reveals radiation-related illnesses after Fukushima: arm shrunk to half its size - immune system attacking body - leukemia, testicular cancer, thyroid problems, rectal bleeding, brain tumor

In growing lawsuit, service members fault TEPCO for radiation-related illnesses Source: Stars and Stripes; Author: Matthew M. Burke July 15, 2013

Excerpts: Five months after participating in humanitarian operations for the March 11, 2011, earthquake and tsunami that led to nuclear disaster in Japan, Petty Officer 3rd Class Daniel Hair's body began to betray him.

He had sharp hip pains, constant scabbing in his nose, back pain, memory loss, severe anxiety and a constant high-pitch ringing in his ears as his immune system began to attack his body. The diagnosis, he said, was a genetic immune system disease, which on

X-rays looked to have made his hip joint jagged and his spine arthritic.

Other service members have been diagnosed with leukemia, testicular cancer and thyroid problems or experienced rectal and gynecological bleeding, the lawsuit says. Hair said one of his friends, a fellow USS Ronald Reagan shipmate, was diagnosed with a brain tumor.

Hair said there is no history of the genetic disease in his family and that doctors have told him radiation exposure could have triggered it.

Senior Chief Mike Sebourn said he suffered nose bleeds, headaches and nausea in the immediate aftermath - symptoms consistent with radiation poisoning. Months later, he felt weak in his right arm; excruciating pain followed. He said the command fitness leader in charge of physical training at Atsugi watched as his arm atrophied to about half its size.

01:40 PM Jul 17, 2013 | 32

-6041- 25x as many people in Fukushima area develop thyroid cancer after disaster - Japan Expert: My heart breaks greatly that those U.S. service members suffered radiation exposure

<sup>2</sup> Chernobyl: Consequences of the Catastrophe for People and the Environment

[http://www.strahlentelex.de/Yablokov\\_Chernobyl\\_book.pdf](http://www.strahlentelex.de/Yablokov_Chernobyl_book.pdf) Published by New York Academy of Sciences, *Chernobyl: Consequences of the Catastrophe for People and the Environment* was written by scientists who used health data from 1986 to 2004; edited by Janet Sherman.

## **Chapter 11.**

### **Chernobyl's Radioactive Impact on Microbial Biota**

**Alexey V. Yablokov**

[Abstract] Of the few microorganisms that have been studied, all underwent rapid changes in the areas heavily contaminated by Chernobyl. Organisms such as tuberculosis bacilli; hepatitis, herpes, and tobacco mosaic viruses; cytomegalovirus; and soil micromycetes and bacteria were activated in various ways. The ultimate long-term consequences for the Chernobyl microbiologic biota may be worse than what we know today. Compared to humans and other mammals, the profound changes that take place among these small live organisms with rapid reproductive turnover do not bode well for the health and survival of other species.

[Article] One gram of soil contains some 2,500,000,000 microorganisms (bacteria, microfungi, and protozoa). Up to 3 kg of the mass of an adult human body is made up of bacteria, viruses, and microfungi. In spite of the fact that these represent such important and fundamentally live ecosystems there are only scarce data on the various microbiological consequences of the Chernobyl catastrophe.

Several incidences of increased morbidity owing to certain infectious diseases may be due to increased virulence of microbial populations as a result of Chernobyl irradiation.

1. Soon after the catastrophe studies observed activation of retroviruses (Kavsan et al., 1992).

2. There is evidence of increased susceptibility to *Pneumocystis carinii* and cytomegalovirus in children whose immune systems were suppressed in the contaminated territories of Novozybkov District, Bryansk Province (Lysenko et al., 1996).

3. Tuberculosis became more virulent in the more contaminated areas of Belarus (Chernetsky and Osynovsky, 1993; Belookaya, 1993; Borschevsky et al., 1996). Address for correspondence: (Editor's note: omitted.)

4. In some heavily contaminated areas of Belarus and Russia there was a markedly higher level of cryptosporidium infestation (Lavdovskaya et al., 1996).

5. From 1993 to 1997 the hepatitis viruses B, C, D, and G became noticeably activated in the heavily contaminated areas of Belarus (Zhavoronok et al., 1998 a, b).

6. Herpes viruses were activated in the heavily contaminated territories of Belarus 6 to 7 years after the catastrophe (Matveev, 1993; Matveev et al., 1995; Voropaev et al., 1996).

- 
7. Activation of cytomegalovirus was found in the heavily contaminated districts of Gomel and Mogilev provinces, Belarus (Matveev, 1993).
  8. Prevalence of *Pneumocystis* was noticeably higher in the heavily contaminated territories of Bryansk Province (Lavdovskaya et al., 1996).
  9. The prevalence and severity of Gruby's disease (ringworm), caused by the fungus microsporia *Microsporum* sp., was significantly higher in the heavily contaminated areas of Bryansk Province (Rudnitsky et al., 2003).
  10. The number of saprophytic bacteria in Belarussian sod-podzolic soils is at maximum with radioactivity levels of 15 Ci/km<sup>2</sup> or less and minimal in areas 281 282 Annals of the New York Academy of Sciences with up to 40 Ci/km<sup>2</sup> (Zymenko et al., 1995).
  11. There is a wide range of radionuclide bioaccumulations in soil micromycetes. The accumulation factor of Cs-137 in *Stemphylium* (family Dematiaceae) is 348 and in *Verticillium* (family Muctdinaceae) 28 (Zymenko et al., 1995).
  12. Since the catastrophe, the prevalence of black microfungi has dramatically increased in contaminated soil surrounding Chernobyl (Zhdanova et al., 1991, 1994).
  13. Among soil bacteria that most actively accumulate Cs-137 are *Agrobacterium* sp. (accumulation factor 587), *Enterobacter* sp. (60–288), and *Klebsiella* sp. (256; Zymenko et al., 1995).
  14. In all soil samples from the 10-km Chernobyl zone the abundance of soil bacteria (nitrifying, sulfate-reducing, nitrogen-fixing, and cellulose-fermenting bacteria, and heterotrophic iron-oxidizing bacteria) was reduced by up to two orders of magnitude as compared to control areas (Romanovskaya et al., 1998).
  15. In contaminated areas several new variants of tobacco mosaic virus appeared that affect plants other than Solanaceous species, and their virulence is most likely correlated with the level of radioactive contamination in the areas. Infection of tobacco plants with tobacco mosaic virus and oilseed rape mosaic virus was shown to induce a threefold increase in homologous DNA recombination in non-infected tissues (Boyko et al., 2007; Kovalchuk et al., 2003).
  16. All the strains of microfungi species that were studied (*Alternaria alternata*, *Mucorhiemalis*, and *Paecilomyces lilacinus*) from the heavily contaminated Chernobyl areas have aggregated growth of threadlike hyphae, whereas the same species from soil with low radionuclide contamination show normal growth. Only slowly growing *Cladosporium cladosporioides* has aggregated growth both in contaminated and TABLE 11.1. Characteristics of Oocysts of *Coccidia* (*Eimeria cerna*) in Voles (*Clethrionomys glareolus*) from Two Differently Contaminated Sites, Bryansk Province (Pel'gunov, 1996) Level of contamination 20µ R/h 180–220 MR/h Normal 94.5 76.6 Anomalous 06.3 Nonsporulated 5.2 12.2 lightly contaminated soils (Ivanova et al., 2006).
  17. Sharp reduction in the abundance of bifidus bacteria and the prevalence of microbes of the class *Escherichia*; in particular, a sharp increase in *E. coli* has been noted in the intestines of evacuee children living in Ukraine (Luk'yanova et al., 1995).
  18. In a long-term study (1954 to 1994—before and after the catastrophe) in Belarus, Ukraine, and Russia it was revealed that in areas with a high level of radioactive contamination (740–1,480 kBq/m<sup>2</sup> and higher) in Bryansk, Mogilev, Gomel, Chernygov, Sumy, Kaluga, Oryol, Smolensk, and Kursk provinces, practically no cases of rabies in wild animals have been reported since the catastrophe (Adamovich, 1998). This suggests that the rabies virus has either disappeared or become inactivate.
  19. Rodents in the heavily contaminated territories of Belarus have been extensively invaded by coccids (obligate intracellular protozoan parasites from the phylum Apicomplexa; Sutcheny et al., 1995).
  20. There are fewer than normal, more anomalous, and no sporulated oocysts of coccidian *Eimeria cerna* in voles (*Clethrionomys glareolus*) in Bryansk Province (Table 11.1).
  21. Six years after the catastrophe a population of *Eimeria cernae* From *Clethrionomys Glareolus* living in heavily contaminated soil (up to 7.3 k Bq/kg of Cs-134, Cs-137, Sr-90, and Pu-106) in Kiev Province Yablokov: Radioactive Impact on Microbial Biota 283 had anomalous oocysts (Soshkin and Pel'gunov, 1994).

---

22. There was a significant decline in the Shannon diversity index of infusoria species and a concomitant increase in their abundance in the Pripyat River mouth from 1986 to 1988 (Nebrat, 1992).

All microorganisms (viruses, bacteria, fungi, and protozoa) and microbiological communities as a whole undergo rapid changes after any additional irradiation. The mechanism of such changes is well known: inclusion and increase in the frequency of mutations by natural selection and preservation of beneficial novel genes that for whatever reason appear more viable under the new conditions. This micro-evolutionary mechanism has been activated in all radioactively contaminated areas and leads to activation of old and the occurrence of new forms of viruses and bacteria. All but a few microorganisms that have been studied in Chernobyl-affected territories underwent rapid changes in heavily contaminated areas.

Our contemporary knowledge is too limited to understand even the main consequences of the inevitable radioactive-induced genetic changes among the myriad of viruses, bacteria, protozoa, and fungi that inhabit the intestines, lungs, blood, organs, and cells of human beings.

The strong association between carcinogenesis and viruses (papilloma virus, hepatitis virus, *Helicobacter pylori*, Epstein-Barr virus, Kaposi's sarcoma, and herpes virus) provides another reason why the cancer rate increased in areas contaminated by Chernobyl irradiation (for a review, see Sreelekha et al., 2003).

Not only cancer, but also many other illnesses are connected with viruses and bacteria. Radiologically induced pathologic changes in the microflora in humans can increase susceptibility to infections, inflammatory diseases of bacterial and viral origin (influenza, chronic intestinal diseases, pyelonephritis, cystitis, vaginitis, endocolitis, asthma, dermatitis, and ischemia), and various pathologies of pregnancy. The long-term consequences for microbial biota may be worse than what we understand today.

**13. De-corporation of Chernobyl Radionuclides**

Vassily B. Nesterenko and Alexey V. Nesterenko, 303

**14. Protective Measures for Activities in Chernobyl's Radioactively Contaminated Territories**

Alexey V. Nesterenko and Vassily B. Nesterenko, 311

**15. Consequences of the Chernobyl Catastrophe for Public Health and the Environment 23 Years Later.**

Alexey V. Yablokov, Vassily B. Nesterenko, and Alexey V. Nesterenko, 318

**Conclusion to Chapter IV, 327**

<sup>4</sup> U.S. - Thyroid cancer rise - was 4 a year, now 4 a month

Medical researchers unsure why thyroid cancer cases on rise - Indianapolis Star (USATODAY), -Shari Rudavsky Jan 15, 2012

--National Cancer Institute statistics suggest that in recent years the number of cases of this often curable cancer has increased by about 6.5%. Over a decade, that has added up to make thyroid cancer the fastest-increasing cancer, says Tod Huntley, an otolaryngologist and head and neck surgeon with the Center for Ear, Nose, Throat and Allergy in Indianapolis.

--Ten years ago, if I saw four new thyroid cancer patients a year, it would have been a lot, says G. Irene Minor, a radiation oncologist with Indiana University Health Central Indiana Cancer Center. Now sometimes I see that many in a month, and I have seen three in a week.

--A recent study showed that the increase is not just in smaller tumors, which might have to do with detection, but also in larger ones, Huntley says.

--There is definitely something going on, he says. How much is due to increased surveillance and detection and how much is due to an actual biological change in disease prevalence, we don't know, but we know it's both.

<sup>6</sup> <http://enenews.com/caldicott-live-tv-election-called-about-half-japan-contaminated-huge-censorship-whats-happening-fukushima-video>

<sup>7</sup> [PhysOrg](#), Sep 23, 2014 (*emphasis added*): In a previous study, the group [of university researchers] suggested that eating leaves with high levels of radiation seriously affected the pale grass blue butterfly. Their new study investigated the **effect of eating leaves with much lower levels of radiation**... Joji Otaki, University of Rukyus, says... Our study demonstrated that eating contaminated foods could cause **serious negative effects on organisms**. Such **negative effects** may be **passed down the generations**... eating non-contaminated food improves the negative effects...

[AAAS](#), Sep 22, 2014: **Fukushima radiation still poisoning insects** - Eating food contaminated with radioactive particles may be **more perilous than thought**... The findings from Otaki's group are **groundbreaking**, says Timothy Mousseau, a biologist at the University of South Carolina... there have been almost no studies on how ingestion of radiation-tainted foods affect wildlife.

[Study by University of the Ryukyus and Nagasaki University researchers](#), published Sep 23, 2014: [We] examined the effects of **low-level-contaminated diets**... The mortality rate increased linearly in accordance with an increase of the cesium... **Remarkably**, the mortality rate of the Koriyama group [.04 Bq per larva] was 53% [in the first generation]... We discovered various morphological abnormalities in the surviving adults... **severe and rare abnormalities** shown in [Figure 5](#) might imply the effects of a contaminated diet. Only three [that ate] Okinawa leaves [1760 km from Fukushima Daiichi] showed very minor morphological abnormalities... As observed in the **F1** [first] generation, various morphological abnormalities were detected in the surviving F2 [second generation] adults... **very high mortality and abnormality rates** [were] recorded... **low-dose effects were clearly detected**... results suggest that low-dose ingestion of approximately 100 Bq/kg may be **seriously toxic to certain organisms**... The biological effects of ingesting the contaminated diets were more severe in the F2 generation...

#### *Mortality Rates*

Koriyama [60 km from Fukushima Daiichi] F1 group and the Koriyama F2 group obtained from the Koriyama F1 adults were 53.0% and 79%, respectively

Motomiya [also 60 km] F1 group and the Motomiya F2 group obtained from the Motomiya F1 adults were 31.2% and **99%**, respectively... very small number of surviving adults

**Prof. Otaki**: Many theoreticians and politicians have claimed [that Fukushima has caused] no harmful biological effects... Even worse, some biologists have claimed that there are no biological impacts... to our surprise, leaves contaminated at relatively low levels... resulted in a mortality rate of more than 50%... Moreover, the sensitivity of the offspring generation increased, resulting in very high mortality rates... it is widely believed among modern biologists that insights obtained from one biological system are largely applicable to other systems...

<sup>8</sup> Butterflies: Death and mutations increase from exposure to Fukushima contamination

<sup>9</sup> Little animals suffer too

[Smithsonian Magazine](#), May 14, 2014: *Even Tiny Amounts of Radioactive Food Made Caterpillars Become Abnormal Butterflies* Researchers in Japan discovered, even a small amount of radiation is too much. The scientists collected plant material from around Fukushima and fed it to pale grass blue butterfly caterpillars. When the caterpillars turned into butterflies, they suffered from mutations and were more likely to die early [... even if they]

---

had only eaten a small amount of artificial cesium In other words, things don't look good for the animals living around Fukushima.

[Nature - Scientific Reports](#) (pdf), Published May 15, 2014: [We] examined possible relationships between the dose of ingested cesium per larva and the mortality and abnormality rates. Both the mortality and abnormality rates increased sharply, especially at low doses the mortality and abnormality rates increased sharply, especially at low doses. Additionally, there seemed to be no threshold level below which no biological response could be detected. the dose-response data suggests that the relatively small level of artificial cesium from the Fukushima Dai-ichi NPP may be significantly toxic to some individuals in butterfly populations the half lethal [i.e. LD50, amount that will kill 50% of a test subjects] dose [is 1.9 Bq per larva] and the half abnormal dose [is 0.76 Bq per larva] relatively small [levels] of artificial cesium from the Fukushima Dai-ichi NPP may be significantly toxic to some individuals in butterfly populations we assert that the half lethal and abnormal doses we obtained were quite high. it should be noted that we sampled contaminated leaves from Fukushima City, which many people inhabit as though nothing had happened Implications of the half lethal and abnormal doses we obtained in the present study will impact future discussions on the effects of radioactive exposure on other organisms, including humans. In conclusion, it is important to recognize the risk of internal radiation exposure due to ingested radioactive cesium, at least for the pale grass blue butterfly, and likely for certain other organisms living in the polluted area, possibly including humans.

<sup>10</sup> Surge in babies born with extra arms, legs after Fukushima - I feel officials know the cause is radiation - many get abortions to avoid 'inconvenient' babies - High number of stillbirths - Many people report cancer, far from Fukushima (VIDEO)

<sup>11</sup> Rapid rise in babies with missing brains and protruding spines - actual number higher than officials report (VIDEO)

<sup>12</sup> {see footnote at 3624.1} Hope Burwell wrote, On my first trip to Chernobyl in November 2000, I spent three days touring schools in Cherikov and the even more contaminated areas of the Mogilev district. Then we traveled to children's hospitals in Minsk. **What I saw there still shows up in nightmares: children with eyes in the sides of their heads, and children with no eyes at all, children with fingers that look like toes and children whose genitals are so poorly formed one can't determine their sex. Those nightmares are audible with infant wails like the cries of wounded wild animals.**

<sup>13</sup> Missouri Senator Maria Chappelle-Nadal, Sep 17, 2015 (at 27:00 in): ... reports that the Attorney General did with independent scientists: **what we have under the ground could end up as Chernobyl. ... 40,000 tons of uranium** have been spread all over the place ... **the most potent uranium in the world.** We're looking at the **cancer clusters** ... the number of children who have **double sets of teeth, missing eyeballs, brain tumors.** This is not consistent with a normal community, whatsoever.

<sup>14</sup> <http://www.stlmag.com/news/think-again/The-Poisoned-Children-of-Coldwater-Creek/> excerpt: Wright says there are a stunning number of reports of infertility, in addition to the birth-defect cases. There have been three separate cases of conjoined twins (a statistical anomaly). There were three babies born with only one ear, another without either eyeball.

<sup>15</sup>[http://www.thewe.cc/weplanet/news/depleted\\_uranium\\_iraq\\_afghanistan\\_balkans.html](http://www.thewe.cc/weplanet/news/depleted_uranium_iraq_afghanistan_balkans.html)  
Deformed children in Fallujah from depleted uranium bombardment: Young women in Fallujah in Iraq are terrified of having children because of the increasing number of babies born grotesquely deformed, with no heads, two heads, a single eye in their foreheads, scaly bodies or missing limbs. In addition, young children in Fallujah are now experiencing hideous cancers and leukemia. These deformities are now well documented, for example in television documentaries on SKY UK on September 1, 2009, and on SKY UK June 2008. Our direct contact with doctors in Fallujah report that: in September 2009, Fallujah General Hospital had 170 new born babies, 24% of whom were dead within the first seven days, a staggering 75% of the dead babies were classified as deformed. This can be compared with data

---

from the month of August in 2002 where there were 530 new born babies of whom six were dead within the first seven days and only one birth defect was reported. A significant number of babies that do survive begin to develop severe disabilities at a later stage. One grave digger of a single cemetery is burying four to five babies a day, most of which he says are deformed.

<sup>17</sup> Excerpts from report on Huffington Post, Dec 14, 2015 (emphasis added): *How India's Nuclear Industry Created A River Of Death...*

Researchers found that the Subarnarekha river and areas around Jadugoda, India, were **poisoned from the emissions of a nearby secret nuclear factory** ... The Center for Public Integrity has reviewed hundreds of pages of personal testimony and clinical reports in the case that present a disturbing scenario. Doctors and health workers, as well as international radiation experts, say that nuclear chiefs have **repeatedly suppressed** or rebuffed their warnings. The case files include epidemiological and medical surveys **warning of a high incidence of infertility, birth defects and congenital illnesses.**

[Dipak Ghosh, a respected Indian physicist and dean of the Faculty of Science at Jadavpur University, with his] team collected samples from the river and from adjacent wells, seven years ago, he was **alarmed** by the results... It was **potentially catastrophic**, Ghosh said in a recent interview. **Millions of people** along the waterway were potentially exposed. Many said their children were born with **partially formed skulls**, blood disorders, **missing eyes or toes, fused fingers or brittle limbs.**

Analyzing a representative sample of people between 4 and 60 years old living within a mile and a half of the third tailing dam, the **researchers hired by [Uranium Corporation of India Limited]** concluded that the **residents were affected by radiation.** Symptoms included swollen joints, spleens and livers, and coughing up blood. The UCIL report also described osteoporosis, **defective limbs**, and **habitual abortion**, as well as many complaints of missed menstrual cycle and a **cluster of cancer** cases.

[A]n **American diplomat** [warned that] lax safety measures are exposing local tribal communities to radiation contamination. In a confidential cable to Washington, Henry V. Jardine, a career Foreign Service officer and former Army captain, expressed blunt dismay. In a new cable on June 6, 2008, Jardine told Washington another epidemiological study had concluded indigenous groups ... living close to the mines reportedly suffer **high-rates of cancer, physical deformities, blindness, brain damage** and other ailments. UCIL refuses to acknowledge these issues, he noted. Jardine wrapped up: Post contacts, citing independent research, say that **it is difficult to point out any reason other than radiation.**

Surendra Gadekar, a nuclear physicist, began taking soil, water and air samples... Their study was published in 2004... It found radiation levels inside the villages around the tailing ponds were almost **60 times the U.S. Nuclear Regulatory Commission safe level...** [They] also documented the existence in neighboring populations of children with **malformed torsos and deformed heads** and the **wrong number of fingers**, as well as a cluster of cases where **infants' bodies grew at different rates**, giving them a **lopsided** gait. Some had hyperkeratosis, a condition known as, **'toad skin'**.

In late 2000, [Hiroaki Koide, a nuclear engineer who teaches at the Research Reactor Institute at Kyoto University] took soil and water samples. These figures were **exceptionally worrying**, Koide said. **No one should have been living anywhere near.** 'Koide confirmed that uranium rock and finely ground mine tailings had been used as ballast for road leveling and **house building and to construct a local school and clinic.** [A] senior UCIL official... confirmed these construction projects using irradiated materials had gone ahead as **part of a community outreach project.**

Toronto Star, Sep 15, 2014: *India's nuclear nightmare: The village of birth defects...* Neither Alowati nor Duniya can walk, nor can they hold anything; their limbs dangle lifelessly... Their

---

knees and elbows are rubbed raw from crawling... They need help to bathe and use the toilet. Children with birth deformities like Alowati and Duniya live **on almost every street in Jadugora...** When people began to notice that young women were having miscarriages, witches and spirits were blamed... But people had **lesions, children were born with deformities, hair loss** was common. Cows couldn't give birth, hens laid fewer eggs, fish had skin diseases... [L]ocal media reports... included shocking pictures of children who were sick or deformed... A 2007 report by the Indian Doctors for Peace and Development, a non-profit, found a **far greater incidence of congenital deformity, sterility and cancer...** Mohammad is 13 but looks 7. Like Alowati and Duniya, he drags himself forward with his elbows... A few huts away [a child's] **eyelids are turned inside out...** Watch video from AOL here

<sup>18</sup> Fairewinds Japan Speaking Tour Series No. 3, Feb 24, 2016 (emphasis added):

- *Maggie Gundersen, Fairewinds Energy Education Podcast host*: One of the things that you've talked about and [environmental scientist Marco Kaltofen, PhD, PE] have talked about is internal radiation exposures and **hot particles**. What's the difference between a bomb exploding and a **nuclear plant exploding in the hot particles?**

- *Arnie Gundersen, Fairewind Chief Engineer and former nuclear engineer* (emphasis added): Most of the bomb exposure was from a direct flash that was over in seconds. There wasn't a significant amount of contamination on the ground because the bomb went off 1,000 feet in the air. So there was not a lot of radiation residual left on the ground for hot particles to get into people's lungs... That's not what we're seeing at Fukushima Daiichi. **Everything I'm finding here is millions and billions of very, very small particles that are spread pretty much everywhere.** We'll know a little bit more about that in the future... There's no comparison between a bomb and what happened at Fukushima. **A bomb obliterated maybe a pound of uranium** and it was a thousand feet in the air, so most of it went up almost immediately; whereas **each of the nuclear reactors at Fukushima had 100 tons of uranium in them so that the quantity of radiation that's spread out throughout the countryside is orders of magnitude higher at Fukushima than it was at Nagasaki.**

-Fairewinds Japan Speaking Tour Series No. 2, Feb 17, 2016:

- *Arnie Gundersen, Fairewinds' Chief Engineer and former nuclear engineer* (at 2:30 in): We found a parking lot at a supermarket [in Fukushima] that had a large radioactive source right in the middle... that people were walking over and driving over. It was **loaded with black radioactive dust just wherever you go - it's everywhere...**

-AG: One of the samples that one of my fellow scientists collected showed **plutonium - and significant amounts of plutonium**. It was in a square meter... he was getting 19 disintegration per second [becquerels] of plutonium. That stuff is **going to be around for a quarter million years...**

- *Maggie Gundersen, Fairewinds Energy Education Podcast founder*: That **plutonium was part of the core that came out then in the explosion**, correct?

-AG: **Yeah, the only source it could ever have come from is inside that nuclear reactor.**

-MG: And **the plutonium is being redeposited** at locations that were unanticipated?

-AG: **Yeah, it's everywhere.... It is everywhere**, and we're very careful, we're wearing gloves all the time, respirators all the times...

-AG: Wherever the ground is exposed, there is a high level of radiation in the mountains around here... it's all going to run right off and into the Pacific Ocean...

-MG: You talked about the plutonium - where was that found?...

-AG: The plutonium was found in a farmer's field about 10 miles from the power plant, it was found because that's where they looked. **If it's sitting out in that farmer's field, it's everywhere. Wherever there's radiation - cesium - there's going to be plutonium, and that's truly frightening...** It's pretty clear that significant amounts of plutonium are scattered throughout the hillsides... plutonium has got a 25,000 year half-life, so it's a quarter of a million years before it's gone.

Discovery, Dec 27, 2015: Although only limited areas of Fukushima are allowing residents to come back, that doesn't mean these areas are safe. **You can still find dangerous radioactive elements such as cesium, strontium, and plutonium in abundant quantities** here.

<sup>21</sup> [Oregon Official: Reports coming in of seafood with radioactive contamination](#)

[The Oregonian](#), Nov. 19, 2013: - A pocket of doubt persists despite reassurances from scientists and federal health regulators that Pacific-caught seafood is safe to eat. Health officials say Fukushima radiation doesn't pose a public health threat in the United States. That hasn't stopped lingering concerns. Christina Mireles DeWitt, director of Oregon State's Seafood Research and Education Center in Astoria, said she's noticed an uptick in worries recently. She receives about a call a week from concerned residents who've relayed second-hand reports of contaminated fish. Their stories aren't specific, though, and Mireles DeWitt (who still eats seafood) hasn't pinpointed what's causing the increased chatter. They're kind of secretive, she said. They don't want to give up their sources.

[The Oregonian](#), Nov. 19, 2013: [Fukushima radiation in Oregon fish; Andy Norris is concerned about the impact the Fukushima nuclear disaster is having on local fish](#) - Oregon Filmmaker Andy Norris: We're pooling resources, we're buying a community Geiger counter. This is a huge nuclear accident. It's not done. 400 tons of radioactive water is being dumped into the Pacific each day. We think it's prudent to be doing some testing. It's not going to go away soon. It's still coming over. This is going to go on for years, if not decades. It's a very sensible idea to buy this community Geiger counter.

[Watch The Oregonian's video featuring Norris here](#)

[Reports of Fukushima contamination in albacore tuna off Oregon coast: More US tuna contaminated -- Study: Entire food web including humans may be affected as Fukushima radionuclides spread to West Coast](#)

<sup>22</sup> Since Chernobyl, Belarus has seen a sharp rise in birth defects.

Right after Chernobyl blew its top, Edward Teller said on the ABC Evening News in late April 1986, The chances of a real calamity at a nuclear power station are infinitesimally small. But should it happen, the consequences are impossible to imagine.

<sup>23</sup> , more land than six eastern states combined

<sup>24</sup> Eighty-eight percent of contaminated Belarus is 111x-370x more contaminated than that.

<sup>25</sup> A March 6th test of a HEPA filter recorded radiation levels 668% or 6.68 times the normal background radiation levels. This test took place 43 days after initial tests and shows a 130% increase since January 22nd 2012. The California Highway Patrol considers anything over 3x background, 300% of background above, a trigger level to a hazardous materials situation, reported the *EnviroReporter*.

Our last HEPA filter measurements January 22 produced some astonishing results. Doing a spot test on the Honeywell barrel-style filter and a Kenmore Plasmawave, we found radiation ~351% of normal background. The machines had been running for 42 days. The combined aggregate dust came in even hotter at 538% of normal background radiation at Radiation Station Santa Monica.

Now 43 days later the dust was a lot hotter. A spot test was ~377% of the previous background. Then we vacuumed out the filters with a HEPA filter Eureka vacuum cleaner and tested the aggregate. The March 6 test of the combined dust came in at a sizzling 668% of background or 6.68 times normal. Since the last testing period, the radiation detected has risen another 130% indicating a continued upward trend.

---

<sup>26</sup> That radiation is rising in Los Angeles as it is in many places in the northern hemisphere. For some reality checking, we have the New York Times saying that, The amount of radioactive materials released in the first days of the Fukushima nuclear disaster was almost two and a half times the initial estimate by Japanese safety regulators, the operator of the crippled plant said in a report released on the 24th of May, 2012.

The operator, the Tokyo Electric Power Company, said the meltdowns it believes took place at three reactors at the Fukushima Dai-ichi plant released about 900,000 terabecquerels of radioactive substances into the air during March 2011. The accident, which followed an earthquake and a tsunami, occurred on March 11. The latest estimate was based on measurements suggesting the amount of iodine-131 released by the nuclear accident was much larger than previous estimates, the utility said in the report. Iodine-131 is a fast-decaying radioactive substance produced by fission that takes place inside a nuclear reactor. It has a half-life of eight days and can cause thyroid cancer. The newly released information just adds insult to injury to not only the Japanese but everyone on the west coast of North America, then onward across the plains to the east coast and Europe.

<sup>27</sup> There are literally a billion people that have not been told the extent of the accident or the risks it posed directly for them.

A terabecquerel is a trillion becquerels, a commonly used measure of the radiation emitted by a radioactive material. So the New York Times is saying that early on 900,000,000,000,000,000 becquerels were released in the first 20 days of the nuclear disaster. Sounds like a lot but how much is that really? The becquerel is a useful measure of the amount of radiation emitted by a substance, but it tells us little about the effect of that radiation on our bodies.

<sup>28</sup> The amount of damage done depends on how much radiation we are exposed to. This in turn depends on how much radioactive material is present in our environment, our food and so on. So it is important to have some way to talk about amounts of radiation. This is what the unit becquerel is for.

<sup>29</sup> ... Chernobyl legacy could include hundreds of thousands of additional cancer deaths... Current estimates predict anything from 14,000 to 475,500 deaths worldwide from Chernobyl. (A curie measures the intensity of radiation; is equal to 37 billion disintegrations per second.

<sup>30</sup> If we translate what the New York Times is saying in terms of radiation released in the first 20 days, 900,000 terabecquerels translates into 27 million curies. It is over a year later and no one knows or is saying how much aggregate radiation has been released but we can imagine it's a staggering amount.

One curie is the amount of radiation equal to the disintegration of 37 billion atoms-37 billion becquerels-per second. It is a very large amount of radiation. We multiply these amounts (27 million curies times 37 billion radioactive atoms) and we are back to just a little more than our 900,000 terabecquerels... all the way up to 999,000,000,000,000,000 becquerels, which translates into 999,000,000,000,000,000 nuclear particles decaying in the first 20 days of the Fukushima nuclear nightmare.

<sup>31</sup> So let's go back to Belarus where the average level of contamination on the polluted territories was 37Ci/km<sup>2</sup> and the maximum safe limit for residency is 5Ci/km<sup>2</sup>. We had 27 million curies released in the first 20 days and that would contaminate an area of approximately five million square kilometers if distributed equally. Of course that never happens as we can see in the fallout patterns surrounding Chernobyl. It can be assumed that the worst of the radiation was released in the first month with the complete meltdown of multiple reactor cores and the destruction and probably vaporization of spent-fuel rods.
